HOME POINTERS

Gas-stove burners may be cleaned by boiling them in a strong solution of washing soda and water for half an hour, then washing in warm water and drying thoroughly. This removes all the grease.

Wood alcohol rubbed on windows with a sponge will keep them free from ice.

If candle holders are not procurable, the top of a cake may be decorated with marshmallows with a candle stuck in each one.

When drying curtains, if it is too much trouble to put up the stretcher, they may be hung on the regular rod at the window, running a heavier rod through the bottom and pulling the material straight. The curtains will be dry in half an hour without the disfiguring holes marks the stretcher makes.

An oil mop may be cleaned by dipping in soap suds to which has been added a little household ammonia. Rinsing in warm water completes the process.

A small bottle of ammonia is useful on a desk. One dip makes the pen as bright as new. This is especially helpful to those who use various colors of ink.

Woolen materials can often be darned with threads of the material, split silk, or hair so that the garment may again be presentable.
