

Rock of Chickamauga

George Henry Thomas, a distinguished Union general in the Civil war, was called the Rock of Chickamauga for his brilliant, stubborn defense of the federal position in the battle of Chickamauga, September, 1863.

Missouri Many Neighbors

Missouri and Tennessee have more close neighbors than any other state in the Union, according to Liberty. Each is bounded by eight other states.

Old Medical School

First medical school in America was established at Perkasie, Pa., on May 3, 1765. In 1770 the rights and property of the school were transferred to the University of Pennsylvania by the state legislature.

Immense Masonry Work

The great wall of China easily is the greatest masonry structure in the world. It is said to contain more bricks and stone than there are in all the buildings in Great Britain.

That Youthful Touch

Of course the modern woman dresses to look young. There is no "old" and "young" in clothes today. The same silhouette is used for grandmothers and debutantes. Two generations ago, the woman of forty was frankly middle-aged. She wore black and brown, and upon the appearance of her first gray hair she discarded hats for bonnets, which definitely classed her as an elderly lady. Today the woman of forty is a very youthful person—and she looks it!—American Magazine.

For an Emergency

Take a piece of cardboard and copy on it the telephone number of the fire department, family physician, your husband's office or other numbers that you might find necessary to use in an emergency. So often in a neighborly or some one else to whom the numbers are not familiar may do the telephoning. Hang this above your telephone and see what a convenience it is.

Roman Appellation

Leptis Magna is the old Roman name of the modern Lebda, in Tripolitania, an Italian possession on the Mediterranean coast of Africa. It was so called to distinguish it from a smaller Semitic settlement near the Carthaginian frontier—Leptis Parva. Leptis Magna was the chief city of the ancient Tripolitania, the other two being Caea (the present Tripoli) and Sabrata (the modern Zuagha).

Primitive Fountain Pen

Egypt claims the first inventor of a fountain pen. In a 4,000-year-old tomb there was recently found a section of reed no thicker than an ordinary lead pencil and of about the length of a fountain pen and mounted on a piece of copper. The nib of the pen is cut on the lines of a quill pen. The hollow in the reed is supposed to have held the ink.

Old London Monument

A monument at London was erected to commemorate the great fire of 1666. It was designed by Sir Christopher Wren, the famous architect, whose masterpiece is St. Paul's cathedral and whose other beautiful but smaller churches are to be found in many parts of old London. The monument stands near the north end of London bridge.

Secret Governing Board

Cabal means a secret cabinet or governing clique whose measures are unpopular. Such a clique existed in the reign of Charles II of England, composed of Clifford, Ashley, Buckingham, Arlington and Lauderdale. The initial letters of their names form the word Cabal.

Population Grows Fast

The population of the United States increases at a rate of one person about every twenty seconds.

ATWATER KENT IGNITION for Fords

TYPE LA
Price
\$10.80
Including
Cable and
Fittings

The name assures its performance

For twenty-seven years "Atwater Kent" has stood for advanced electrical engineering and absolute precision of manufacture. These qualities, which have won leadership in Radio, explain the exceptional performance of Atwater Kent Ignition for Fords. This remarkable scientific ignition system will literally make a new car of your Ford—smoother, snappier power, easier starting, amazing hill climbing.

Installed in an hour. The low price of \$10.80 includes cable and fittings. Get facts from your service station or write to:

ATWATER KENT MFG. COMPANY
A. Atwater Kent, Pres.
4859 Wissachickon Ave. Philadelphia, Pa.

Fine Home for Women's National Democratic Club

This handsome old mansion on fashionable New Hampshire avenue in Washington has been purchased by the Women's National Democratic club for its headquarters in the national capital. The club has made rapid progress in the last few years.

England's Newest and Most Powerful Battleship

The H. M. S. Nelson, England's newest and most powerful battleship afloat, as it left Newcastle for Portsmouth to go through naval maneuvers. It was constructed at Newcastle, and is named after Lord Nelson, one of England's most famous sea fighters.

Turned Down by the Royal Academy

John Collier, famed artist, with his painting of George Bernard Shaw, British writer and critic, which has been turned down by the hanging committees for this year's Royal Academy exhibit in London.

"Uncle Mose" Waiting for Relief

"Uncle Mose" with all his worldly goods waiting on the high section of the levee at Greenville, Miss., for the return of the Red Cross relief steamer to take him down the river to the newly established camp for refugees at Monroe, La.

SHORT ITEMS OF INTEREST

Parrots made a favorite dish of epicureans in ancient Rome.

New York city uses more electricity than do twelve European nations combined.

Illinois has a law which gives \$1,000 to any one who kills or captures a bank robber.

Alaska cost us \$7,200,000. The output of her mines since 1880 is valued at \$550,000,000.

Many kinds of insects spread plant and animal diseases.

Shanghai is larger in population than New Orleans, Cincinnati and Buffalo combined.

A boy just born near Clitheroe, Yorkshire, England, is the latest arrival of five living generations.

Men who work with their hands are being paid, collectively, 27 per cent more than they were 25 years ago.

COUNTESS DE CAEN

Countess Constance Hillier de Caen, descendant of French royalty, who is in Washington organizing parties of American gold seam mothers for visits to the graves of their soldier dead in France. She will also arrange visits by proxy to the graves for mothers who cannot afford the trip to France.

SEA LAWYER

Antoinette Dolores Hechner, twenty-eight, authority on maritime law, and the only woman attorney ever admitted to practice maritime law before the United States Supreme court. She is also special attorney for the United States shipping board and the Interstate commerce commission, maritime division.

First Beefsteak Club

A Beefsteak club founded in the reign of Queen Anne early in the Eighteenth century is believed to have been the first. It was composed of the "chief wits and great men of the nation," and had for its badge a gridiron.

Built on the Sand

If hedging a growing youth about with more wire fences will keep him straight, then his intellectual growth is not worth a copper.—James Huneker.

POULTRY

FOWLS PAY WELL FOR RIGHT CARE

With profits increasing from poultry it will pay to take good care of the producing hens this summer.

"It is poor economy to neglect the hens during the rush of summer work," says A. G. Oliver, poultry extension specialist for the North Carolina State college. "When the hens are neglected, profits are reduced. Less grain is needed under range conditions but plenty of mash should be supplied in the hoppers. Under average farm conditions where the hens have free range and production is decreasing, less of the scratch grain and more of the mash should be fed. This will force the birds to eat more mash and thereby stimulate egg production. Mash consumption must be encouraged to get high egg production. The mash is composed of whole grains finely ground and is more easily digested."

Mr. Oliver suggests that the hens be given equal parts of cracked corn, wheat and oats by weight as a scratch grain. If wheat is not available, one-third corn and two-thirds oats should be fed. For the average farm flock a mash made of equal parts of wheat bran, wheat middlings, corn meal, ground-oats and fish meal is good and this should be kept before the hens in a dry place, at all times.

Feeding is one of the most important factors in securing good from the farm flock during summer. The hens may be kept laying and molting delayed by either increasing the amount of mash fed or by increasing the protein without increasing the amount of mash. If a flock of birds can be selected which does not stop laying until October or November, the chicks from these eggs will have a marked effect on the egg production of next season's flock, states Mr. Oliver. Early molters, on the other hand, will produce early molting chicks which work short hours and eat as much as the heavy producers.

Incubator Eggs Used as Feed for Young Chicks

Infertile incubator eggs may not be a total loss when taken from the machine, according to tests of the Ohio agricultural experiment station. In fact they make a valuable addition to the ration for young chicks, market broilers and laying hens. It is found.

Before feeding infertile, dead-germ, and dead-in-shell eggs from the hatcheries, the eggs should be boiled 30 to 45 minutes and passed through a food chopper or sausage mill. The ground product is then mixed with about an equal weight of dry mash to absorb moisture. The mixture is fed daily to chicks after the first week in open troughs in amounts that will be cleaned up in 30 minutes.

For crate-feeding broilers for market, the poultry men mix 45 per cent of the cooked egg product to the dry feed mixture and add sufficient milk or water to make a feed batter just thin enough to be poured into the feed trough.

Poultry Notes

Crowding or overheating causes weak chicks.

Guinea chicks are ravenous little creatures and for the first week they eat incessantly.

What have you in the way of meat on the farm that will bring 40 to 50 cents per pound? Early broilers will do it.

Because of their insectivorous nature, guineas require a large proportion of animal food, also green food, and they must have plenty of water to drink.

Trapping is the only accurate method of determining the exact egg production of the hen. It is economical only for poultrymen doing careful, accurate pedigree work.

Many an automobile is being bought on the farm and paid for with the profits from the farm flock.

In feeding poultry the heavy grain feed should come at the evening meal. The birds should have all the grain they will clean up at this time.

Sometimes a flock is slow about laying, even when everything seems right for eggs. If yours is lazy around that way, try a wet mash once daily for a week or two. It often does the work.

A chicken incubator never feels worried when it hatches duck eggs and its offspring go in swimming.

To hatch a desirable chick, hatchling eggs should weigh between 24 and 28 ounces per dozen, and should be uniform in shape, size and color.

Beware of June hatched chicks. They never pay for their feed, and are more liable to gaps and cholera. Pen the setters up in the shade with food, water, and a vigorous young cockerel.

Guineas have a strange nature. Left to their own devices they will skirt the edges of civilized poultrydom multiplying in distant fields and hedge rows, but rarely reproducing more than their own number.

Shorts mixed with sour milk in the morning, and wheat boiled in milk at night are foods that keep the poultry growing. The range will provide what they need the rest of the time. Over-feeding is the death of poultry of all ages.

Gave Lesser Man His**Brief Hour of Triumph**

Great writers have had their moments of triumph. To a degree that sometimes caused them painful labors. In 1204 when Joseph Addison, the English poet and essayist, was undersecretary of state he was given as a matter of official business the task of writing to Hanover—that Queen Anne was dead. He found it so difficult to express himself satisfactorily that the lords of the regency were obliged to employ Southwell, at that time one of the clerks. For hours Addison had struggled in attempts to draft a suitable message, but the last one seemed as inadequate as the first, and in despair he cast it after its predecessors into the waste basket.

Southwell stated the simple fact, as he was ordered, in the ordinary language of business, and it is said he then boasted of his superiority to Addison in having readily done that which Addison attempting to do had failed.—Kansas City Times.

Dr. Peery's "Dead Shot" is powerful, but safe. One dose will expel Worms or Tapeworm; no castor oil needed. Adv.

Wise Old Owl!

When Anacharsis visited Solon he found the daddy of all legislators busy compiling his laws. Anacharsis, who was a bold and rather raucous fellow, laughed at him, to quote Plutarch, for imagining the dishonesty and covetousness of his countrymen could be restrained by written laws, which were like spiders' webs, and would catch it is true, the weak and poor, but could easily be broken by the mighty and rich. This was said about 500 years before Christ.—St. Louis Post-Dispatch.

Bell-Ans Halts Over-Acidity

This Widely Used Sure Relief Can Be Depended On Every Time.

How disagreeable, how exasperating, how embarrassing to be a sufferer from gas, belching, heartburn, sick headache, nausea and other digestive disorders. BELL-ANS for Indigestion is a harmless, pleasant Sure Relief. Tested by over 30 years' use. 25c and 75c Pkgs. at all drug stores, or send for free samples to Bell & Co., Inc., Orangeburg, N. Y.—Adv.

As Usual

Passenger—Is the train running late?

Porter—Yes, mum. I don't know of any new arrangements.—London Opinion.

Wright's Indian Vegetable Pills contain only vegetable ingredients, which act gently as a tonic laxative—most irritable. 272 Pearl St., N. Y. Adv.

Old-Fashioned

First Girl—Mary makes me sick. Second—Me, too. She tries so hard to be feminine.

When a fool is angry he opens his mouth, and shuts his eyes.

Drive him out! Drive him out!

He'll exterminate us all! He stepped in Peterman's!

RIGHT! He will exterminate them all!

Peterman's Roach Food exterminates every roach in your house.

It entices roaches from their hiding places. They carry it on their legs and bodies back to their nests. They wriggle over all the others there, over their young and their eggs.

Every one dies and disintegrates. No odor. Nothing is left but a little dry dust.

Don't try to fight roaches with a spray. No spray can possibly reach the roaches, the young and the eggs for hiding the baseboards and under the floors.

Only the right powder can do that.

Peterman's has the right insecticide for each insect. On sale wherever drugs are sold.

A censor will never think a bad odor is a delightful perfume, so there's no serious danger.

A bear is not at all fussy. At any zoo he cheerfully eats anything the children give him.

Albert Rooke Makes His Comeback

Wins six-year fight for health. Now well and strong at 60. Husky as ever, he praises Tanlac

At 1830 West 39th Place, Los Angeles, lives Albert A. Rooke, a respected citizen with 38 years of active railroad experience. He tells of a very interesting experience.

"About seven years ago," says Mr. Rooke, "my stomach and liver went back on me. It was a most distressing experience. Nothing seemed to agree with me; I lost all desire for food. A sound night's sleep was out of the question, so I rose each morning tired and peevish. Then constipation developed and made life a continuous misery. I lost weight and could hardly drag myself around a good deal of the time. After six years of that I was all in. Along came the 'flu' when I had no resistance left. That was about the last straw. Nothing seemed to help me.

"On a friend's advice I tried Tanlac, and that certainly did help. I soon began to get refreshing sleep again, to eat with old-time zest. The distressing stomach and liver troubles disappeared. Briefly, Tanlac put me on my feet, with all my old-time vigor and enjoyment of life. I put on weight and after five bottles was as well as

ever in my life. That was a year ago. I'm still in fine shape, as you see. For men of 60 as well as I am, thanks to Tanlac."

Tanlac is nature's own tonic and body builder, made from roots, herbs and barks by the famous Tanlac formula. Try a bottle—it may do for you what it did for Mr. Rooke. Your druggist has it. Over 52 million bottles sold.
