## County Wins

### Many Premiums

County Exhibit at State Fair Takes Twelve First, One Sweepstakes And Two Second Prizes

The Washington County exhibit at the State Fair which was in charge of County Agent McWhorter, Frank C. Fluke of Kinton and C. R. La Follett of Cornelius won twelve blue ribbons, one sweepstakes and two second prizes in the open classes as follows:

C. B. Buchanan, Hillsboro, first and sweepstakes on Hannachen barley, and was proclaimed the best exhibit of barley in the show.

W. G. Wilcox, Beaverton, first grain hay and Hungarian vetch. J. C. Leedy, Sherwood and Clyde A. Edwards, Kinton, first and second on onions.

George Harrow, Hillsboro, 1st for the largest squash. Oregon Nursery Co., Orenco, first on clover hay.

E. F. Burlingham, Forest Grove, first on winter barley. E. Goetter, Forest Grove, second on white spring oats.

E. F. McCormack, Dilley, first on alsike clover seed. Sherman Hyre, Hillsboro, first on baled alfalfa and rural type potatoes grown in Western Ore.

Mays Brothers, North Plains, first on timothy seed. W. J. Enschede, Hillsboro, first on baled timothy.

The competition between counties was eliminated last year at the request of the exhibitors and the counties now work to put on a creditable showing.

## BEAVER THEATRE

### CHANGES MANAGEMENT

Mr. D. A. White, who since the opening of the new building has been manager of the Beaver Theatre, has disposed of his interests in the show business here to C. W. Conley, M. E. Stenneth, and A. H. McGinnis, who expect to remodel the building and open up for business Friday evening of this week.

The three are contemplating big improvements in the interior and exterior decorating, seating and other things to help make the house comfortable and attractive.

Mr. White will take a short vacation before going into business elsewhere. He expects to take his family to Eugene for a visit with friends. After his return he will probably open up some line of business in this vicinity.

## TUNNEL MEETING

### WILL BE HELD HERE

Arrangements have been perfected for a tunnel meeting to be held Wednesday evening, Oct. 14 in the Beaverton high school auditorium.

W. A. Gill, President of the Tualatin Valley Tunnel Committee will be present to address the meeting. He will bring his stereopticon slides of views taken of different tunnels in different sections of the country. Others will be present to explain ventilating systems and other things necessary in the operation of these thoroughfares.

Everybody is urged to attend.

## BEAVERTON LIBRARY

### KEEPS GROWING

The Public Library has received as gifts over 120 books from Mrs. Byfield, Mrs. Spranger, Mrs. C. E. Mason, Catherine Beach and Ella Fink.

Half of these books are fiction, the other good reference works. Among the fiction writers represented are Curwood, Zane Grey, Garthner, Harold Bell Wright, and Rex Beach. The Library is nearing its 2000 mark. Are you making use of it?

E. E. Swenson having filed a petition with the County Clerk to become a candidate for Tunnel Director automatically disqualifies him from acting as one of the judges of the election to be held on Oct. 20th, accordingly the County Court on Oct. 5th appointed C. E. Hedge to be Chairman of the election on that date.

## VOTE FOR TUNNEL

### OCTOBER TWENTIETH

Owners of property in this section in the area within the boundaries of the proposed Tunnel District are to vote on the proposal to create a district which will have charge of the Tunnel if it is to be built.

The Tunnel District comprises about 60,000 acres in the Tualatin Valley, bounded by a line beginning at Dosch Road, just west of Council Crest, and runs in a north-westerly course to a line something near three miles north-east of Hillsboro; thence it will run south to the Tualatin River; thence along the Tualatin River south easterly to a point about two miles east of Scholls; thence north-easterly, just taking in a small part of the townsite of Multnomah, going from there north to a point on the Dosch Road about one-fourth of a mile south of the starting point.

The part of the district in Portland is bounded by a line beginning in Marquam Gulch, about 100 feet west of Terwilliger Boulevard, thence eastward to about a block west of the old county hospital; thence north to Arthur St., east to Front St., north to Sherman, east to the middle of the Willamette River, northwest to the north end of 16th St., south to Main St., and thence south-easterly back to Marquam Gulch.

The Tualatin Valley Tunnel Association is represented in the city by the Portland Tunnel Committee, Julius Meier, Chairman, and James Sayer, Secretary; and in the Tualatin Valley the committee is headed by W. A. Gill, Chairman, and H. C. Frye, Secretary.

No estimate of the cost of the Tunnel has been made except in the most casual way, despite the fact that on the street you can hear any kind of an estimate from \$350,000 upward.

No estimate will be made if the tunnel election does not carry October 20th.

The only voting place in Washington County will be the Beaverton High School, where all who wish to vote on the Tunnel must come on October 20. The object of the election is not as a bond issue, but is merely the first formality toward the establishment of a Tunnel District, much the same as the electors get together to establish a school district. The bonds for building the school-house and for financing the district are voted later. In like manner the bonds and any expense that will be incurred must come after the district is organized.

County Clerk Luce informs us that the expense of the election must be born by the county. Much of the expense has already been involved.

The Tunnel Directors at this meeting cannot tax the district. They can ask for a preliminary survey to be made, which is all the expense they can involve the district in. This survey should not cost very much more than the election.

Property owners are the only ones who can vote in this election. No one will be allowed to vote who is not the owner of 5000 square feet or more of property.

Ernest Grandgeorge says that the voters of Tunnel District No. 1 should insist that provision be made for a street car line through the Council Crest tunnel, then carfare to Portland should be 10 cents each way instead of 10 cents now.

Washington County's Concrete Bridge Gang is placing a

concrete culvert across the Walker Road just east of John Trachsel's ranch. They will soon place another culvert near Louie Siegenhauer's flour mill on the Cornell Road. This crew has been busy all summer building substantial bridges for Washington County. Here they are: Mr. Eggiman, Wm. Matzke, and W. F. Desinger, foreman.

Miss Clara Trachsel, a member of the class of '25 was greeting friends in school last Tuesday.

Mrs. Henry Desinger from Knappa, Oregon, surprised her brother, E. J. Hecox, with a visit Sunday.

Monday a stranger undertook to drive a Ford down Johnson hill without brakes, and landed in the ditch.

The Barnes school is located on a part of the old Lawrence Hall Donation Land Claim two miles northwest of a good town named Beaverton!

Mrs. Elizabeth Miller, one of the popular young people of Beltham, visited the Barnes school Tuesday, being much interested in the drawings of the students.

Dell Shackelford's famous Iron Springs on the old Shackelford D. L. C. are becoming popular for pilgrims in quest of eternal youth. Shades of Ponce de Leon!

A ringing letter in defense of the famous Council Crest Tunnel from the pen of Fred Koshland appeared on the editorial page of Saturday's Oregonian of October 3.

Rev. Father Springer of Ray was in town Monday. Among other things he remarked about the joyment he received from reading the news in the Review. He reported that Joe Moore had burned out at Roy a short time ago. He has his store under operation again and has his residence under construction.

Washington County's Concrete Bridge Gang is placing a

concrete culvert across the Walker Road just east of John Trachsel's ranch. They will soon place another culvert near Louie Siegenhauer's flour mill on the Cornell Road. This crew has been busy all summer building substantial bridges for Washington County. Here they are: Mr. Eggiman, Wm. Matzke, and W. F. Desinger, foreman.

Miss Lovena Esther Allen was united in marriage at 11 o'clock A. M. Sunday, October 4, with Hershel L. Funk. The Rev. Horace S. Wiley, formerly the Congregational minister at this place, officiated.

Both of the contracting parties are residents of Beaverton, Miss Allen having lived here all her life, while the groom came to Beaverton more recently.

The house was prettily decorated with drapery and flowers appropriate to the season. Those present at the ceremony were N. V. Baker, C. E. Funk, Laurette Eden, R. F. Gasteel, B. W. Merritt, Margaret Hennessy, Florence Harrison, C. W. Allen, Chalmers Eden, Ralph Eden, Malisa Merrill, Ethel Merrill, E. N. Gasteel, E. L. Gasteel, Anna L. Allen, Emma Funk, Orrin Allen, Della May Allen, Walter H. Switzer, Ray Stanton, Emma Stanton, Della C. Fisher, Della R. Allen, Ann Wassen, Pernicia Jackson, Sadie Eden, Ruby Allen, Clarence Allen, Mr. and Mrs. F. M. Allen, Lewis Stanton, Esther Switzer, and Arthur Allen.

Many beautiful gifts were received by the young couple.

The tunnel will eliminate the danger to life and property when the hills are unsafe, besides shortening distance and enabling larger loads to be hauled. The Terwilliger Boulevard has been next to impossible to negotiate several times even tho at great risk. There is not State Highway entering Portland with so many accidents as occur on these two crowded roads, and if we can get another road to relieve the congestion and lessen the danger it behooves us to do so.

Who would not prefer in cold, icy weather, to go through a covered tunnel where the road is dry, safe, straight and but little grade to going over either of the present roads? The tunnel is a necessity for an additional entrance to Portland from the west just as much as additional bridges are needed for the east side residents.

This paid ad in the Oregonian claims the tunnel is an experiment. This statement is too preposterous to require refuting but I will call your attention to the numerous tunnels all over the country and ask you if you ever heard of one being abandoned? Just as reasonable to say bridges are an experiment, or that bridges could not be successfully used because accidents have happened on them. The tunnel will not be immune from accidents any more than any other straight dry road, but I do say the accidents will be reduced to the minimum because of the straight dry road, and if a breakdown occurs in the tunnel it will be treated the same as if it occurred in the road anywhere else.

As to ventilation: We do not have to go further than San Francisco to see the successfully ventilated tunnel in operation every day with no ill effects. It would be just as logical to say we will build no more highways or bridges because accidents might occur on them. When we eliminate the

## SOME ADVANTAGES

### OF THE TUNNEL

As the time is drawing near when we will be asked to cast our vote on the question of forming a tunnel district I would like to only to express my views as an old-time citizen but to correct some misrepresentations which I notice in a paid ad of the Oregonian of the 8th instant. I have lived 34 years on this side of Portland, 24 years of which I have been a resident taxpayer of Beaverton, and speak from experience—not from hearsay.

It must be admitted that all our Highways are more or less dangerous, but fewer accidents happen on straight level roads than on steep grades or curves such as those of either the Canyon Road or the Terwilliger Boulevard. I have seen the Canyon Road many times when it could not be travelled with safety, and several times when it was impossible to go up or down with any kind of vehicle.

The tunnel will eliminate the danger to life and property when the hills are unsafe, besides shortening distance and enabling larger loads to be hauled. The Terwilliger Boulevard has been next to impossible to negotiate several times even tho at great risk. There is not State Highway entering Portland with so many accidents as occur on these two crowded roads, and if we can get another road to relieve the congestion and lessen the danger it behooves us to do so.

Who would not prefer in cold, icy weather, to go through a covered tunnel where the road is dry, safe, straight and but little grade to going over either of the present roads? ## Grays Leave

### For Creswell

Farewell Party Given Rev. and Mrs. G. A. Gray who Have Left Beaverton

Rev. and Mrs. G. A. Gray have left for Creswell, Oregon, about twelve miles south of Eugene, where they will take charge of the Methodist Church. Rev. J. H. Irvine from Creswell, will come to the M. E. Church here. He will preach here next Sunday morning and evening.

Tuesday night the many friends of Rev. and Mrs. Gray gathered in the basement of the M. E. Church for a farewell party. After a beautiful supper everyone had a general good time, with some singing and impromptu talks.

Rev. and Mrs. Gray leave Beaverton with the best wishes of not only the church members, but also with all those with whom they came in contact.

The tunnel will eliminate the danger to life and property when the hills are unsafe, besides shortening distance and enabling larger loads to be hauled. The Terwilliger Boulevard has been next to impossible to negotiate several times even tho at great risk. There is not State Highway entering Portland with so many accidents as occur on these two crowded roads, and if we can get another road to relieve the congestion and lessen the danger it behooves us to do so.
