

**1931 Fifty years service to humanity**

**1931 JOIN! AMERICAN RED CROSS**

**LOCAL HAPPENINGS**

John Welter of Chicago visited with his father and other relatives last week.

Mrs. M. C. McKeercher spent last Wednesday evening with Mrs. Lena Morris at Hillsboro.

Mr. and Mrs. R. B. Denney and daughter Lorraine spent Sunday in Salem at the H. C. Gilbert home.

Mrs. Hendricks of Portland, a former resident of Beaverton spent Friday visiting with Mrs. Fordney.

Mrs. T. B. Denney and Mr. and Mrs. R. A. Carey of Portland, spent the week end at their cottage at Rockaway.

Mr. and Mrs. Lowell Kahr of Fairvale entertained Mr. and Mrs. J. A. McCann and son Ted at dinner Saturday evening.

LeRoy Kilander was brought home from the hospital last Wednesday. He is recovering nicely from an operation for appendicitis.

The log train on the Willaburg-Beaverton cut-off threw a log across the road at the Denney road crossing Wednesday evening, tying up traffic for a time.

Mr. and Mrs. Hugh Lewis spent the week end in Bend where they attended the dedication of the Rebekah Lodge. The dedication was put on by the Hillsboro Lodge.

Mrs. A. E. Wilson, Miss Mabel Richter, and Gayford Wilson spent Sunday in Silverton visiting with Mrs. Wilson's brother-in-law and sister, Mr. and Mrs. Roland Kuenzi.

Relatives of Mrs. A. C. Tuttle, from Portland, were entertained at a family dinner on Sunday evening, at the A. C. Tuttle home on Denney road, in celebration of Mrs. Tuttle's birthday.

The Chairman of the paper drive for the Rebekah Needle Club wishes all who can to have their papers down at the I. O. O. F. hall as soon as possible for they wish to send them in.

The Rebekah Needle and Social club will start their series of Card parties, the first one to be held Friday evening, November 13, at the I. O. O. F. hall. At that time the Rebekah quilt will be given away.

The Beaverton Masonic Lodge is entertaining members of the Eastern Star and their families on Tuesday evening, November 17. It is planned to have Samuel Lancaster give his lecture and slides on his travels in Europe, and also highway scenes of interest. There will also be a program of music.

**NOTICE OF CITY ELECTION**

NOTICE IS HEREBY GIVEN that the regular annual election for the Town of Beaverton will be held at the City Hall, corner of First and Main Streets, Beaverton, Oregon, on Tuesday, December 8, 1931, between the hours of twelve o'clock noon and seven o'clock, p.m. at which time the following named officers will be elected:

One Mayor to serve one year.  
Three Councilmen to serve two years.  
One Councilman to serve one year.  
One Recorder-Treasurer to serve one year.

And notice is further given that at this time an election will be held for the purpose of voting on the adoption of a Charter Amendment submitted to the Voters of the Town of Beaverton by a resolution passed and adopted by the Council.

The following named persons have been named by the City Council to act as judges and clerks of this election.

Judges: C. E. Hedge, chairman, Lute Underhill, and Anna Hyland.  
Clerks: Estell Boswell and Mabel Alexander.  
Dated at Beaverton, Oregon, November 9, 1931.  
Mrs. Lela L. Richey, Recorder.  
Alvin E. Wilson Mayor.

**IN OREGON HOMES**

Eugene—"Live in plenty" is the idea portrayed in a recent exhibit of vegetables grown by Lane county homemakers who co-operated in the year-round garden project of the home economics extension service. Out of a huge "horn of plenty" poured spinach, peppers, turnips, egg plant, beans and other fresh vegetables. On a ledge just below were displayed canned and dried foods preserved by these women. Canned vegetables prepared ready for serving to the baby were featured. Planting plans and recipes using these vegetables were shown and made available. The display was arranged by Gertrude Skow, home demonstration agent, in co-operation with the First National bank in Eugene.

St. Helens—Eighteen home economics extension units, eleven of them officially organized with constitutions and by-laws, are active in the home economics work of Columbia county. This report comes from Sara V. Case, home demonstration agent who says she has 475 women on her active mailing list for notices and other helpful homemaking information sent out from her office.

Oregon City—Eighty-five dresses were remodeled by Clackamas county women enrolled last spring and summer in the clothing project called the "Use of Commercial Patterns". The total value of the dresses before they were made over was estimated at \$190.18. After the remodeling the garments were valued at \$436.65, or a net gain of \$246.47. The project was supervised by Thelma Gaylord, the county demonstration agent.

Corvallis—"Solving the lid problem" is the name of an illustrated mimeographed sheet prepared by Zelta F. Rodenwald, extension economist in home management. This leaflet contains drawings and directions for making three convenient, easily constructed lid racks. It was prepared as a supplement to one of a series of discussions on "Storage Ideas" given by Mrs. Rodenwald over station KOAC each Tuesday morning at 10:30 o'clock. The mimeograph, HE 227, will be sent free upon request.

"The Food Shop" has opened its business in Albany at the corner of Second and Main streets.

**SPLINTERS**

A Column of Sense and Nonsense, Edited by the Beaverton Lumber Co.

A hen is the only one who can lay around and make money.

Cold, rainy weather is at the door. Are your barns warm and comfortable? How is your poultry house? It costs but little to put your buildings in good shape and pays big dividends.

City Slicker (in red sweater): "Say, Hiram, is that bull safe?" Farmer: "It's a d— sight safer than you are."

Quality, Service, Low Price—we try to excel in each. We want your patronage and will help you in your building problems in every way open to us.

You need good roofing to keep out the rain. You can save money and get better service by buying your roofing from us.

Barber: "I don't seem to remember your face."  
Customer: "Probably not; it's all healed up now."

**LOW HUMIDIFIED TEMPERATURE MOST COMFORTABLE**

10% OF THE FUEL BUDGET IS WASTED IN MAINTAINING HIGH TEMPERATURES

A Properly Humidified temperature ranging from 65 to 70 degrees F. actually provides more complete physical comfort than a dry air temperature of 70 to 75 degrees F.

LOW TEMPERATURE + MOISTURE = COMFORT  
HIGH TEMPERATURE + MOISTURE = DISCOMFORT

HOLLAND INSTITUTE OF THERMOLOGY

**HUMIDITY SECRET OF HOME COMFORT**

Moisture Deficiency of Winter Air Overcome by Warm Air Heating Plant Humidifier.

AMERICAN home-owners as a rule make the sad mistake of endeavoring to create indoor comfort during the winter heating season by maintaining the thermometer at high readings. The fact is that the thermometer register is a very unreliable guide to comfort, says the Holland Institute of Thermology of Holland, Mich.

Most homes are heated with old style heating systems, and therefore minus a means of adequately humidifying the indoor air. High temperatures are resorted to provide physical comfort. The result is that air is far too dry for either comfort or health. Due to lack of sufficient ventilation, the rooms become uncomfortable because of stagnant, overheated, dry air, with the result that even the best radio programs are irritating.

Often persons in these dry, over-heated rooms experience a sensation of chilliness. This is explained by the fact that evaporation causes a feeling of coolness. Dry air has an affinity for moisture, and draws upon every object possible to supply its moisture requirements, including the occupants of a room. They are subjected to an unnatural evaporation of bodily moisture, and this causes that chilly feeling in "hot rooms."

But now, genuinely comfortable, healthful indoor atmospheres may be had by every home-owner during the winter season, and in lieu of generating fires to maintain temperatures of 70 or 80 degrees F., as found in many homes, they need maintain temperatures of only 65 or 70 degrees. With modern warm air heating systems of the vapor air type, the moisture deficiency of winter air is easily overcome by means of a humidifier that receives a constant supply of water from the city main. These humidifiers evaporate and inject into the home air the water vapor from 3 to 25 gallons of water daily, as may be required, maintaining a constant relative humidity of about 45 per cent. This is adequate to offset the moisture deficiency that accompanies winter air, and in combination with a temperature of 70 degrees F. will create a June atmosphere in the home in December.

Linn and Benton Co. lands that were shipped to California since June brought \$500,000 to farmers.

Survey will be made of the Willamette River from Eugene to Portland, looking toward ultimate canalization.

Bids have been opened by the State Highway Department for a Bridge over the Siletz River on the Oregon Coast highway, two miles south of here.

Survey will be made of the Willamette River from Eugene to Portland, looking toward ultimate canalization.

Bids have been opened by the State Highway Department for a Bridge over the Siletz River on the Oregon Coast highway, two miles south of here.

**ON OREGON FARMS**

Dallas—Alfred Werth of Polk county by utilizing some road grading equipment located in his vicinity, levelled and dyked about five acres of land in approximately a day's time this fall, according to J. R. Beck, county agent, who assisted in the operation. Fred and T. J. Werth are also putting some land under irrigation this fall, Mr. Beck says.

Roseburg—In a recently completed test in which R. B. Montgomery of Looking Glass co-operated with County Agent J. C. Leedy to determine the effect of various fertilizers on yield and quality of prunes, nitrogen produced a substantial increase in the growth of the trees.

The four pound applications of ammonium sulphate per tree, however, had a detrimental effect on the quality of the prunes, resulting in a low drying test per bushel.

St. Helens—Considerable interest is being shown in the charring method of burning stumps by Columbia county farmers, many of whom have been consulting with County Agent George Nelson on the subject. Nelson plans to hold a demonstration meeting in the near future on the charring of stumps, which, he says, seems to be a feasible method involving only labor with no outlay for other expenses.

The Scio Mutual Telephone Co. plans the installation of a cable line in Scio and other modern improvements.

Bids have been opened for constructing a house at the Jacob Astor experiment station at Astoria.

**NOTICE**  
The Beaverton Masonic Lodge will entertain members of the Eastern Star and their families at the High school Auditorium Tuesday evening, November 17. adv
