

Beaverton Review

Issued Every Friday at Beaverton, Oregon, -By- THE REVIEW PUBLISHING CO.

Juliette Carter ... Society Editor J. H. Hulett ... Business Manager

Entered as second class matter December 9, 1922, at the postoffice at Beaverton, Oregon, under the Act of March 3, 1879.

FRIDAY, SEPT. 21, 1928.

Governor Young is exercising on a stationary bicycle to reduce his waistline. Evidently seeking that bicycle grace

The permanent wave may be a great thing for the women, but if some one would invent a permanent neck shave it would help a lot more.

Fred Gumm of West Union, Ia., was excused from jury duty because one of his hogs had chewed his ear. Evidently the hog liked chewing Gumm.

Strangest case on record: A man in Los Angeles charges his wife with cruelty because she has made it impossible for him to see his mother-in-law daily.

Jack Dempsey is said to be going on the stage, but recently he has hinted that he may re-enter the ring. To be one of the stars or to see them—that is the question!

Freddie Riggs of Seattle, four years old, is a constant user of tobacco. To judge from the statements made recently in advertisements, we can safely predict that Freddie, who has started training early, will have a brilliant career in the opera!

France's official executioner is disappointed because so many death sentences are commuted that he has a hard time making a living. Somehow we just can't sympathize with him.

The reason why the story ended queerly is because the editor chopped off four paragraphs to make it fit.

A NEW COLUMBUS

The reader may often have wished that he might have lived in that year 1492, when Columbus crossed the watery wastes and discovered new continent.

But to live in the year of our Lord 1928 and to pick up the morning paper and see that Lindbergh had completed a trip of 9,000 miles thru out the South American republic and back to St. Louis, or that he has successfully crossed the Atlantic Ocean and landed in Paris is really to live in the age of a new Columbus.

He has done what has never been done before. His stock in trade was mercy, a skilled hand and a clear brain. There was no great capital behind him, no organization that prompted him, he just did it himself.

And as far as I have been able to see, I have found no line in any paper anywhere criticizing or condemning him. With one voice the people of all countries have united in exalting Lindbergh. And with all he has carried off victory so much which ought to characterize a great man.

Nobody voted for him and he was not elected to anything, but ranks along with Abraham Lincoln and General Grant as one who does things does them with simplicity and punctuality.

Along with millions of other Americans I am glad to shy my hat into the ring and to hurrah for Lindbergh! If I were to have another son I think I would call him Lindbergh, for there is no man whose example I would want him to imitate more than Lindbergh's, an example of adventurous youth combined with those sterling qualities of simplicity and modesty ought to characterize a great man. After all he does not seem to want anything. He does not ask for our money or our votes. He only wants a chance to go to work at that work which he understands best, which is flying. I hope he will stick to this and show us an example of a man who takes delight in doing that which he can do.

The best substitutes for green feeds for poultry are alfalfa and clover hay, writes H. A. Smith, forage crop specialist at the Oregon Experiment station in a new bulletin "Green Feed and Pasture for Poultry." Kale is given as the best winter green feed where it can be produced. A continuous supply of green feed, considered essential by some poultrymen, may be supplied by an intensive system of cropping which is described in the bulletin.

Carbon tetrachloride has been found successful in treatment of sheep and goats infested with liver-fluke, a serious handicap to the industry in many parts of Oregon. Where breeders suspect their flocks are infested a small number are first treated and the effect observed. A definite diagnosis is usually advisable as numerous small stomach worms and similar parasites produce symptoms hard to distinguish from those caused by the liver flukes.

This Week

By Arthur Brisbane

CONTROL OF POWER SOURCES. FRANK B. WILLIS. WAR AGAINST RATS. AMERICAN FLYING.

Canada's Government encourages use of electric power, particularly on farms and in small communities. Water power is developed fully to generate the current, and all are assisted in its installation. Farmers are taught to grind feed with it, pump water and do their other work. And, by the way, United States farmers are urged to settle in Canada.

Our attention here is concentrated on a different problem. We want to make sure that the right people get possession of our power sources, the right people being those that control power and peddle it to the people. As to farmers and others that buy and use power, our Government has not found time to think about them.

Prophecy is usually dangerous, particularly dangerous for farmers when government prophecies go wrong. The Government forecast on potatoes last fall predicted a crop greater than the real one. Many farmers sold in a hurry at low prices, some were not marketed, many fed to stock. Then the shortage was seen, price went up, a few wise people made the money, NOT the farmers.

The sudden death of Senator Willis, in his battle for Ohio's Presidential delegates, ended tragically one phase of the 1928 campaign. Senator Willis would have preferred to die fighting. Those that know Secretary Hoover know that Senator Willis' death will cause him sincere grief.

A powerful man never sparing himself, Senator Willis forgot that there are limits to the heart's endurance. A tired heart often succumbs in the most powerful man, wearied by constant strain.

The dead man's widow attributed the Senator's attack to the fumes of smoky flares that he had been inhaling constantly, in the course of a political parade.

A weak heart, fighting against poisoned air, is in danger.

The League of Nations proposes international war against rats, their complete extermination.

Such a war, made to include mosquitoes and flies, would be the best war in history. It would save every year in lives and money as much as the big war cost in any year.

No more rats, no more tubercle plague. No more mosquitoes, no more yellow fever or malaria. No more tse-tse flies, no more sleeping sickness. No more house flies, no more filth dragged over food of young children.

It would be interfering with Nature's plans, perhaps. Darwin says a pair of tropical flies and their maggot offspring can dispose of a lion's carcass in a few hours. Kill all the lions and the flies would not be needed to dispose of the carrion.

George Haldeman and Eddie Stinson, American, broke the world's endurance record in the air, flying without stopping fifty-three and one-half hours.

The French Government offers a million francs to any French flier that will win back some flying records formerly held by French fliers.

A little encouragement from our Government would make it impossible for any nation to compete with American flying. The first flying machine was made here. Lindbergh was born here. We have the money and engineers. This ought to be the flying nation.

This comes from Italy: "Major de Bernardi has established a new world's air record, 3184 miles an hour."

Will solemn naval gentlemen that call flying machines "only an auxiliary" be good enough to tell what chance slow-moving ships on the surface would have against a flock of airplanes with that speed?

On the great mountain called Nashan, in Manchuria, far up where air is pure and clear, Japan, as a monument to the new Emperor, will build the greatest astronomical observatory in Asia.

That observatory, with a sixty-inch reflector and thirty-inch refracting telescope, will be a much nobler monument than any rearing horse of bronze.

NOTICE TO CREDITORS

In the County Court of the State of Oregon for Washington County, Isthe Matter of the Estate of Melven S. Barnes, deceased.

Notice is hereby given, that the undersigned has been duly confirmed by the above entitled court, as Executor of the last will and Testament of said deceased, and has duly qualified as such.

Now therefore, all persons having claims against said Estate are hereby required to present the same, together with proper vouchers therefor, to the undersigned at the law offices of Hare, McAlear & Peters, in the Shute Savings Bank Building in Hillsboro, Oregon, within six months from date hereof.

Dated this day of September, 1928.

Hare, McAlear & Peters, Attorneys for Executor. Doy Gray, Executor of said estate. c-43-47

In Confidence

Readers desiring a personal reply can address Miss Flo, in care of this newspaper.

Dear Miss Flo, I have gone out with a boy for six months. He is nineteen years old and I am only seventeen. I love him dearly and he tells me he loves me. Recently he met another girl and he quit coming to see me as often as before. He says he still loves me. Please tell me how I can gain his friendship again, for I am worried all the time about him. The girl he goes with doesn't seem to care anything about him. BLUE EYES.

Dear Blue Eyes:—Just try to forget the other girl and increase your friend's affection by being as sweet to him as you can be and displaying all your good qualities to him.

If the other girl does not care about him, he will in time come back to you completely. He has possibly just a temporary interest in the other girl, and by being as sweet and interesting as you can be, you may be able to prevent him from becoming too interested in her. But do not show him that you care about his seeing the other girl. In my opinion that would be unwise. It would only flatter his self-esteem and do no good. If you were engaged to him you might insist that he does not see the other girl, but as you are not engaged to him—at least your letter does not say you are—you have only to wait and see what happens. Perhaps it will turn out for the best.

A Future Farm Leader

Adam Duncan Dunn, Jr., of Wapato, Washington, and his Shorthorn bull calf, "King of Supremacy."

As long as the influences of the 4-H Clubs remain, America will never lack an adequate supply of capable managers for its farms. Adam Duncan Dunn, Jr., is an excellent example of the type of young farmer the organization is developing. Adam is a former 4-H Club member. He is the son of the late Adam Duncan Dunn, one of the original founders and Trustee-Director of the Pacific International Livestock Exposition.

Camp Plummer, the official annual meeting place of 4-H Clubs in this territory, is one of the most outstanding developments of the Pacific International, the 18th Annual of which will be held at Portland, Oregon, November 2-10, inclusive.

The Fat Stock and Breeding sections of the Exposition promise

this year, to be the best of its many successful events. Shorthorns, Herefords, and Aberdeen-Angus exhibits will compete for the prized ribbons and a share in the Premiums totaling \$100,000.00. Fifteen breeds of Sheep, Angora and milk Goats, and five breeds of Hogs will be exhibited. In the Wool and Mohair Show there is to be a splendid showing of sheep and goat fleeces as well as wool products of various kinds.

For spectacular entertainment there will be the 10th Annual Horse Show for which approximately \$35,000.00 in prize money is offered. Programs—7 evenings and 3 afternoons—feature stirring high and broad jumps, sterling performances by Harness Horses and three- and five-gaited American saddle horses as well as exciting six-hand draft team driving contests. During each performance parades of prize-winning Livestock will be staged and demonstrations given by famous sheep dogs.

In addition to the foregoing, Pacific International will combine, in its educational presentations, Dairy Livestock Exhibits; Dairy Land and Manufacturers' Products Shows; Northwest Hay and Grain Shows; Industrial Exposition; Fox Show; Boys' and Girls' Club Work Exhibits, and great "Truth in Meats" demonstration.

All transportation lines offer reduced fares to the Exposition.

900 tons of hay were sold at Ontario at \$10 a ton.

The People's West Coast Hydro-Electric Corporation are making extensive improvements and extensions to their light and power plants at Toledo.

A new fire truck has been added to the Sutherland fire department.

A modern feed mill will be constructed by the Scio Mill & Elevator Co. to replace the one burned down recently.

Scoring the Year's Greatest Success

—because of Distinctive Beauty Thrilling Performance and Amazing Economy

Week after week and month after month the Bigger and Better Chevrolet has swept on to greater and greater heights of popularity—until today it stands acknowledged everywhere as first choice of the nation for 1928! Never has any Chevrolet enjoyed such overwhelming public acceptance—for never has any low-priced car provided such an outstanding combination of distinctive beauty, thrilling performance and amazing economy! Its beautiful bodies by Fisher—long, low and racy, and finished in colors that reveal to-day's mode for smartness and individuality—are far in advance of accepted standards in the field of low-priced cars. Inside and out they prove anew that Fisher craftsmanship is a thing apart. But Chevrolet performance is no less impressive than Chevrolet beauty and style. Never before was a low-priced car so easy to handle—for the steering mechanism is fitted with ball bearings throughout... the clutch and gear-shift lever respond to the slightest touch... and big non-locking 4-wheel brakes give a measure of braking control that is more than equal to every occasion. Come in and see the car that has won the approval of more than three-quarters of a million buyers since January 1st. Learn for yourself why it is scoring the greatest success of this great automotive year!
