THROUGH A **WOMAN'S** EYES

By JEAN NEWTON

the by the Beil Syndicate, Iuc. The Tyranny of Things In his "Story of Mankind" Hendrick

Van Loon says of the Greeks: "The story of Greek life is a story of simplicity. "Things," chairs and tables and books and houses and carriages, are apt to take up a great deal of their owner's time. In the end they invariably make him their slave and his hours are spent looking after their wants, keeping them polished and brushed and painted. The Greeks, before everything else, wanted to be free,' both in mind and in body. That they might maintain their liberty and be truly free in spirit they reduced their daily needs to the lowest possible point.

And this reminds me of the time when I was a little girl, when a very rich lady who lived in a very large house with a great many servants remarked to my mother that she was going away to rest from her household duties. That appealed to my baby sense of humor. Six servants and she

needed a rest from household duties! My mother tried to explain what I have long since discovered-that the larger her house and the greater the number of her servants, the bigger is woman's job.

And so it is with most of the 'things" we call luxuries. They tyrannize over us. Like the woman who must remain indoors on a beautiful day because the crystal closet must be washed or the hangings cleaned, most of us are in some measure under the tyranny of things.

Silver has to be constantly polished. Furniture must be dusted and kept shining. Jewels must be locked in strong boxes of which people are constantly losing the keys! Indeed, the tramp takes the lonely road with less care and a lighter heart than the woman who rides in a limousine bedecked with jewels on account of which she is in fear of her life.

It has been said that "Heavy lies the head that wears a crown," but not heavier than the man's whose boited doors must guard valuables that invite

A woman whom I suspect of Greek ancestry made the remark the other day that with the glorious out-of-doors and so many wonderful and interesting things in life to enjoy, it is a crime that we must give so much time to simply "keeping the wheels going round"-the dressmaker and the hairdresser and the butcher, the baker, the candlestick maker, house, home and other routine

The Greeks in their simplicity had

The Art of Living

"I seem to be alright," a perfectly sane woman is known to have remarked, "when everything runs tensive visit to Europe, thus breaking smoothly. But the moment anything happens to upset my routine my nerves get the better of me and I has no resident agent in Ethiopia, Alam completely floored."

ce of her confession!

is no need for initiative or competence or courage. The most helpless infant can get along and be "airight." "As long as things run smoothly" -anybody can stay good natured. Then there is no need for poise or

sacrifice or self-control. An enraged buil rushing downhill is harmless if no one gets in his path. The test of us humans is how handle the situations that do not run

of disappointment, or hardship, or injustice.

Do we have polse, judgment, control? Do we retain our perspective and our own sense of justice?

Or are we "floored"-defeated before we begin? Do we run amuck, and, like the wild bull, make whoever happens to come in our path suffer

When things go smoothly we are not "going along"-we are being carried along on one of the pleasant tributaries of the river of life.

But when the currents cross and we find ourselves in unfriendly waters, which, if we let them, would rush us to the deadly rapids, that is the time when we must keep our heads and strike out and swim-that is the time that tests our caliber. And one thing we must all learn is that there is not one of life's tributaries, no matter how pleasant, that

will carry us benignantly all the way to the sea. Just as there is no land road that is without snags, smooth all the way, so the kindest currents must sometimes cross and put us on our

We have all got to take the rough with the smooth and to know how to take the rough smoothly is the whole art of living.

Making Progress

Marlon was a flirtatious young woman, and had been engaged many times, but at the age of thirty she was still unmarried. Two of her feminine friends were discussing her case. "It ooks as if Marion is not making a very good running in the matrimonial race," one said. "Oh, I don't know about that," the other remarked, "I passed by her house last night, and looking in her living-room window I noticed that she is on her tweifth iap."

Roosevelt Knew Secret

One of the secrets of Theodore Roosevelt's active life and strenuous disposition was his ability to thoroughly relax for 15 minutes at a time during the course of a hard day's work. He had the facility of ceasing to work, throwing himself back in a chair and relaxing. This relaxation, according to physicians, was as good as an hour's sleep. Few men could detach themselves from worry and strain for short periods as did Roosevelt.

Needs of Travelers.

When traveling in Abyssinia there

are a few details of organization to

which particular attention should be

paid. The first is to be well sup-

plied with interpreters. There should

be at least two, preferably men who

do not like each other, for there are

several hazards in having but one in-

terpreter. In the first place, you are

at his mercy, and are told only the

things that he is willing that you

should know. If he wishes to go a

certain route, he tells you that there

is but one road. Again, he may fall

ill and thus leave you without means

A second end to be secured in or

ganization is dissension in camp.

There can be to concerted action

and little individual sabotage in the

way of delaying the marches, if

urs-a practice due in part to dan-

(Prepared by the National Geographic Society, Washington, D. C.) HE status of Abyssinia, sup-

posedly settled a score of years ago when England, France, and Italy guaranteed her independence, is up for consideration again among the guaranters. The country is practically the last bit of Africa unappropriated by European powers, and some of the powers are wondering whether it would not be better after all to bring western civilization-and control-into this corper of the Dark Continent.

Although the people of Abyssinia may be immersed in medievalism. their rulers have managed to keep pretty well up with the times.

One of the most famous women rulers in the history of the world sat upon the throne of Abyssinia nearly 3,000 years ago, but the present empress of that country, a daughter of Menelik II, is not allowed to govern her people. Watzeru Zauditu is merely the nominal head of this country, which was noted as the home of the Queen of Sheba in the days of mon. The actual ruler of Abyssinia, or Ethiopia, as its natives prefer to call it, is Ras Taffari, the regent and helr apparent, son of Ras Makonnen of Harar, and cousin to the

empress. There has been an increasing sentinent on the part of Ras Taffart and others to widen Abyssinia's contact with the outside world. At the end of the World war, Ras Nado, governor of the province of Gore, was sent to congratulate the allies on their victory. In the course of his tour he visited the United States.

Ras Taffari upset convention when, in October, 1922, he visited Aden and a few hours after his arrival was viewing the city from the first airplane he had ever seen. In 1924 he did a still more astounding thing. In the early summer he made an ex-

a century-old precedent. Unfortunately, the United States though the ruler is very favorably disposed toward Americans, and is tate either very hazardous descents willing to extend unusual courtesies "As long as things run smoothly" to them, he first makes very sure -anybody can get along. Then there of their mission and satisfies himself that they are as they represent themselves. A would-be traveler may have to cool his heels in Addis Abada, the which caravans wander with ease. In capital, for many weeks before he re- such places marches can be made ceives permission to go about the with little hardship to the mules.

What Addis Ababa Is Like.

Addis Ababa is a straggling city. The principal streets are "paved" round, waterworn bowlders from 6 to 10 inches in diameter, and the run smoothly-how we act in the face | two main suburban roads along the base of the bill are surfaced with a thin macadam. Wheeled traffic is uncommon, most residents going from place to place on horseback. It is a journey of an hour and a half from the American mission, on one edge of town, to the British legation, on the other.

A fairly good road runs from the residence of Ras Taffari to that of the empress, and several streets are passable to the half-dozen automobiles, which are limited to the city and to one road which is improved for some distance westward. Over the country as a whole there is no possibility of wheeled traffic of any kind.

To ride in an automobile in the city is more or less of an adventure. The streets are always filled with pedestrians, each one of whom is obsessed with the idea that he must discover how long he can keep in front of the machine by running. The native pack ponies coming to market are unused to autos and gallop wildly along the road, causing their packs when loaded with hay, to slip sidewise and finally beneath them.

The store buildings are one or twostory adobe and stone structures covwith galvantzed-iron roofing. The stocks of goods are small and inferior, although at one store, run by a Parsee, a considerable assortment of articles is for sale. Besides the stores, there are the thousands of er levels to intangible streaks of grass-roofed buts scattered about the white, hills, where the native population

Hyes There is no electricity, no gas, no water or sewerage system, but there ular, but this one is a many-sided afis a "movie."

All the town goes to the station in the evening when the train arrives from Jibuti. The coaches of the train are filled with all kinds and classes often encircle the church dancing, or of people, who arrive weary and

Clean Kidneys By Drinking Lots of Water

Take Salts to Flush Kidneys If Bladder Bothers or Back Hurte

Eating too much rich food may produce kidney trouble in some form, says a well-known authority, because the acids created excite the kidneys. Then they become overworked, get sluggish, clog up and cause all sorts of distress, particularly backache and misery in the kidney region, rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, begin drinking lots of good water and also get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to flush clogged kidneys and stimulate them to activity; also to neutralize the acids in the system so that they no longer irritate, thus often relieving bladder

disorders. Jad Salts can not injure anyone; makes a delightful effervescent lithiawater drink which millions of men and women take now and then to help keep the kidneys and urinary organs clean, thus often avoiding serious kidney disorders.

W. N. U., San Francisco, No. 45-1926.
