**HOW TO HELP THE EDITOR
MAKE A BETTER PAPER**

First of all, give him the news; he wants it. Give it to him, even though it doesn't get in the paper. He hasn't time always to tell you why some piece of news is not used; but ten to one he has a perfectly good and impersonal reason. Give him the news even though you may not be especially interested in it. Some folks never think to give the editor news except when they are concerned in it one way or another.

Second, don't give him a piece of news and tell him you want it printed just as it is written. There's a right and wrong way to do even a simple little thing as writing an article for a country paper. One editor had to leave town because he printed every piece of news just as it was handed in—spelling, punctuation, and printed it with the name of the person who gave it to him.

Third, don't try to play a joke through the paper unless you explain to the editor. A thing in cold type looks a lot different from a thing repeated by word of mouth, when the voice, the facial expression and a gesture, perhaps, help to show its meaning.

Fourth, don't worry for fear the editor is making too much money. You should want him to be prosperous. He can and will give you a better paper. He will be less likely to have to compromise with his conscience over certain kinds of advertising. And, anyway, he can't make a big fortune out of the paper; he will be lucky if he can keep it going.

Fifth, be ready to tell your editor when something in the paper pleases you. Once in a while you tell your preacher he has a good sermon; so tell the editor the same about his paper. Sixth, get your copy to him early. Take it in for the next week the day after the previous publication day if you can. It takes time to set type and to make up a paper. Did you ever wonder what the editor did all the time between publication days? You wouldn't if you were a country publisher yourself.

Lastly, go in some day when the paper is being printed. Go in several times during the day and you will have more of a realization of what a job it is to make a country newspaper. Cornwall (Ont.) Freeholder.

New cankers of apple-tree anthracnose in Oregon begin to appear from November to January. The first shows as a circular spot darkened with purplish tints when moistened. At first the bark is not sunken but is discolored and has a water-soaked appearance. It develops but little until March or April when it enlarges rapidly. The spots become elliptical and the surface sunken.

**STRAIGHT TALKS
WITH AUNT EMMY**

On Fifteen Per Cent Bonds

Mrs. Norris beamed as she greeted Aunt Emmy and exclaimed, "Now I know all my financial worries are over! I wanted to tell you right away."

"What have you bought this time?" Aunt Emmy demanded suspiciously. "Well, I haven't paid the money over yet, but I have found the loveliest investment where my money will be perfectly safe and will earn a nice income for me right away," Mrs. Norris said. "I'm going to buy bonds, good safe bonds, that will pay me fifteen per cent interest."

"Wait a minute, you'll have to go some, Maud Norris, to tell me about 'good safe bonds' that pay fifteen per cent!" Aunt Emmy broke in.

"They are safe—the man said so and this booklet says so too!"

"Do you know what a bond is?" asked Aunt Emmy.

"No, but it's awfully safe. I'm sure of that," Mrs. Norris said. "Everybody knows that bonds are safe."

"My dear, some bonds are safe and some are not. When you buy a bond you simply lend your money to the company putting out the bonds. Bond issues are secured generally by the company mortgaging or pledging some of its property. In other words, it offers a certain asset as security that it will return your money to you on the date the bond matures. It agrees to pay you a certain sum each year for the use of your money, usually something between five and eight per cent. No company can afford to pay too much for its money—and as to fifteen per cent bonds—why it would be very unusual for a company to be able to earn enough to enable it to pay fifteen per cent for the privilege of using other people's money—moreover, if it is good enough to borrow money at all it can borrow it more cheaply than that!"

"Oh dear!" wailed Mrs. Norris, "then a bond isn't a good safe investment—"

"Don't jump at conclusions so fast!" said Aunt Emmy. "I did not say that. A bond is as safe as a church if the company that issues it is financially sound, has a high credit rating and is making money. Before you buy bonds assure yourself that the company behind them is above reproach."

"But the man who told me about these fifteen per cent bonds was so earnest—I felt sure I could believe him."

"Don't turn over any money to him until you have some advice on the bonds from your bank," admonished Aunt Emmy. "Then, if you find out that the bonds are questionable you will escape another bad investment."

FAIRBANKS-MORSE STEEL ECLIPSE WINDMILL

The windmill with the drop forged crankshaft

That one of the many reasons why the Fairbanks-Morse Steel Eclipse Windmill has become a leader. The crankshaft is drop forged, accurately machined and ground—made like the finest engine crankshafts.

And again, instead of cast tooth gears you find accurately machined gears. Instead of ordinary shafting and bearings you find turned, ground and polished bearing surfaces that eliminate vibration. The entire equipment is all metal. Working parts are completely enclosed. The self-oiling feature has done away with poor lubrication, the old cause of wear and trouble.

Let us show you the trouble-proof windmill that has fewer parts and better—the windmill that is built like a good engine—the windmill that pumps sooner and pumps longer.
