PEOPLE SHOW MORE INTELLIGENCE NOW

At one time people believed anything they "thought" they saw including the turning of a horse hair into a snake or a lump of mud into a frog.

A rather humorous account of an older belief was found in some ancient writing by a Roman teacher. It concerned "making" mice. His "recipe" is as follows:

Take an armful of finely chopped straw and place it in a corner of the stable. Keep moist for about six days and at the end of that time a small family of mice should have formed.

Just watch the Freshies try that one.

Oregon Mirror & Beveling Works

105 North Fifth Street, Portland, Oregon

That this establishment has become a center in the glass trade is very evident from the truly large trade they are receiving and the way their reputation is spreading far and wide over this part of the state.

They have a most commodious factory and offer a most complete service in automobile glass. Their stock comes from the leading manufacturers of the country and consists of windshield glass and auto glass. They buy their stock direct from manufacturers in all the standard sizes and in large quantities and this enables them to sell at prices more reasonable than at the ordinary store that carries glass as a sideline.

The Oregon Mirror and Beveling Works is conveniently located at 105 North Fifth in Portland where they handle glass of every descrip-

tion. Mirrors, windshield and sedan glass is carefully replaced. Don't let that broken glass in your car worry you. Drive over and have it replaced here quickly, promptly and at low cost.

They have all the equipment for the cutting glass any size and in charge of this department are expert mechanics who understand the sizes and kinds of glass. They will be glad to estimate any glass work that you need. Just drive up to the place with your car if a window is broken they will take the measure and have the glass in a jiffy.

You do not pay for any breakage here as there is none. The men who handle this part of the work are cutters of ability and that experience that comes from the long handling of glass products enables them to cut without damaging the glass they are giving you.

They feature beveling, grinding, polishing, silvering and resilvering of glass—high grade mirrors made to order. They also handle plate glass for desk and furniture tops, show cases, store fixtures and in fact everything in the glass line.

In addition to the usual lines of glass they feature mirror work and will resilver any old mirror you may have so that it will have all the reflecting qualities of a new one. Take all the old mirrors in and have them fixed up and you will be able to see yourself as you really are.

In addition to the usual lines of ward progress we wish to compliment them upon the efficiency of their service and the straightforwardness of their dealings and the wonderful value of the high grade lines which they have chosen to offer the people of this section.
