

SAME PRESCRIPTION HE WROTE IN 1892

When Dr. Caldwell started to practice medicine, back in 1875, the needs for a laxative were not as great as today. People lived normal lives, ate plain, wholesome food, and got plenty of fresh air. But even that early there were drastic physical and mental conditions of constipation which Dr. Caldwell did not believe were good for human beings. The prescription for constipation that he used early in his practice, and which he put in drug stores in 1892 under the name of Dr. Caldwell's Syrup Pepsin, is a liquid vegetable remedy, intended for women, children and elderly people, and they need just such a mild, safe bowel stimulant.

This prescription has proven its worth and is now the largest selling liquid laxative. It has won the confidence of people who need it to get relief from headaches, biliousness, flatulency, indigestion, loss of appetite and sleep, bad breath, dyspepsia, colds, fevers. At your druggist, or write "Syrup Pepsin," Dept. BB, Monticello, Illinois, for free trial bottle.

PARKER'S HAIR BALM
Removes Dandruff, Itches, Itching, Redness, and Faded Hair.
Restores Color and Beauty to Gray and Faded Hair.
Solely Made in U.S.A. by Parker Bros., New York.

FLORESTON SHAMPOO—Ideal for use in connection with Parker's Hair Balm. Makes the hair soft and fluffy. 50 cents per bottle or six bottles. Hanco Chemical Works, Patagonia, N. Y.

For Poisoned Wounds as Rusty Nail Wounds, Ivy Poisoning, etc.
HANFORD'S BALM OF MYRRH
Money back for best bottle if not satisfied. All dealers.

Early Use of Paper
Europe made paper in the Eleventh century, England in the Fourteenth century. The first paper made in the United States was by David Rittenhouse in 1800. The mill still stands in Fairmount park, Philadelphia.

Fact Puzzles Scientists
The greatest finds of fossil ivory have been made in islands to the north of Siberia, and it has long been a puzzle to men of science to understand how such herds of monstrous creatures could have found a living so near the North pole.

When damp days, sudden changes in weather, or exposure to a draft makes joints ache, there is always quick relief in Bayer Aspirin. It makes short work of headaches or any little pain. Just as effective in the more serious suffering from neuralgia, neuritis, rheumatism or lumbago. No ache or pain is ever too deep-seated for Bayer Aspirin to relieve, and it does not affect the heart. All druggists, with proven directions for various uses which many people have found invaluable in the relief of pain.

ASPIRIN
Aspirin is the trade mark of Bayer Manufacturers of Monocrotaldehyde Salicylic Acid.

Mine Refrigeration
Artificial refrigeration, which is bringing greater comfort to thousands of persons in homes and public buildings each year, is to be extended for the benefit of the workers in deep mines. It was announced recently, says Popular Mechanics Magazine.

FLASH THE LEAD DOG

By GEORGE MARSH

Copyright by The Pean Publishing Company
WNU Service

SYNOPSIS

Up the wild waters of the unknown Yellow-Leg, on a winter's hunt, journey Brock McCain and Gaspard Lacroix, his French-Cree comrade, with Flash, Brock's puppy and their dog team. Brock's father had warned him of the danger of his trip. After several battles with the stormy waters they arrive at a fork in the Yellow-Leg. Brock is severely injured in making a portage and Flash leads Gaspard to the unconscious youth. The trappers race desperately to reach their destination before winter sets in. Flash engages in a desperate fight with a wolf and kills him. Gaspard tells Brock of his determination to find out who killed his father. Tracks are discovered and the two boys separate for scouting purposes. Brock is jumped by two Indians and a white man and knocked unconscious. He is held prisoner. Gaspard rescues him while his captors sleep. Gaspard believes these men killed his father and is prevented from killing them by Brock. While out alone Gaspard is shot from ambush by an Indian and killed. Brock is alone. While out on his trap lines Brock is caught in a heavy snow storm. He is lost and his food given out. His hope is raised when he discovers a moose trail.

CHAPTER VIII—Continued

For an instant, he paused, in doubt. He would rest his gun against a tree—if he could—had time. But suppose Flash lunged at him? It might be safer to lash him here. No, he did not dare. His hand shook like a leaf—he would only wound the moose—would need Flash.

So, weak with famine and excitement, Brock went on—on into the thick timber, nerves strung like bow-strings, straining uncertain eyes for the vision of a huge shape in the snow. Then, dilating his nostrils in deep sniffs of the air, Flash suddenly went mad.

Falling on the trembling husky, Brock seized his nose. "Shut up, Flash!" he gasped in desperation. "Steady, boy! Shut up!"

But the starved dog trembled where he crouched, wild to charge the beast whose scent was strong in his nostrils. With stiff fingers, Brock knotted the leash to a sapling, and left his dog, to make the stalk.

He had moved by a few yards when suddenly he saw a patch of black dimly between the dark green of two young spruce trees. Life hung on the pitiful hands which raised his rifle to his shoulder. His eyes blurred as the head wavered past the open rear sight. Again he looked for his target. The black patch was gone.

With a groan the boy recoiled, his fevered eyes peering desperately into the timber already blue with shadow. Then, to his flank, he saw a shape floundering in snow to his shoulders. It was the last chance!

Crouching, with elbow on knee, Brock fired. As the rifle shattered the silence, a great gray and white shape, sinking to the shoulders at every leap, plunged past.

"Flash!" With all the strength he could command, Brock ran. He had missed—hardly seen his sights! "One more shot—only one shot!" he sobbed, as he shuffled after the dog, who had snapped his leash.

Brock reached the trail of the moose where the dog had joined it. Not a drop of blood on the snow! He had missed.

Ahead, Flash yelped, hard in pursuit of the fleeing beast. But the long legs of the moose would outdistance the dog in the deep snow. It was all over! They had lost! It was—the end!

Panting in his weakness, Brock stumbled forward over the broken trail left by moose and dog. Then, of a sudden, the yelps of the husky changed to roars of rage.

Flash had caught him! Clutching his rifle the boy kept on, hoping, still hoping for one last shot. He broke through the thicket to gasp in amazement. Hearing in the snow, a young bull, his horns still in the spike, lashed with his great forefeet at the dog who leaped around him. Hair stiff, eyes bloodshot, his breath escaping from dilated nostrils like the exhaust of an engine, with his sharp hoofs the bull flayed the air as the dog lunged in and out. And then, as the desperate beast tried to rise on his hind legs and fell back helpless, Brock saw.

"Hamstrung! Flash, boy, you've saved us with your teeth!"

Mercifully Brock ended the fight with a bullet through the beast's brain. As the animal fell, blackness

Song Popular Among Rovers of Caribbean

The sea-song of the pirates with its weird refrain of "Fifteen men on the dead man's chest" which Robert Louis Stevenson introduces into his famous book "Treasure Island" is in part at least authentic and was sung by the pirates and buccanniers who roved the Caribbean sea in the late Seventeenth and early Eighteenth centuries. Dead Man's Chest was an island of the Virgin group, which has been christened "Dead Chest Island," thereby losing much of its piratical flavor. To this island the pirates used to repair, to green their ships, stretch their legs, drink rum, sing their buccannier songs and make merry after their own fashion. Curiously enough there is a little church on the "Chillien coast" which is obviously built of ship's timbers. Recently a traveler of an inquiring mind, reasoning that if the church were built of ship's timbers, the bell would also come from a ship, determined to investigate. A climb among the rafters did not reveal the

name of the ship, as he had hoped, but around the edge of the bell were inscribed the words: "Fifteen men on the dead man's chest." All that the clergyman knew was that the church bell came from a ship that was wrecked in 1722, which was just the time when the West Indies were getting hot for pirates, and many were being driven into the Pacific.

Earliest Submarines

The first submarine boat listed was invented by David Bushnell, an American, in 1775. It had room for one man. But many authorities date the submarine from the design of Holland, submitted to the United States navy in 1887.

Method

"A man always wants a boy to go fishing with him."

"You mean he wants the boy to dig the bait?"—Louisville Courier-Journal

closed on the vision of the exhausted boy, and he fainted.

The starving husky, mad with the taste of blood, tore savagely at the throat of the moose, then at the sight of the crumpled figure of Brock, ran to him with a whim. Slowly the biting air revived the youth whose desperate exertion had sapped the last ounce of his stamina. He got to his feet while the dog went back to his red meat.

"My old Flash pup!" said Brock, caressing the husky. "Hamstrung him you did, old pal! Bless your bones!"

But the dusk was close and there was no time to lose. Leading the reluctant dog from his quarry, Brock, delirious with joy at his luck, went back for the sled. And there, in the swamp, within easy reach of the meat which would thicken his blood and give him back his strength while he rested, he built a fire and made camp.

But Brock was wise, and sitting by his fire with the gorged Flash, drank, at intervals, a small cup only of the broth from the simmering pot of moose broth. Full well he knew the danger of filling a starved and weakened stomach, and that night—craving it though he did—he touched no meat.

"We'll see home, now—Hungry House and the family. And old Gaspard, what'll he think has become of us, Flash?"

Jellied Veal in Individual Molds.

JELLIED VEAL SALAD FINE FOR LUNCHEON

Jellied Veal in Individual Molds.

(Prepared by the United States Department of Agriculture.)

For a hot weather luncheon a jellied meat salad is exceptionally attractive—cool and appetizing in appearance, substantial enough for the main course of the meal. Veal is excellent for the purpose because the stock made from cooking the meat and bones contains a great deal of "jellying" material and a relatively small amount of additional gelatin is needed. In very hot weather it may be necessary to increase the gelatin somewhat or decrease the amount of liquid to insure a firmly molded jelly. Mayonnaise or boiled salad dressing may be served with the jellied meat.

Have the butcher crack the bones in the veal knuckle. Wash it well and cover with the two quarts of cold water. Heat slowly to the boiling point and then simmer, covered, until the meat is tender. Drain and measure the liquid. There should be about one quart. Remove the meat from the bones, discard all gristle, and put the meat through a grinder. Soften the gelatin in the two table-spoonsful of cold water and then add to the hot stock. Chill this liquid and when partially set add the meat and seasonings and stir until well mixed. Season to taste with salt, pepper and tabasco sauce. Pour into individual molds or one large ring mold, and let stand in the refrigerator for several hours or overnight, until set. Serve on lettuce with salad dressing. Thin slices of cucumber and tomato make an attractive garnish.

The bureau of home economics gives the following directions for making jellied veal for salad:

2 pounds knuckle of veal
2 quarts cold water
1 tbs. gelatin
1 tbs. cold water
1/2 cup finely cut celery
Salt and pepper to taste

1 tbs. finely chopped parsley
1 tbs. finely chopped pimento
1 tbs. lemon juice
1/2 tsp. celery seed
2 tsp. onion juice
Dash of tabasco sauce

WASHABLE DRESS IS EASILY MADE Suitable for Street or Office Wear for Women.

(Prepared by the United States Department of Agriculture.)

An inexpensive plain rose-colored cotton fabric was used for this simple tailored wash dress. It was planned and made by the bureau of home economics in connection with a series of easily made cotton wash dresses for women. The front is in two sections, sewed together at the low waistline, under the belt. The one-piece back is plain. The normal shoulder line has been used, and long set-in sleeves, finished with a turn-back cuff matching the design stitched on the front of the dress. Pin tucks form this design and meet the stitched flat plaits of the skirt at the beltline. These pin tucks are made on a suitable length of the

These studies show that both raw and pasteurized milk stored for 24, 48, 72 and 96 hours have only a small increase in bacteria when stored at 45 degrees Fahrenheit, whereas at 60 degrees Fahrenheit the increase is very large. The first great jump in bacterial growth takes place between 45 and 50 degrees Fahrenheit. The relation of time to temperature is also important. If milk is held for a short period—24 hours or less—a temperature not exceeding 50 degrees Fahrenheit appears to give satisfactory results. If milk is held for a longer time, then a temperature not to exceed 40 degrees is of real value.

Under no circumstances should milk be placed in a refrigerator in an open pitcher, bottle, or other uncovered container. It should be tightly stoppered and not be opened until immediately before use. If only a portion of the bottle of milk is used, the cap should be replaced. Milk should always be kept in the coldest portion of the refrigerator. There may be as much as 10 degrees difference in temperature on the different shelves. Milk may be stale and unfit for food when it is not actually sour if it has been improperly kept. It should, therefore, be kept near its original wholesome state by the aid of adequate household refrigeration.

Tailored Morning Dress of Rose Cotton Material.

material before it is cut according to the pattern. This assures their being symmetrical and in the right position on the wrist.

Plaits taken in the skirt give the appearance of a continuation of the design on the waist and provide fullness for the knees. The joining line is covered by a narrow all-around belt, closed by a pearl buckle. A bias band forms the flat neck finish and follows the lines of the tucked trimming, ending in a pointed tab, stitched flat. There is a concealed shoulder opening that closes with snaps. This dress might have been made in sleeveless or short-sleeved style for sport wear. With the long sleeves it is suitable on the street or for business in warm weather.

Polish for Floors
For cleaning coarse furniture and floors, a polish can easily be made at home. Take one-half pound paraffin and one gallon gasoline. Mix the paraffin and pour into gasoline. This performance should be done outside the house. Stir the contents thoroughly until a paste is formed.

Add the water to the canned corn, cook for 10 minutes and stir constantly to keep it from sticking to the pan. Press the corn through a strainer. Scald the milk and the onion in a double boiler and thicken with the flour and butter which have been well blended. Add the corn pulp and the salt. Heat thoroughly, remove the onion, and serve.

2 cups canned corn
1 cup water
2 pints milk
1/2 large onion

1 tsp. salt
1 tbs. butter

Save the bacon rinds and use for flavoring soups, dried peas and lima beans. They may be used to spread over the top of baked beans while baking, to take the place of the usual piece of pork.

HOUSEHOLD NOTES

In baking, one egg equals one-half teaspoonful of a leavening agent.

If meat is tough, cooking it in tomato juice will help make it tender.

Cinnamon apples or pineapple slices browned in butter are good with roast.

Keep sandwiches fresh by wrapping in oiled paper then in a towel wrung

Britain Urges World to Make War on Rats

The government of Great Britain has started a world war on the rats. It is a world war because it is endeavoring to have the other nations of the world to follow her example, and the threat is made that if something in this direction is not done the result will be disastrous. If the rat population of the world is allowed to increase as it has done in the past few years, the world will be overrun with rats and civilization will topple. Man will be wiped from the face of the globe. All the great plagues of history are said to have been spread by rats. One of the remedies is absolute cleanliness. There is a close analogy between the number of rats to be found in a city and the sanitary condition of that city, one official declared. The more careful cities are about the disposal of garbage, the fewer rats they have, because lack of food will control the normal increase of the pests.

Pigeon Effective in Role of Home Wrecker

Returning home to Philadelphia from his vacation, Robert Ransford opened his front door and pushed on the light. Such a scene of destruction met his eyes, that he hurried to the nearest drug store to call the police. Two answered the call and, with drawn revolvers and cautious steps, searched the lower part of the house for vandals. They found nothing but confused wreckage. Upstairs they found lamps overturned, bureau scarfs pulled off, and in the bathroom, bottles broken on the tiled floor. In the back room they discovered the culprit—a very tired and very hungry pigeon asleep on the bedpost. When it was assured that no valuables were missing, it was concluded that the bird had sought shelter in the fireplace chimney and had been unable to find its way out again.

Modern Novelist Must Revise His Last Line

The influx of novels and motion pictures in which the elements of romance and the proverbial happy ending are conspicuous by their absence caused Rupert Hughes, the noted author, to remark:

"It is merely a sign of the age. We used to have long courtships, solemn ceremonies and lasting marriages, which, so far as the outside world was concerned, were mainly happy. Marriage, in fact, was taken to be the culmination of happiness both in fact and in fiction. But now it is different. The joy is in the winning, not in the possession.

"Today, the author, to be true to life, will always wind up his story with the line:

"And they lived scrappily ever after."

Chinese Study Journalism

See more, hear more, write more—such is the slogan of a Chinese school of journalism which has been founded in Shanghai. The head of the institution, a Chinese, intends to take his students for a tour of the country, lasting a year. The mornings will be devoted to class instruction, but in the afternoons the students will be turned loose to look for copy. The students will be expected to study the customs of the people, meet prominent individuals, learn economic conditions, so that by the end of the year they will not only be qualified to hold jobs on Chinese newspapers but will also have a first-hand knowledge of their own country.
