THE FEATHERHEADS

Not Exactly the Right Time

HOOF, HORNS AND TAIL

Remove All of Them

"If every person devoted half an hour a day to study, half our lawyers would be unnecessary," declares a contemporary. Then it's up to all of us to devote one hour a day.—Falling Show.

Apparently a Sock Sale

That woman who got a black eye while trying to get close to the counter in a Milwaukee bargain sale obviously got more than she bargained for.—Farm and Fireside.

Where Swatters Are Taboo

In Ukraine, the southern Russia province, superstitious natives hold the common house fly in reverence and make no effort to kill the pest. Many persons regard the fly as a sacred animal.

Jaywalk Into Cars

Five per cent of the automobile accidents of the country are caused by persons who walk into the sides of moving machines. Like automobiles running into the sides of trains.

NEW WHIPPET CAR A MOTOR MARVEL

One of the sensations in the automobile world is the perfected "Whippet" produced by the Willys-Overland, Inc., and it is direct evidence that John N. Willys, president of the corporation, proposes to make good on his declaration that "there can be no monopoly in the light car field." The perfected car, and the price at which it is offered, placing it directly in competition with the lowest priced cars, has centered the eyes of the automobile industry and the motor car world in general on the enterprising Toledo manufacturer. It makes him the first manufacturer of automobiles to enter the price field heretofore exclusive to but one light car manufacturer.

The "Whippet," which has been in production for more than 18 months, holds the national fuel economy record of 43.28 miles to the gallon in a test between Los Angeles and New York City, covering a distance of 3,550 miles, under official observation of the A. A. A. In a speed test on Rockingham Speedway, Salem, N. H., a "Whippet" recently attained a speed of 71.6 miles an hour over a 50-mile route. This was officially timed.

The same engine that has accomplished these records is the power plant employed in the perfected "Whippet," now offered at the lowest price in the history of Willys-Overland.

The "Whippet" was the first light car to be equipped with four wheel brakes, setting a new trend in the light car field. The braking area of the "Whippet's" brakes is greater than any other light car.

Details of the perfected "Whippet" disclose a wider range of colors, employment of full crown fenders, a new cadet sun visor that imparts a smart military effect, and the addition of automatic windshield cleaner, rear view mirror, and a combination rear driving light and stop light. These additions make the "Whippet" the most fully equipped light car built in the four cylinder field.

No Expulsions

In the school of experience, if you flunk the first year, you are not disqualified from making a new matriculation, but the tuition fee is sometimes a little high.—Fort Wayne News-Sentinel.

Tomorrow Always Comes

It is frequently said that tomorrow never comes. But the man who has a note falling due tomorrow knows that tomorrow comes.—Atchison Globe.

Life's Added Problems

Life is becoming more mathematical every day. We are now urged to count our blessings before eating, our calories while eating, our change after eating and our sleep while going to sleep.—Kansas City Star.

Opportunity

Next thing for scientific breeders to do is to cross the carrier-pigeon with the parrot so that messages can be delivered verbally.—Wall Street Journal.

Various Trades Offer Occupation to Blind

Blind men are employed in many engineering factories, in one German electrical concern, says the annual report of the National Institute for the Blind, more than one hundred sightless people are employed, while double that number are being trained.

Blindness, it is said, is no hindrance to a man looking after two or even three automatic machines. The average earning capacity of a blind operative in these works is considered to be about 80 per cent of that of a normal-sighted man.

Ninety blind persons employed in French engineering trades earn about 85 per cent of full wages. A motor factory in America employs 44 blind men, who are given the work for which they seem most competent.

Nature's Economy

Inventions during the next two or three centuries will, in the opinion of many experts, probably be in the direction of imitations of the wonderful economy and the simple, direct methods of nature. Take the electric eel as an example. Its electric organ is in no sense a storage battery, but a contrivance by which electric energy is liberated at the moment when it is required. At rest, the organ shows so small an electromotive force that a good galvanometer is required to detect it, but a sudden nervous impulse from the eel's spinal cord raises a potential of many volts, with very little heat, and so small an expenditure of matter as to defy the most expert chemist to weigh it. Fireflies, glow-worms and many deep sea fishes produce light without heat, at a cost which would make the price of a wax candle an extravagant outlay.

Feet and Talking

It's the fellow who can't talk on his feet who puts his foot in his mouth when he tries.—San Francisco Chronicle.

Making Genuine Diamonds

The mystery of the formation of diamonds has led scientists to experiment in making them. Lamp black was mixed into molten iron, which was dissolved in acid when cooled. Tiny diamonds thus were made.

Ape With Curiosity

A chimpanzee, a pet of a Berlin postman, amuses itself by turning in fire alarms and sitting by and watching the fire engine come.—Philadelphia Inquirer.

Grandfathers on Vacation

Fifteen grandfathers, whose ages totaled 1,200 years, recently enjoyed their annual two-weeks' vacation together at Littlehampton, England. They are members of the Browning Hall Grandfathers' club of London. The oldest in the party was eighty-four and the youngest seventy.

Correct the Fault

Whatever you dislike in another person take care to correct in yourself.

Migratory Bird Treaty

A resident of Ohio, who had previously raised wild fowl under a federal permit, but failed to submit the required report of operations and continued to make sales and shipments without renewal of the permit, was arraigned in Federal court at Toledo, Ohio, found guilty, and fined \$300 and costs.

To engage in the business of rearing and selling migratory waterfowl, says the bureau of biological survey, United States Department of Agriculture, it is first necessary to obtain a permit from the secretary of agriculture and then to comply with all requirements of state law.

These requirements are made under the migratory bird treaty act regulations to protect and perpetuate migratory species of birds passing each year between the United States and Canada.

Lets the World Go By

For the seventy-fourth consecutive season, Mrs. Richard T. Auchmuty of New York has arrived at her summer home, the Dormers, on the Lenox-Pittsfield road. She has never owned an automobile, has no listed telephone, no electric lights, no steam heat in her villa, nor a radio. She prefers to drive over the wooded roads in an open victoria. Glowing fagots in her fireplace and kerosene lamps furnish heat and light. She is in her ninetyeth year.—Boston Globe.

Not That Sick

Girl—I want a nice book for an invalid. Librarian—Something religious? Girl—No, not now. He's convalescent.

Cure for Optimism

The neurologist says optimists live longer than pessimists. They might if they didn't have such sublime faith in loose brakes.—San Francisco Chronicle.

Oldest Clock

The oldest clock in the world, wrought in 1439 A. D. by an unknown artisan at the court of Philip the Good of Burgundy, and valued at \$2,000,000, has been brought to the United States for a museum exhibition.

Australia's Busy Station

At Central railway station, Sydney, Australia, more than 1,000 trains arrive and depart every 25 hours; approximately 250,000 people pass through it every day.

Hen Lays Twin Eggs

A hen in Ulster lays two eggs at a time, sometimes three. The owner explains this by saying that the hen, a last year's pullet, had sunstroke when a month old. Since it has grown up the hen has on four days a week laid two eggs at a time, and has twice laid three.

Apotheosis of the Pancake

Sign in restaurant window—"Waffles of Class and Distinction."—Boston Transcript.

Canadian Lakes Beautiful

Among the seven reservations set aside by the government of Canada in the Rocky mountains there is none more beautiful than Waterton Lakes National park, which lies on the eastern slope of the Rockies where these mountains approach the international boundary. The park forms a rough square with a long L-shaped section added to the east, the whole having an area of about 230 square miles.

Newest American Sport

Critic-baiting has become an even "ruder" and more typical American sport than framing prize fights or fixing horse races and championship baseball games. The man who practices professional criticism in this year of our Lord lives constantly in a metaphorical gashouse district, his head and seat in imminent prospect of bash and boot.—George Jess Nathan in Vanity Fair.

Profit by Past Errors

The past is gone, and gone forever. You may learn by your mistakes, but do not be guilty of the sin of constantly worrying over them. Turn your face toward the future. Give your mistakes and blunders a decent burial in the past, and let the memory of them furnish you with implements of industry by which you may operate the gold mine of future possibilities.—Exchange.

Fowls in Biblical Times

Partridges are noted in the Old Testament. The fatted fowl (1 Kings, 4:23) is interpreted as either goose or duck. Cocks and hens were brought from Persia two or three centuries before Christ. A tomb at Marissa of about 200 B. C. has a good representation of a crowing cock. Sparrows and other "twittering birds" were also used for food.

It doesn't pay to advertise unless you are able to deliver the goods.

Quality Shown in Outward Beauty—Whippet introduced the vogue in light car design for smart, compact bodies with low, fleet lines.

THE WHIPPET NOW READY FOR IMMEDIATE DELIVERY

WILLYS-OVERLAND, INC.
TOLEDO, OHIO

John N. Willys
President, The Willys-Overland Company

Big 4-wheel Brakes—more braking surface per pound of car weight than any other light car. You can stop from 40 miles an hour within 51 feet.

Rear Gasoline Tank—for utmost safety—with vacuum fuel feed. This costs more to build, but is much safer.

Increased Speed—Whippet superiority is also expressed in greater—and safer—speed; 55 to 60 miles per hour, and many owners say 65.

Greater Gasoline Economy—Whippet holds the A. A. A. Coast-to-Coast economy record of 43.28 miles per gallon.

Other Important Features—164 inches of springs, full force feed lubrication, faster acceleration, silent timing chain, longer leg room, adjustable steering wheel, lower center of gravity, single plate clutch, longer connecting rods, banjo-type rear axle housing with removable shaft, are among the many quality car features of the Whippet.

a devil? Jim—"He's always hoofing it after the girls, horns in whenever he can, and always bears a tale."

Wide Open He—I've come to this town to make an honest living. Him—Well, there's not much competition.

Making It Parson—"We're goin' to take up a collection for a new organ dis mawin'."

Brudder Jones done gib only one dollar. Dere ought to be some enterprisin' man in dis congregation who will make it a hundred.

Voice—Ah makes it a hundred. Put me down for two noughts.

A Minor Barrier "Do I understand," said the frate parent, "that there is some idiotic affair between you and that impecunious young Deedbroke?" "Not very much, papa," replied his daughter sweetly, "only you."

Tom—"Why is he considered such
