Did You Ever Stop to Think

That the man to whom your letter is going, may be a splendid judge of what is good and correct in printing.

If your printed matter is poorly gotten up with obsolete type faces printed with a slur, the ink unsuitable, and the stock inferior, the impression created may offset the effect of an otherwise good letter.

Printing is the smallest item of expense entering into your business and the difference of good priting and poor printing is so small that it is the poorest sort of economy to use any but the best.

The best does not mean the most expensive—but the best suited to your business printing in which good type selection and harmony is used, good press work and the artists touch that lifts it from the noticeably common to the pleasingly good.

Let us call and talk over your printing needs with you. Printing is our business, and it is our business to know it.
