NOT A DIRTY PIG

One of the long-standing beliefs
is that the hog is a dirty creature
by instinct as well as by training.
In fact, the expression, "dirty as
a pig" has come to be accepted
as the only proper way to describe
the uncleanly.
But it appears from results gained
by farmers who have given their
pigs a chance to be clean that the
animal is more to be pitied than
blamed. These farmers report that
they have found the pig to be
as cleanly as any other farm
animal. The trouble is he is seldom
given a chance to prove it.
Given clean pasture land to feed
on, a chance to get regular baths,
and clean bedding, the pig will be
clean, they say. Furthermore, he
will be healthier and will grow
faster.
A notable accomplishment of pas-
senger service in 1928 was the unit-
ing of rail, highway and air trans-
portation.
Good, pure milk promotes health
especially at this time of year.
Drink lots of it. Beaverton Sun-

FIGURES WITH A PUNCH

Statistics ordinarily are dry read-
ing, but not always. An elementary
geography published this year con-
tains some tables and charts that
are anything but dry reading. The
information, intended primarily for
youthful students, furnished by these
tables and charts has more than a
spark of interest for adults.
These statistics, for instance,
show that although the United
States has but one-sixteenth of the
world's population, one-fourth of
the world's sugar is used in this
country. Furthermore, the United
States has five-eighths of the
world's telephones, three-eighths of
its railroads and four-fifths of its
automobiles. It uses three-fourths
of all the rubber and four-fifths
of all the petroleum used each year.
Each farm worker in the United
States produces twelve tons of
cereals although the average cereal
production for each farm worker
in the rest of the world is only
one and two-fifths tons. Each A-
merican farm worker, on the aver-
age, is feeding nine people besides
more people in some foreign land.
Some countries produce more crops
per acre than we do, but none pro-
duces so much for each farm work-
er.
