J. H. Hulet, Business Manager

Charges that dead men voted in the primary election this fall have rocked Rochester, N. Y., a city from which we have heard little scandal since its adoption of the city manager plan several years ago. The cause was, as might be guessed, the frantic attempt of the political machine to regain control.

While it is always shocking to hear of this particular form of election fraud, and while it is certainly true that there are few things more vital than honest elections, since the very foundation of our democratic society rests on the ballot, it is worth pointing out that the man who fails to vote, particularly in a primary election, has little say to become excited at what happens in his absence.

Few are the people in this country who appreciate the real value of the primary election. Yet its efficacy fails if it is not understood. The political machine—be it Republican or socialist or Democratic or Socialist or what have you—can only control through the primary. There lies the source of its strength.

Why? Because it is in the primary that the party candidates are chosen, and it is the ability to obtain nominations that gives the machine and its boss control.

In other words, in many places today the primary election isn't an election at all. It's a mockery. The people go through the motions of voting, but in reality it is all cut and dried because the word has gone out to the political standard-bearers who constitute the rank and file of the machine to "support Brown." And Brown, of course, is the successful candidate.

Now then, along comes the election and what chance has the citizen who wants to vote for a good man? Machine men only are offered, from whom a choice must be made. The voter is disgusted and talks about "rotten politics."

Yet, if he hasn't gone to the primary and cast his ballot, he has no more right to holler than the man in the moon! Because it is just such folks as he who are responsible for this state of affairs.

We've had many experiences in Beaverton of just this sort of thing. It can't be talked about too much. And any of you who are disappointed at the way the election turns out, remember, after this, it's the primary that counts! How about a real primary at Beaverton?

Your vote in the primary means something. Without the primary, your final election ballot becomes a rubber stamp.

ODDS AND ENDS

—From the Beaverton Hummer

Temperature Clock

A clock built by a Swiss clock-maker is operated by changes of temperature, which set the mechanism like mechanism working. The clock is said to have kept accurate time for over a year without attention.

Army Food Bill

The food bill for the United States Army during the World War was \$878,064,452.38.

Perpetual Motion

The magazine science and invention offers a prize of \$5,000 for a working model of a perpetual motion machine. It bars the use of tides, winds, waterpower, natural evaporation or humidity in the operation of the machine.

An old colored lady went to the dentist to have her tooth pulled. She began to yell as soon as the forceps were in her mouth. He said "what are you yelling for? Don't you know that I am a painless dentist?"

"Maybe you is painless, but I ain't."

FARM REMINDERS

If a herd of cows which has been milking only a short time and giving a good flow of milk drops in production when taken off pasture, it is usually advisable to begin feeding grain at once, even though the cows are receiving good roughage in the form of alfalfa or clover hay. A mixture of equal parts of barley and oats or if the grain must be purchased, two parts of barley to one of oats, are recommended by the Oregon Experiment station. If the cows are heavy milkers, a little protein in the form of linseed oil meal or soy bean meal may well be added.

So far no specific cure has been found for poultry paralysis, and birds showing symptoms of this disease which do not improve within a few days, are best disposed of, recommends the Oregon Experiment station. It is questionable whether or not they are satisfactory for human consumption.

Hog cholera is said to be on the decrease in the United States.

Experiments conducted at the Oregon Experiment station have shown that kale is practically equal, pound for pound, to corn silage in the dairy ration.

FROM OUR CORRESPONDENTS

Interesting Little Notes from the Surrounding Country as Told by Our Active Special Correspondents Weekly

TIGARD NEWS

The two-day bazaar and Sunday chicken dinner at St. Anthony's Hall on Friday Saturday and Sunday Nov. 8th 9th and 10th was largely attended and netted a handsome profit.

Those of the members of Tigard Grange who availed themselves of the opportunity to visit Seattle last week and attend the 63rd annual session of the National Grange were Mrs. B. J. Leedy, Mr. and Mrs. A. M. Kennedy, and Mr. and Mrs. G. H. Baily.

All returned in time for the regular Thursday meeting of Tigard Grange except Mrs. Leedy who remained in Washington to visit with friends. Those returning reported a most enjoyable time and an interesting meeting. A class of about 1000 was given the 7th Degree.

KINTON HAPPENINGS

Mrs. Everett Wright has been quite poorly at her home on the Flat road during the past week.

Miss Ina Rood dressed 33 of her nice turkeys last week and shipped them to Portland for the Thanksgiving day consumption.

Kinton Sunday school sent a good representation to the Rally Day exercises held at Scholls grange hall Sunday, and a very pleasant day was spent by all who attended.

The quarterly conference of the Evangelical churches of this district was held at the Kinton church Monday evening, there being a very good attendance.

Mr. and Mrs. Grant Dawson and son of Cloverdale, Ore., and Mr. and Mrs. George Snider of Ione, Ore., spent the past week at the home of Mr. and Mrs. Geo. Snider. Mr. Dawson is a brother of Mrs. Snider.

Mrs. E. L. Cox returned Wednesday evening from Seattle, Wash., where she attended the sessions of National grange held in that city. Washington county was well represented at the sessions, a number taking the national degree.

ALOHA-HUBER

Sylvia Carlson was absent from school last week.

Mr. and Mrs. Blake were in Portland last week.

Paul Dudley was a business visitor to Portland last week.

Mr. and Mrs. Herman Bartlett were Portland shoppers last week. Ralph Conway is back at school after a few days absence with a broken collar bone.

Mrs. Nate Love is spending the week in Salem. She was called there by the illness of her father.

The Queen Esther Circle is a busy bunch with their silver teas, chicken dinners, and now a bazaar and dinner. Aloha is proud of the successes they have attained.

We are sorry to learn of the death of Mrs. Nan Mayfield of Camas, Wash., Tuesday, Nov. 19. Mrs. Mayfield is the cousin of Mrs. Joe Bush of Reedville.

FIRE SQUAD

The Fire Squad met October 14, and made plans for the construction of a white fence two and one-half feet high, to be placed on the north side of the football field. The fence is to keep the students off of the field during the games. At the other games this year the crowd was scattered along the edge of the field, handicapping the players. Later the fire squad will construct a fence all around the field. The club decided to organize regular fire drills in the grade school for the year. They will also plant shrubs around the west side of the flagpole, while the grade school will plant the shrubs on the other side.

Editor Review:

I was present at a caucus held at the Commercial Hotel a few days ago. I went there expecting to see a ticket nominated and to be voted upon at the next regular city election as the customary American method of doing things. I found the caucus packed with those who already had a ticket nominated at the City caucus held in the L. O. O. F. a few days before. I further found that the caucus was to eliminate opposition and by so doing there would only be one ticket to be voted upon at the polls.

Some who went there with the idea of packing the caucus say they did it for a job. But be it a job or something else the result is the same and back of it was the motive to prevent another ticket from going into the field. Now Mr. Editor, if there is any sense of fairness in such motives I fail to see it. Truly it was an open caucus and every one was welcome; but that does not mean to belittle opposition or make it a moot rule as it had the appearance of being.

Harmony ticket had already been nominated at a previous caucus. Why was it necessary to nominate it the second time at another caucus? Has no other ticket a right to exist? Only Harmony ticket? Do the Republicans pack the Democratic Conventions with the motive of preventing the later from putting a candidate in the field and thereby preventing the people from exercising their votes at the polls? Abraham Lincoln said this is a government of the people, for the people and by the people. It looks like in Beaverton it is a government of the clique, for the clique, and by the clique. Is it not time to restore the rights of citizens to exercise their votes as they see fit and eliminate the mob rule that made itself so apparent and so un-American at the Caucus held at the Commercial Hotel?

I think we certainly are due for a change, somewhere.

A new arrival in Beaverton, —W. E. Hubbard

HI-Y MEMBERS ATTEND BANQUET

New Members Inducted
At the banquet given October 7, by the ladies of the Presbyterian Church eight boys and Mr. Webb represented Beaverton. The boys present were Frank Burr, Richard Wilcox, Chester Beach, Maurice Manning, Herbert Mason, Ronald Webb and John Lindow. All the members of the Portland District of the Hi-Y attended, eleven schools being outside of Portland.

The purpose of the meeting was to create good fellowship among the Hi-Y members and to install new members. Those installed from Beaverton were Ronald Webb, Maurice Manning, John Lindow, and Chester Beach. Two hundred and fifty boys enjoyed the banquet, which was followed by speeches, and musical numbers, both vocal and instrumental. This program was given by the boys of the Hi-Y.

The schools of the Portland district outside of Portland formed an association which will meet Monday 21. The purpose of this association is to formulate a definite program of projects for the year. There are eleven schools represented in the association, including Beaverton.

All the boys who attended the banquet passed an enjoyable evening.

The Service Garage Building at Burns is undergoing remodeling.

How to Raise Poultry

By Dr. L. D. LeGear, V. S.
St. Louis, Mo.
Dr. LeGear is graduate of the Orem Veterinary College, 1902. Thirty-five years of veterinary practice on diseases of live stock and poultry. Extensive authority on poultry and stock raising. Nationally known poultry breeder. Noted author and lecturer.

The question which is best, hen or incubator, has been discussed pro and con almost as much as that prime favorite of old time high school debating societies: "Which came first the chicken or the egg?" The real solution of the problem depends largely on circumstances. For a number of reasons, the commercial poultry raiser is forced to use the incubator. For the owner of the average back yard or farm flock, however, it often happens that hens will serve the purpose just as well and for a much smaller outlay. Unlike the commercial breeder, he can usually afford to wait until hens are broody and the problem of securing enough broody hens for his entire hatch is not very often encountered.

As far as results are concerned one method is as good as the other if proper methods are employed.

First of all, considerable care should be exercised in the selection of hens used for hatching eggs. The following points are very important. The hen should have a well developed broody inclination; should be even tempered, free from nervousness and not too offensive when approached while setting. A yearling or two-year-old is more dependable than a pullet; never use pullets if you can avoid it. Use only hens that are large enough to thoroughly cover the desired number of eggs with a little to spare.

Use only healthy, vigorous hens, in good flesh and having bright eyes and red combs. Eggs should not be put under any hen until she has shown well developed signs of broodiness. It is a good plan to put several china eggs under her ladyship at first and confine her to the nest for a day or two. If at the end of that time she still shows unmistakable signs of broodiness, remove the china eggs and give her the eggs to be hatched. Let her feel the eggs under her before releasing her. Then confine her to the nest for a day or two so that there will be no danger of her deserting her trust.

A sitting hen should be given a place to herself where she cannot be disturbed by other hens trying to crowd into the nest with them. It is necessary to set hens indoors, each one should have a

dividual run fenced off with chicken wire. If that is not practical, hens must be confined to their nests and only released at regular intervals so they can eat and exercise. Unless this plan is followed you will often find two or three hens crowded onto one nest with eggs growing cold in the other nests.

If sitting coops are placed on high ground with sufficient drainage all around, nests may be placed directly on the ground. Scoop out a depression so the nest can be properly shaped to keep the eggs from rolling out. If conditions make it necessary to have a floor in the coop sod or loose dirt can be used to support the outer edges of the nest. Better still, make the nest in a box about 6 inches deep and 15 inches square for ordinary breeds. For 18 to 20 inches square. Pack sod or earth in the corners to round them out. Then arrange your nesting material inside the depression so formed. The use of sod or earth is advisable because it helps to conserve the moisture so necessary during incubation.

To my mind, the ideal nesting material is clean fine straw or hay. It is difficult to shape a nest with long coarse straw. Leaves are sometimes used for nests and are quite satisfactory.

Having provided the hen with adequate nesting facilities, the next consideration is to provide proper food and exercise. The hen should be permitted to leave her nest occasionally to eat and exercise but must not be allowed to stay off the eggs until they get chilled. Feed her equal parts of wheat and corn on the ground or in a pan near the nest, but feed no mash. Provide plenty of pure, fresh water, grit and charcoal. The sitting hen will usually leave her nest once a day for feed and water. If she does not, take her off and close the nest so she cannot get back too soon. If she stays away too long, take her gently away from the food and put her back on the nest. If the weather is rather cool she should not leave the eggs more than 10 or 20 minutes. In mild weather she may stay away somewhat longer.

Visit your hens regularly while they are sitting and watch them closely. If a hen is a good sitter, she will stick right on the job and give you very little trouble, but some hens are restless, mash the eggs by moving about or mash newly hatched chicks. Chicks should be taken from such hens as fast as they are hatched and put in an incubator or under some other hen. Always remove empty shells. Otherwise they may slip over other eggs and smother chicks struggling to get out of their shells. Also whenever an egg is broken during the earlier stages of hatching, remove it. If its contents are smeared over other eggs, wipe them clean with a wet cloth and return them to the nest at once. Use only lukewarm water for this purpose. Make necessary examinations of the nests while your hens are eating to avoid disturbing them.

Needless to say, thorough sanitation of nests and coops are necessary. The coop or building in which hatching is done should be thoroughly

HOME POINTERS

By Betty Barclay

Carolina Meat Loaf

- 1 1/2 pounds chopped beef
- 1 small onion
- 1 large green pepper
- 2 small pickles
- 1 1/2 teaspoon salt
- 1/4 teaspoon pepper
- 1/4 teaspoon paprika
- Strained tomato juice
- 1 pimento

Mix the beef with the chopped onion, the green pepper, chopped finely, the pickles cut in small pieces, and the tomato juice. Season with salt, pepper, and paprika. Grease loaf pan and place half the mixture in it. Cut the pimento in long strips and arrange over the meat; place rest of meat over pimento and bake in a hot oven for thirty-five minutes. Ten minutes before removing from the fire, place bacon strips across top and permit them to get crisp. Serve with bacon as a garnish.

FLAVOROUS VEGETABLES

Many women fail to get the most out of their vegetable dishes, either because they use too much water, or fail to add a touch of sugar. Too much water absorbs the flavor of the vegetable. A dash of sugar in the water (a small quantity of water at that) brings out the full flavor of the vegetable, and also supplies a bit of quick energy food to the diner. Try these simple little recipes and note the "difference."

Cabbage Stewed Brown

Stew one chopped onion in one spoonful of soup fat and cook it with half spoonful of granulated sugar until golden brown. Add one glass of half vinegar and half glass of water. A head of white cabbage shredded like noodles, after removing the stalk and thick veins, add some salt. Stew tightly covered for several hours, stirring frequently and occasionally adding some water or weak beef broth. The cabbage must be pleasantly plump. It should taste sweet-sour and be golden brown and glossy. If desired, a little flour can be dusted over and mixed with it half hour before serving.

Stewed Celery

Scrape some tips, delicate, white stalks of celery, wash repeatedly so that no sand adheres, and after cutting them into even three-inch pieces, cook for several minutes in boiling water and pour into a strainer. Then stew the pieces of celery for 20 minutes with half teaspoon butter or chicken fat, half teaspoon sugar, some pepper and salt. Dust some flour over, and cook until done with half cupful of cream.

The Girl Reserves elected their officers for this year on October 30. They are: President, Annie Chinn; Vice-President, Verna Toelle; Secretary, Alma Sullivan; Treasurer, Rose Kamberger.

Miss Simms, the Girl Reserve leader for the Portland District, came out and told the girls the purpose of the organization and the rules to follow in order to gain a ring, or other honors.

The meeting closed by singing "Follow The Glean" which is based on the search for the Holy Grail.

—From the Beaverton Hummer

disinfected at least once a week. The nest should not only be kept clean as suggested above, but the hen should be thoroughly dusted with lice powder before hatching is started and again on the seventeenth day.

why smokers graduate to

CAMELS—

The phrase "Two Graduated to Camels" originated with a Camel smoker. It expresses the experience of millions who through Camels have learned to know real smoking pleasure.

As taste in smoking develops, it naturally leads toward better quality. New smokers may not be critical but when they once experience the true mildness and surpassing fragrance of the Camel blend, they realize that here is a real superiority. It is for smokers of such discernment that Camels are made . . . for them the choicest tobaccos are selected . . . and this quality is maintained for the millions who know genuine smoking pleasure.

when they learn the difference they flock to

Camels
