

# FLASHES OF LIVE NEWS

## KINTON HAPPENINGS

H. R. Findley of Cedar Mill was transacting business in Kinton last Wednesday afternoon.

Kinton sent a good delegation to the Rose Festival in Portland last week and all report it as being very good.

Joseph Wenzel is attending school at Monmouth. Mr. Wenzel will be teaching in the Helvetia school in the next school year.

Mr. and Mrs. M. B. Godfrey and Mrs. W. Sheach of Portland were visitors last week at the home of Mr. and Mrs. Everett Wright.

Miss Lucille Peterson was a guest for a couple days last week at the home of her uncle and wife, Mr. and Mrs. Chris Cook of near Reedville.

Mrs. Ralph VanKleeck and lady friend from Portland, spent the day last Friday at the home of Mr. and Mrs. J. VanKleeck, Pleasant Valley Road.

The date for the Children's Day concert at the church has not been set yet but will probably be given some time the first of next month. Watch for announcement.

Mrs. Cooper and family of Kirkwood, Wash; who were recent guests of her sister, Mrs. Everett Wright, Cooper mountain, returned to their home last week.

Agnes and Ivan Bierly, who have been attending summer school at Corvallis during the past two weeks, returned to their home on Pleasant Valley road the last of this week.

Virgil McCormick, son of Mrs. Ethel McCormick played an alto horn in the Hillsboro band which furnished some of the music during the parade at the rose festival in Portland Friday afternoon.

Mrs. E. L. Cox was in Portland last Thursday where she attended the funeral services of Mrs. Eva C. Corner, who was formerly from Maine, and a girlhood friend of Mrs. Cox. Mrs. Corner has visited the Cox's in Kinton.

Mrs. August H. Dallman, Albert and Luella Dallman, and Mrs. Bertha Harris went to Salem last Wednesday by way of Gresham, where they were accompanied by Mrs. August Obriet. The day was spent visiting with relatives.

Mrs. Emory Van Kleeck and children went to Portland last Friday and visited with her brother William Thompson and wife for a few days, returning home the first of this week. Mr. VanKleeck went to Portland for the day Sunday his family returning with him.

E. L. Cox attended the Cooper Mountain cemetery association meeting held last week on Wednesday afternoon at the church. It was decided to fix the church up and make it ready for use when necessary. Mr. Cox is president of the association.

The following piano pupils from Kinton of Mrs. Erma Taylor Sparks of Portland took part in a piano recital held at the Young Women's Christian association social hall in Portland last Friday. Mary Catherine Hall, Eunice Ellen Snider and Kathryn Pomeroy.

At the annual session of state grange held at Silverton last week the following from Kintongrange were in attendance: Mr. and Mrs. Leland Flint, Mr. and Mrs. Charles Van Kleeck, Mr. and Mrs. Albert Strief, and Mr. and Mrs. Frank C. Fluke. A very pleasant session is reported.

Mrs. Adelia W. Kindt and son, Victor, of Portland were visitors last Tuesday at the home of Mr. and Mrs. E. L. Cox. The Findt family were residents of Kinton about fifteen years ago and are well known here. They formerly owned what is now known as the H. J. Valentine place.

## ALOHA-HUBER

C. W. Brome and family picnicked at Gales creek Sunday.

Mrs. Sanford Rogers was a visitor in Portland last Saturday.

Chas. Thibbits of Seattle returned home with his mother for a short visit.

Helmer Johnson of Portland was a dinner guest at the Beattie home Tuesday.

Mr. C. E. Ruby and family of Portland visited Sunday with the Tuttle family.

Mr. and Mrs. Harry Webb of Portland visited at the home of Mr. Narson Monday.

Beth and Ivan Stratton, Ruth Benson and Mary Edwards visited Wilma Tuttle Sunday.

Betty Stickney visited at Blue Lake recently.

Lee Barnum of Monmouth attended the annual school meeting Monday night.

Bible school is being conducted this week for the children at the Baptist church.

Mrs. Nancy Lee was called to Tacoma, Wash; by the serious illness of her sister.

Elmed Gaunt and family of Portland visited at the home of his brother Frank, Sunday.

Mr. and Mrs. E. Scott of Stacey Ave. are entertaining their daughter and children of Camas, Wash.

Arthur Preston is entertaining his brother and wife from San Jose

valley, California.

Mrs. Sullivan of Blanton Ave. and children are enjoying a vacation at the beach this week.

Mr. and Mrs. Harry Weaver attended the wedding of Marjorie Kleek in Portland, Wednesday.

Mrs. Alice Wheeler visited with her grand daughter Mr. and Mrs. C. Newton of Philomath, Sunday.

Mrs. Barnum of Monmouth has been visiting a friend here, she was accompanied home by Mrs. Laura Mack.

John Coward and family of Spokane are visiting her father Mr. Nason. Mrs. Coward and sons will remain for the summer.

Mrs. Harry Weaver stepped on a stubble which caused her to have a very sore foot. Dr. Welsh of Beaverton lanced it. and it is much better now.

The annual school meeting held Monday night was well attended. H. A. Wright of Huber was elected to succeed L. Gilmore. Mrs. Etta Welch was unanimously reappointed. The budget was accepted as posted.

Many people attended the supper given at the Baptist Church Monday eve. A large delegation came out from Portland. The orchestra led by Miss Helen Critz furnished music through out the evening. Several special numbers were rendered and a debate was given.

## HITEON NEWS

Miss Dorothea Struthers was a guest last week at the A. C. Robinson home in Portland.

Mrs. Chas. VanKleeck attended State Grange at Silverton last week. Mrs. VanKleeck went on Friday.

A Rebekah picnic held Sunday at Frank Ericksons on the Tuatin river was well attended by Hiteon folks.

Farmers are very busy haying and the hay is heavy and of good quality. A number are also planting potatoes.

Hiteon ladies attended the Rebekah Club meeting last Wednesday at the home of Mrs. Mamie Erickson near Bonita.

Mr. and Mrs. Wm. Campbell who have been visiting here returned to Husum, Wash; Saturday. They expect to move back to their ranch here soon.

Mr. and Mrs. Roy Liets and Mrs. N. P. Nielsen spent Sunday with their parents Mr. and Mrs. J. L. Haggerty. Mrs. Nielsen expects to leave soon to visit her husband who is in Alberta, Canada.

## BANKERS DEVELOP NEW FINANCE AID

President of American Bankers Association Describes Plan and Services of National Credit Corporation

NEW YORK—The National Credit Corporation, a billion dollar cooperative institution, is the method worked out by bankers to put into practical effect the central point in President Hoover's plan for renewing the commercial and industrial activity of the nation as proposed in his statement to the nation of October 7, Harry J. Haas, president of the American Bankers Association stated in a recent interview.

The corporation is strictly cooperative in character, he said, to unite the entire banking system and increase the effectiveness of the financial services of banks to their communities in the rural districts as well as the cities. The plan will marshal the banking resources of the country, he explained, by creating a national institution whose funds will be loaned when necessary to banks which have assets in their portfolios that are thoroughly sound but are not eligible for loans at federal reserve banks.

To Benefit Everybody "There is no citizen in the United States but will benefit in very practical ways from the results of the operation of this forward-looking plan of cooperation, which may be regarded as one of the most constructive steps that have been taken toward revival of sound business activity," Mr. Haas declared, adding:

"The National Credit Corporation represents an instrumentality that should have far-reaching effect in restoring the confidence of the public. The plan not only has been formulated by the country's leading banking authorities, but also will be carried out locally as well as nationally by banking representatives who have given their time and thought to this undertaking as a real public service.

"The American Bankers Association convention was in session at the time the plan was proposed and unanimously endorsed it in principle. I have examined the detailed formulation of the working plans as developed by the National Credit Corporation and I am able to say without reservation that the National Credit Corporation as set up by them constitutes a practical, sound and efficient means for carrying out President Hoover's proposal."

Excavation work on the grounds of the Soldiers' Home at Roseburg is progressing.

## Does Your Husband, if He's Hungry Head for "Home Sweet Home"?

Why do men love home? They do, you know! Remember that in June we celebrate the 141st anniversary of the composer who wrote "Home Sweet Home"—and that John Howard Payne whose birthday it is, was a man!

To find out at least one reason why men love home, a wife has only to try and get the life-mate to eat at a restaurant when it is feasible to eat at home. There is much to be said for harmony, and peace and family life, but it might as well be admitted that home-cooking accounts for one reason.

There are many dishes that the restaurants prepare as well as the home cooks; there are even a few which they can cook better. But there are some that can't be done right except at home. Strawberry shortcake, fried chicken, bean soup, come to the mind right away—and you can doubtless add others.

To a man however, it is the little things that count (and no puns about the little things that cry "da da" are intended)! It's things like having jam on the table, pickles and preserves with the meat, relishes with the main course it's things like second helpings, between-meal snacks and surprises; it's food with a home-sweet-home flavor that is hard to describe but easy to taste.

### Sweet Fruit Rolls

- 1 cup milk, scalded
- 1/2 cup rolled oats
- 3 tbsps. fat
- 1 tbsps. sugar
- 1 tsp. salt
- 1 yeast cake
- 1/4 cup lukewarm water
- 3/4-4 cups bread flour
- 1/4 pkg. pasteurized dates
- 1/2 cup scalded milk over rolled oats, shortening, sugar and salt in a large mixing bowl. Cool until lukewarm. Add yeast cake, which has been mixed with lukewarm water and 1/4 cups of sifted bread flour. Beat thoroughly; cover, and let in a warm place until mixture is full of bubbles (about 1 hour). Add sufficient flour to form a soft dough (2 to 2 1/2 cups). Let rise until doubled in bulk (about 2 hours). Turn out on floured board and knead in a cup or a cup and a half of dates, cut in eighths. Shape into rolls. Let rise until light (about 1 hour). Bake in hot oven (425° F.) about 15 to 20 minutes. 2 dozen rolls.

### Savory Lamb Loaf

- 3 lbs. shoulder lamb
  - 1 cup stale bread crumbs
  - 1 cup canned tomato
  - 1 egg
  - 1 3/4-oz. can pimientos
  - 1/4 cup lamb stock
  - 2 1/2 tbsps. salt
- Wipe lamb, remove lean meat and put through food chopper. Add bread crumbs, tomato, egg slightly beaten, 3 pimientos chopped, lamb stock and salt, shape in a loaf, put in greased shallow pan and bake in hot oven, 400° F., for 1 hour, basting frequently. Serve with:

### Pimiento Sauce

- Lamb bones
- Cold water
- 1 onion
- 1/2 tsp. peppercorns
- 2 tbsps. fat
- 3 tbsps. flour
- Salt
- Pepper
- 1/2 to 1 pimiento

Cover lamb bones with cold water, add onion, sliced and peppercorns, and cook slowly while loaf is baking; strain. To 3 tablespoons fat from pan add flour and when well browned add 1 1/2 cups of lamb stock. Stir until sauce boils, add seasonings and pimiento.

### Old-Fashioned Jam Cake

- 1/2 cup butter or substitute
- 1 cup sugar
- 2 eggs

- 1 1/2 cups flour
- 1/2 tsp. soda
- 1/2 tsp. cinnamon
- 1/2 tsp. cloves
- 1/2 tsp. nutmeg
- 1/2 tsp. allspice
- 1/2 cup buttermilk
- 1/2 cup jam
- 1/2 cup nutmeats
- 1/2 cup citron

Cream fat, add sugar and then beaten eggs. Sift flour once before measuring. Add soda and spices. Add flour mixture and buttermilk alternately to egg mixture. Fold in jams, nuts and citron (which may be bought ready-sliced and candied). Bake 45 minutes in a moderate oven (350°).

## IN OREGON HOMES

Grants Pass—A traveling cannery to aid in conserving surplus foodstuffs of the county is an original idea being promoted jointly by the Josephine county extension service and the granges. Boiler, pressure cooker, tin cans, sealer and other needed equipment are being assembled on a four wheel trailer which will shortly establish a schedule for visits to various communities.

It is expected that a majority of the 445 families enrolled in the year round garden project will take advantage of this portable cannery to preserve their garden produce. A charge of a few cents per can will be made to cover cost of operation and supplies, to be paid in cash or produce. Directing this program are Mrs. Sara Wertz, home demonstration agent, H. B. Howells, county agent; and a Pomona grange committee composed of George Wertz, Ernest Calhoun, Ben Coustant and Pete Dorsay.

Bend—That homemakers of Deschutes county are actively promoting the idea of "homemade living" is evidenced by the gathering of 170 women who met to obtain the latest scientific information and methods on canning, drying and curing of home produced foods. The meeting was conducted by Lucy A. Case, nutrition specialist of the State college extension service, who demonstrated the various methods of canning strawberries, peas, rhubarb, salmon, meat vegetable soup and sieved spinach for infant food. Models of homemade dryers and smokehouses were also shown.

St. Helens—Homemakers through out Columbia county are building inexpensive evaporators for fruit and vegetable drying. Within the past three weeks approximately 500 such units have been constructed. Constructing homemade dryers have been given out at the office of Mrs. Sarah Case, county home demonstration agent. Two of the dryers recommended were invented by Lucy A. Case, extension specialist in nutrition. They may be made of fruit crates, galvanized wire, a few nails and some hay wire.

Fossil—"Our kitchen is quite pretty now" remarked a young homemaker of Wheeler county recently, when speaking of inexpensive kitchen improvements. "In the middle of the floor we placed an imperfect piece of linoleum with one border missing. We painted the border around it, so that the total cost is less than \$4.50.

### CALL FOR MISTAH ANANIAS!

"Bredren and Sistern," said the colored preacher, "de subject of ma sermon dis evenin' am 'Liars.' How many in dis congregation has done read de 69th chapter ob Matthew?"

Nearly every hand in the audience was raised immediately.

"Dat's right," said his reverence, "you is just de folks I wents so preach to. Dere ain't no 69th chapter ob Matthew."

By BATEMAN Famous English Cartoonist

From "Brought Forward" by H. M. Bateman. (This is one of a series of cartoons published on the occasion of Mr. Bateman's visit to the United States.)

## Heating Plant Not to Blame for Dust

By far the greater part of the dust and dirt that irks the housewife during the winter heating season comes from the great out-of-doors, and not from the heating system, according to the Holland Institute of Thermology of Holland, Michigan.

It filtrates into the house through the cracks around doors and windows, and of course a great deal is tracked in. This is easily understood, says the Institute, when we consider that during the winter season thousands of chimneys on homes, factories and railroad engines are constantly belching tons of soot and dust into the air.

In addition the verdure is withered and dry, the ground is dry, and unless covered with snow, these also are the source of a great deal of dirt and dust that is constantly floating in the air. The winter winds blow this dust into the house constantly.

Another source of winter household dust lies in the fact that the home air is too dry. The furniture, furnishings, wall paper, clothing and other fabrics become dry, and the brittle fine fibers break off, filling the home air with lint and dust. This condition could be obviated were the home air adequately humidified. Adequate humidification calls for the evaporation of six to eight gallons of water daily in a six-room house of moderate size. This is easily accomplished with modern heating systems of the vapor-air type which are equipped with automatic humidifiers with capacity for evaporating and injecting into the home air as much as 25 gallons of water daily.

Weather-stripping of windows and doors and the use of storm sash will materially reduce the infiltration of outdoor dirt. The small amount of dirt that comes from the heating plant may be reduced to an almost negligible amount if home owners will see to it that the heating system is kept clean, the coal supply is wet down, and the ashes are wet down.

### War on Furnace Soot Repays Home Owner

As little as one-eighth of an inch of soot on the inner heating surface of your heating plant will cut its heating efficiency 25 per cent, declares the Holland Institute of Thermology, Holland, Mich.

Tests made to discover every possible ailment of the modern furnace, conducted by engineers at the University of Michigan in conjunction with the Institute, have proved this point as well as many others of importance to all home dwellers. First steps to maintain an efficient, economical heating plant call for thoroughly cleaning the heating plant of soot and the lower portion of ashes. This accomplished, the conditions of complete cleanliness should be rigidly maintained through the winter.

The customary scraper or rake to be found in most basements will repay the owner in better functioning of the heating plant if used frequently. Where available a heating plant vacuum cleaner should be used, as this is the most effective method yet found of reaching the soot and dust in the out-of-the-way corners of the heating plant.

## BEAUTY PRESERVED BY MODERN HOME AIR CONDITIONING

**UNATTRACTIVE**

Super-dry, overheated, stagnant air in average American home is counter-

acts skin of its natural moisture, causing it to become harsh and aged.

brings on respiratory infections which undermine health to give poor color.

takes life out of hair, leaving it harsh and dry.

**BEAUTIFUL**

Humid, warmed, moving air from the modern steam air heating system

permits normal evaporation of skin moisture to keep skin soft and beautiful.

keeps respiratory tissue healthy—reflected in good color.

protects natural growth of soft, lustrous hair.

ADEQUATE MOISTURE IN HOME AIR PROTECTS NATURAL BEAUTY

© HOLLAND INSTITUTE OF THERMOLOGY

## LOOK TO HOME AIR FOR SKIN, HAIR ILLS

Find Overheated Stagnant Air Arch-Enemy of Health as It Is of Beauty.

BEAUTY fundamentally is a reflection of and contingent upon good health. Natural beauty cannot be conserved nor enhanced if healthful living conditions are not provided. It is during the winter season that our ladies experience the greatest difficulty in maintaining their natural charms and beauty, according to the Holland Institute of Thermology of Holland, Mich., and, says the Institute, is due to the fact that in spite of the high efficiency of old style heating systems, they are the immediate cause of conditions that are devastating to beauty and health. It is the consensus of thousands of scientists that the dry, overheated, stagnant air to be found in most homes and in places of work not only causes ill health, the arch-enemy of beauty, but it also affects the skin and the hair. The excessively dry air causes the skin to become harsh and dry and to lose its natural attractiveness and color. The hair, too, is seriously affected, for the dry air causes it to become dry, brittle and lifeless.

Heating and ventilating science, however, has come to the rescue of beauty seekers, and so far as the home is concerned, there no longer is occasion to worry about the deadly effects of dry air upon female pulchritude. Most American homes are now heated the old style way, that is, with old style furnaces and radiator systems. These systems have the faculty of generating all the heat that is necessary, but that is all. The result is that with excessive heat there is a decided moisture deficiency, because warm air has greater capacity for

moisture than cold air. The Institute claims that air at a temperature of 70 degrees has sixteen times greater capacity for moisture than air at zero.

The lack of moisture in the home air has been recognized for years, and many home owners have tried to overcome it by means of water pans and other contrivances, but most of the devices in use do not have sufficient evaporating capacity for supplying the required moisture. This is best evidenced by the fact that in a home of five or six rooms at least eight gallons of water should be evaporated daily during the winter season to offset the moisture deficiency. However, the problem has been simply and economically solved in warm air heating systems of the vapor-air type. Built into these systems is a specially designed humidifier which receives its water supply direct from the house main. This humidifier has capacity for injecting into the home air the water vapor from 3 to 25 gallons of water daily, according to weather conditions. It supplies sufficient moisture to conserve health and to protect the skin and hair against drying out. It also keeps the membranes of the respiratory organs in a sound, healthy condition, thus enabling them to perform their natural functions, one of which is resisting disease infection.

A noted authority on air conditioning, Dr. Thomas Hubbard, past president of the American Medical Association, characterizes American homes as "hothouses." Dr. Hubbard warns young Miss America that her beauty, as well as her health, is endangered by the menace of over-heating and under-humidifying. Dr. Hubbard states: "The complexion is the color index of good blood and normal skin circulation. It is notorious that in America the natural index of color is fading and the cosmetic index is correspondingly high. The skin, like the linings of the respiratory tract, and likewise the hair, are damaged by hot, dry air, and become more liable to chronic diseases."

Modern warm air heating systems may well be looked upon not only as health guardians, but as conservers of feminine beauty.
