FRIDAY, MARCH 8, 1929

Some men are too intellectual to be intelligent.

Truth may be eclipsed, but it can not be extinguished.

Sparks of genius have nothing in common with lovmaking.

A guest may be as glad to go as the host is to have him go.

Few things are as expensive as those we try to get for nothing.

Love may be blind, but it usually manages to find an eye opener.

Coal may be high, but after it is once in the bin it soon gets lower.

If a husband foots his wife's bills she should at least foot his hosiery.

Round after round is the way the pugilist ascends the ladder of fame.

How a girl hates to have all her gir friends admire the man she admires!

Some people would have to work overtime if they practice what they preach.

A woman wouldn't care to be an invalid if she couldn't talk of her ailments.

It is better to follow one good example than it is to set a dozen bad ones.

Two is company until they become one, then it seems more like a crowd.

An old bachelor says that women are given to small talk in large quantities.

Astronomers report Mars probably too cold for life, even too cold for Coolidge.

It is not difficult for a young man to earn a good living if he has a rich dad.

After a man gets married he has less to say about what he can or can not afford.

Many a man walks the floor at night because his wife doesn't believe in paregoric.

A man may have a grip on his pocket book and yet have no intention of traveling.

There is more true philosophy in an inch of laughter than there is in a yard of sarcasm.

When a village youth makes a flying trip to the city he usually has a bird of a time.

A camouflaged still was raided in New Jersey. It was making stuff camouflaged as whisky.

It doesn't matter what planet a man is born under as long as he is able to keep on the earth.

The Kalamazoo gent who shot his son-in-law for a rabbit may have known the boy pretty well at that.

It sometimes happens that a man is kept from buying mining stock because he hasn't got the ready cash.

It is well to make a good beginning—and it is also well to remember that the end is what determines everything.

Girls at William and Mary College can not have dates unless they are over 80. In their studies, of course. Girls over 80 get few dates.

There is probably nothing in the world that gives a man that tired feeling quicker than to have another man say, "Why don't you do as I do?"

The 'Fiddler Crab' is so called because the male has one brightly colored claw of immense size, which, when he runs, he waves as if he were playing a tune on a violin.

MUZZLES—ON MEN WHO KNOW. Mitchell—Magruder—Summerall. Remember those three names. They represent a great truth concerning our National Defense. In the air—on the sea—and on land.

We have just witnessed the final chapter in the public disciplining and humiliation of one of the above trio for telling the people what he thought was the matter with his department.

HOME POINTERS

Narrow French heel hose are indicated for popularity in the coming season, rather than the square and pointed types.

Tailored suits will be worn this spring, either finger tip length or slightly longer.

Silks will be used to a great extent this season in prints and in all designs and colors. The new colors in browns are red fox and dusky rose, especially used with the popular sun tan complexion; in reds, argentine, a bright scarlet, and signal, a dark red.

Black, white and navy will be the standard colors for summer wear. When combining colors, the contrast is used rather than the blending of color.

Red hats of many shades are of great interest this season, shown in felts and worn with black, grey or red fabric coats.

The coast buyers are predicting pearls for the spring vogue, including colored and smoky types. Blues are thought to be the leading color in jewelry.

Taffeta is arousing interest for coats as well as alpaca, broadcloth, tweed and flat crepes, which are also featured. The new featured. The new feature in collars is the fur placed at the back with fabric front edges continuing into ties.

FARM REMINDERS

The practice of removing diseased bee colonies to a "hospital" yard for treatment has many good points, according to the Oregon experiment station, but often the hospital yard becomes a graveyard due to neglect. Such yards are best located close at hand so that they are not too close to other beekeeper's colonies.

Give these energetic seeds a chance in your garden

ENERGETIC seeds take no more digging, or raking, or caring for in a garden, than seeds that are not so full of the spirit to live. But think of the difference at harvest time! The energetic seeds withstand disease better—grow better and stronger—produce more vigorously and more abundantly.

The Ferry's Seeds that you can buy today at the "store around the corner" are surprisingly energetic. What is more, they are fresh. What is most important, they are purebred! These Ferry's Seeds came from plants that measured up to the Ferry standard in size, color, flavor, productivity—plants that have handed their inheritance on.

They are pedigreed seeds!—in the strict sense you mean when you say a race-horse is pedigreed. Their parents, grandparents, great grandparents—all were of fine true stock, without an inferior strain.

Doesn't this mean something to your garden? Send for the Ferry's Seed Annual to plan what you want. Remember that Ferry makes thousands of tests a year to determine the truthness of every seed you now can spill into your hand from a bright Ferry packet. Garden facts in the Annual make it far more than a catalog. Address D. M. Ferry & Co., Dept. H, 500 Paul Ave., San Francisco, Calif.

Give your garden its best possible start with Ferry's purebred Seeds.
