Caravan of Death 660 Miles Long Is Nation's Auto Story

NEW YORK TO DETROIT The 700,000 persons killed and injured by automobiles in 1924 would form an unbroken chain of 660 miles!

A CARAVAN of death and suffering 660 miles long is what the annual automobile casualties of the United States would form if placed in one continuous line. From New York to Detroit, painful mile on painful mile, this ghastly and pathetic human chain would reach. This graphic picture, prepared by the Stewart-Warner Safety Council for the prevention of automobile accidents, tells its own story. Twenty-two thousand killed annually by automobiles and 600,000 injured is the present toll caused by thoughtless drivers and careless pedestrians. Only a small per cent of the accidents are due to defects in the cars or can rightly be called unavoidable.
