Human Speech Calls for Little Energy

Speech requires a small amount of energy, according to telephone engineers, who explain that if a million persons were to talk steadily, and the energy of their voices were to be converted into heat, they would have to talk for an hour and a half to produce sufficient heat to make a cupful of tea.

One acoustic expert has divided the English speech into 36 letter sounds, and he found that the vowels carry most of the energy. It is estimated that at the upper and lower limits of hearing it takes a million times as much energy to make sound audible as in the range of 1,000 to 5,000 cycles, where the ear is most sensitive.

On the radio the sounds "th," "r," "s" and "t" are the most difficult to hear correctly. This is attributed chiefly to their very weak energy.—Scientific American.

The First Doll's House

What may prove to be the earliest British doll's house has been discovered in an old country house in Chelmsford. It is a two storied house about five feet high, built of solid oak, and contains four large rooms, attics and a balcony on top. The legs on which the house is mounted and the paneling and the mirrors, are, it is said of definite Queen Anne design and workmanship.

Luminous House Numbers

A luminous number which can be seen from a distance at night has been put up on the town hall at Budapest, writes the correspondent of the London Observer, and the authorities are considering the advisability of putting luminous numbers on all houses in the city, and luminous plaques at the street corners on which the street names may be easily read after dark. It is claimed that Budapest is the first city to consider this method of obviating this difficulty.

Plant Parasites

In botany the term parasites is used for plants which attach themselves to another plant and nourish themselves upon its juice. This class includes many fungi. The mistletoe grows originally from seed and becomes gradually parasitical, usually fastening itself to the oak.

Man's Mistake

Many a man mistakes the courage of conviction for the confidence of conceit.
