

Bressie Electric Co.

In Portland at 205 5th st. near Taylor, Telephone Beaverton 2433. They are aiding in the raising of the standard of living and luxury by distribution of a complete line of electrical appliances, fixtures and supplies. They have a store that is typical of the late development of present day civilization and one that aids in making the homes of the people more comfortable than any other field of endeavor. Steinmetz, the late wizard of the General Electric Co. once said that people would only work four hours a day on account of the marvelous development in labor saving appliances. This applies both to the work of the household where the labor problem has long been a feature of importance

as well as in the field of industrial endeavor. At this store you can see toasters, irons, curlers, and in fact most every modern electrical appliance that alleviates the work of the household. The mistaken idea that these appliances are more expensive to operate than other help systems can easily be shown to be false by a visit to this store and a demonstration. Fixtures of the very latest types, lamps, electrical supplies and specialties of all kinds. It is impossible to enumerate everything as they are getting in new inventions all the time and the best way to get a concrete idea of the latest developments in the field is to occasionally drop in here and look over the stock. It is necessary for

the happiness of the home and the efficiency of the office to keep everything fully modernized. In the field of contract work they render complete service. They will make up a full set of plans for your electrical work, give you specifications, estimate, make a contract and put a force of experienced men on the job who will complete the work in the shortest possible time. It will all be accomplished according to the latest code and be fire proof. The men in charge of the Bressie Electric Co. are electrical engineers of unusual versatility and judges of values in the electrical field. The store and contracting activities are aiding in the development of our superior, modern life.

This gavel originated for the purpose of stimulating visiting and promoting friendship between Granges, was made of a yew tree grown on the Strickler farm at Sherwood and is being passed from grange to grange in Washington county. HE IS ABLE

Earth knows no woe that heaven cannot cure—
The woe of loneliness, of weary bed-ridden invalidism, of life-plans brought to naught; the woe of burdens under the home roof, of business out of joint, of defeat through appetite of the flesh.
Whatever it be, cast your burden on the Word and leave it there. He is able to do exceedingly abundantly above all that which we ask or think.
Settle it now. Take your stand that Christ's death for your sins clears you and opens the way for God to pour-in, pour-in, pour-in of his rich blessings. 2nd, Bible—Bible—Bible for your new marching orders. 3rd, Prayer—Prayer—Prayer, for the power to go ahead.

4-H CORN CLUB HOLDS REGULAR MEETING

The Corn Huskers Corn club held their regular monthly meeting at the home of their leader, Harry Hansen on April 17th. The members present were Frances Detrich, Wilfred Grossen, Earle Jossy, Albert Grossen, James Davidson, Don Jossy Alan Detrich and John Hansen. Wesley Batchelder was absent. The visitors included Louie Huserick, Vernon Peterson, Julian Peterson, L. Davidson, Irene Hansen and Joseph Belanger, assistant county agent.
Don Jossy was appointed to find three possible subjects to demonstrate at the fair. There was also some discussion as to who was to be on the demonstration team but there was nothing decided definitely.
It was decided to try and get some grain judging at every meeting after this until the fair so that we may repeat our good work again this year. Last year our team won state championship.
There was some discussion on the club booth at the county fair. Mr. Belanger gave us a number of ideas to consider. Each member is to think of an idea for the booth before the next meeting. Last year our booth placed first in the crops division. It was made up of different kinds of weeds and their names and literature on how to kill them.
The next meeting will be held at the home of Frances and Alan Detrich on May 15th.
After the business meeting, Mr. Belanger showed a four reel show, "We Three Partners" which was very interesting to all. It showed how Click Foxworthy was induced to join a 4-H calf club. Before this his father did not have much confidence in him. One day his father told Babs Duncan that if his boy did well in the judging contest he would buy him a herd of calves to raise. At the state fair the team which Click Foxworthy was on placed first, giving them a trip to Chicago. At Chicago one of the boys was called home before the judging contest. Babs Duncan decided to give up her part in the

style show to help out the boys in the judging contest. When the scorings were released the "Lucky 13 Calf club" had won the championship. At the 4-H cub banquet Babs Duncan and Elsie Spencer, Babs enemy, were called to the front where they told that Elsie Spencer modeled Babs dress. The dresses were so near a tie for first that the executive committee decided to award two first prizes. This showed us some real cub spirit in club work. After the show refreshments were served.

American-Made Washers Sail Seas On Three Palatial Big Steamships

S. S. VIRGINIA

Household electrical washers, such as are used every week to banish the washday problem in 8,000,000 American homes, have taken to the high seas.
The Virginia, the California and the Pennsylvania, the biggest liners ever built in the United States, have just been equipped with eleven washing machines, regulation domestic models. Thus, as is pointed out by J. R. Bohnen, of Chicago, secretary of the American Washing Machine Manufacturers' association, passengers get "back-home" service while they sail in ease and comfort from New York City to Havana, and through the Panama Canal to San Diego, Los Angeles and San Francisco.
All the comforts and advantages of the most exclusive Atlantic crossings are provided by these 33,000-ton vessels of the Panama Pacific Line, built especially for Panama Canal service. In addition they are the world's largest commercial vessels with electrical propulsion. Each is 613 feet long and 90 feet broad.
"American-made household washers have been adopted in more than sixty foreign countries by housewives who rapidly are imitating their United States cousins in their demand for ease of cleaning and the personal satisfaction of having the washing 'done right.'" said Secretary Bohnen. "Now the American household product completes its globe-trotting by serving families on the Atlantic and Pacific Oceans."
