SEARCH FOR GOLD OF FAMED BANDIT

Ancient Papers Tell of Ali Pasha's Hoard.

Athens, Greece.—Treasure amassed by the notorious Ali Pasha of Tepeleni, who terrorized the Balkans 150 years ago, is being sought near Janina, in northern Greece, where the pasha held his court.

Working from recently discovered documents, archaeologists have found a tunnel which supposedly leads to the buried treasures. In the tunnel they discovered the skeletons of nine workmen hired by Ali and killed by him so that he alone would know the hiding place.

The splendor of Ali's court at Janina has become almost a legend throughout the Balkans. Ambassadors of the great powers came to him and the poet Byron was his guest. He was successively the ally of Napoleon and Lord Nelson. At the peak of his career his glory outshone that of the sultan in Constantinople.

Yet Ali arose from a humble beginning. He was born in 1741 at Tepeleni, a hill village in Albania. His father, who held the hereditary office of bey of "the seat," was killed by neighboring chiefs who seized his territory when Ali was fourteen years old.

All was left in the care of his mother Khamko, a woman of extraordinary character. She herself formed a brilliant band and inspired the loyalty of her own fierce temper. Within a few years he regained possession of Tepeleni and took vengeance on his enemies. Then, to secure his own power, he murdered his brother and imprisoned his mother on a charge of attempting to poison him.

In Russian War. In 1787 Ali took part in the war against Russia and was rewarded by being made pasha of Trikala in Thessaly and Derwend Pasha of Roumelia. His power was augmented when he succeeded in being nominated pasha of Janina.

It was only natural that his power should arouse the jealousy of the Sultan Mahmud II, who had formulated a policy of curbing the strength of the provincial pashas.

The sultan's pretext for an attack on Ali came in 1820 when the "Lion of Janina" violated the sanctity of Istanbul itself by attempting to procure the murder of an enemy in the very precincts of the sultan's palace. The bulk of the Turkish forces under Khursid Pasha were sent against him.

Although over eighty, he held his own for two years. He was forced to sue for peace in the spring of 1822.

He was granted an interview with Khursid Pasha, was received and dismissed with friendly assurances. As he turned to leave the tent he was stabbed in the back. Then his head was cut off and sent to Constantinople.

Although Ali was known to have amassed much treasure, the existence of a buried hoard was considered a legend until the recent discovery of the document. Now the discovery of the tunnel has stimulated efforts to find the treasure.

Peiping Bars Public

Airing of Pet Birds

Peiping, China.—Hu Jeyu, Peiping's new mayor, has issued an order forbidding men to take out their pet birds for an airing on the streets, public gardens or parks. The bureau of public safety and social welfare have been instructed to enforce the order.

The order abolishes a picturesque custom of centuries. The reason is that the custom tends to filthiness and indecency, and, therefore, is contrary to public morals.

Peiping pet birds have been accustomed to daily airings for centuries. Men of fashion usually take out their own birds, walking about with them in the park, or taking them to tea-houses, where they can hear other birds of quality sing and perhaps pick up a few new notes.

Gigantic Structure

Herodotus estimated that 100,000 men were engaged for 20 years in building the Great pyramid.

An elderly silver locked minister was officiating at a funeral and in his eulogy to the departed he intimated the mourners with this illuminating expression: "Friends, it's that remains in the shell—the nut is gone."—The Mueller Record.

HAWTHORNE DAIRY

In Portland at 216 2nd st.

This firm was organized for purposes of giving the very best dairy products possible and has succeeded admirably and there is no question but that their popular products are very much superior to any of the average and equal to any obtainable on the market today.

A most commendable institution under the wise and prominent management, pays the top market to the farmers at all times.

This institution probably typifies better than any other the material progress of the community, and the fact that this section of the state is organized along twentieth century lines as regards the continued development of commerce and agriculture

Popularity with both the producer and the customer is evidenced by the large number of farmers selling to them and the fame their brand of products has attained. By reason of the fact that they handle a volume of business equal to the total formerly handled by many smaller concerns, they are not only able to pay the farmer a higher price for his cream, but by the same token can manufacture and sell their products for less. And it can be readily seen that this twentieth century organization also enables them to produce a line of products of uniform high quality.

At the offices of this company the producers encounter the most courteous treatment.

The production of cream is a proposition that ought to appeal to every owner even of a small farm, as it is a well known fact that this mode of farming builds up the land, at the same time making the producer more money than he can make by straight farming and then he gets pay right along in cash. The company is thus adding much as a valuable market at our door for the products of the farm.

We wish to give this well known concern the prominent place which their modern institution merits as being among the foremost concerns in the field in this part of the country in this line of endeavor. They are a large contributor to the progress and prosperity of the community.

They have a reputation far and wide as business men of wide experience and straightforward methods and it is not surprising that the volume of business is ever increasing.

With the advance of the times greater precaution is taken in every branch of life. The manufacturer, farmer, doctor, the scientist and in fact in every field of research the latest of scientific methods are brought into play to make for efficiency and advancement. This is equally true of the seed business and the modern firm in this line must be

one of advanced ideas regarding the scientific production of seeds, that are pure, tested and reliable.

The management has made a scientific study of the needs of the territory in seeds and secures special brands that suit the trade of this section of the state. Every farmer should call around here occasionally and see how production can be increased.

Their brand is by far the better mixture of grasses offered for the purpose of quickly producing a permanent lawn. It is prepared from a special formula, and is a careful blending of varieties adapted to this climate. It is also highly recommended to be sown over our country lawns, as it gives you a nice velvety lawn during the year and rebuilds your old lawn.

The matter of price has also received attention here, for it has become a well established fact not only in the city but in the surrounding country that the quotations of this store are always as low as is consistent with sound business. They permit no one to offer greater values, just as they permit no one to offer higher quality, and this happy combination has resulted in a large and ever-increasing custom.

We wish to commend them and direct your attention to this establishment as one of the reliable business institutions of the community which has added to the development and progress of this part of the state.
