**It's the last few miles
that count with
LUBRICANTS**

PARABASE—a General Motor Oil—was made to take
care of those last few miles of lubrication, as well as the
first ones. It is in the last few miles, just before you put
fresh oil in, that the damage is done. Parabase will take
you just as far as you expect it to and then a little farther.
Parabase stands up—stress and heat in the motor do not
cause it to quickly break down—it is your insurance that
at the end of the run your motor will be as sound, so far
as the lubrication of its moving parts is concerned, as it
was at the start.
Drain your crank-case every thousand miles. Tell the
garage or service station man to fill up with Parabase.
Notice the immediate difference in your motor—and
remember—"It's the end of the run that counts."
