

FLASHES OF LIVE NEWS

ALOHA-HUBER

Wesley Crone has taken over the paper route which has been run by Tommy Haines.

Mrs. Alice Wheeler underwent a goiter operation Tuesday morning at the Good Samaritan hospital.

Virginia and Betty Lee of Sauvie's Island are visiting at the home of their grandmother, Mrs. Nancy Lee.

Maxine Lusby will entertain friends on Saturday afternoon in honor of her 9th birthday anniversary.

Chas Haines and family expect to move to Portland in a short time, where they will make their home.

Mr. and Mrs. Sanford Rogers were Tuesday dinner guests of Mr. and Mrs. Andrew Denholm of Portland.

Howard Morrison has recently purchased the Marvin home. He expects to make some repairs and will open his market in the front part of the house.

KINTON HAPPENINGS

By Mrs. E. L. Cox

Mr. and Mrs. D. P. Newman of Linnton were calling on friends here Sunday afternoon.

Misses Marie and Lena Myers of Portland were guests last Thursday of Miss Luella Dallmann.

A meeting of the board of directors of the school was held at the school house Wednesday evening of last week.

Mrs. Harriette Ford, who visited among some of her friends around town last week, has returned to North Plains.

Mrs. J. C. Snider has been ill during the past week at her home on Pleasant Valley road. She is reported as improving.

Among the normal graduates from Monmouth is a Kinton young man, Melvin Vandermost, son of Mr. and Mrs. C. Vandermost.

Miss Dallmann is to be married to Jacob Faix, Sunday afternoon at 2 o'clock at the grange hall, to be followed by a reception.

Emil Dallmann, who has been employed near Oregon City of late, spent last week with his parents, Mr. and Mrs. August H. Dallmann.

Mr. and Mrs. Robert Harris and family of Beaverton, were visitors last Friday at the home of Mrs. Harris' parents, Mr. and Mrs. August H. Dallmann.

The next meeting of the Men's Brotherhood will be held Tuesday evening, June 20, at the home of Mr. and Mrs. Raleigh Whitmore, Laurel. All men are invited.

Regular monthly meeting of the Ladies' Aid society will be held with Mrs. Earl C. Bell, Cooper mountain, Thursday afternoon, June 22. All ladies are welcome to attend.

Virgil McCormick, son of Mrs. Ethel McCormick, who plays an alto horn in the Hillsboro high school band, took part in the rose festival parade held in Portland Friday.

E. L. Cox spent Saturday at the home of Mr. and Mrs. Charles Van Kleek of Hiteon. Mr. VanKleek made some repairs to the interior of his barn and Mr. Cox assisted him.

Ivan Bierly and Amos Bierly, sons of Mr. and Mrs. Floyd Bierly, were among the 4-H club members who left Monday for Corvallis, where they will attend the session of summer school.

Mrs. Wesley Heard, who has been spending the past school year with her aunt, Mrs. Floyd Williams of Clackamas, has returned to the home of her parents, Mr. and Mrs. Harry A. Richards, where she will make her home.

The annual school meeting will be held at the school house, Monday evening, June 19. The budget meeting will begin at 7:30, followed by the election of one director and clerk. All tax payers in this district are urged to be present.

Mrs. Erma Taylor Sparks held her final piano recital Friday evening at the Baptist church in Hillsboro. Her pupils from here, Eunice Ellen Snider, Mary Kathryn Hall and Kathryn Pomeroy were among those to take part. Some of the parents accompanied their children on the trip.

Mr. and Mrs. Leland Flint went to Pendleton the first of the week as delegates from Kinton grange, to attend the annual session of state grange. Mr. and Mrs. Albert Streiff, who were chosen as alternates also were in attendance. Mrs. May Snider, chairman of the Home

Economic committee of the local grange also attended the session.

Mr. and Mrs. Edwin Richards and son of Clackamas were visitors Friday at the home of Mr. and Mrs. Harry A. Richards. Mr. and Mrs. Walter VanKleek and daughter of Beaverton, and Mr. and Mrs. Aldred Richards and family of Dosh Station were Sunday guests, also Kirk Hoover of Stayton, formerly of this town.

About 55 ladies attended the bridal shower given Miss Luella Dallmann, at her home last Wednesday afternoon. Miss Dallmann was the recipient of many useful gifts, including table linen, dishes, kitchen utensils, etc. A number of out-of-town people were present, including Sherwood, Scholls, Portland, Gresham, and Beaverton. Luncheon was served by Mrs. Dallmann, consisting of sandwiches, cake, salad, coffee.

HITEON NEWS

Mrs. Alice Willoughby returned home from the hospital Monday.

A number from here enjoyed the floral parade in Portland, Friday.

Miss Elizabeth Struthers was a guest Friday of Miss Ruth Fulgham near Sylvan.

Mr. and Mrs. E. D. Officer of Portland were Monday visitors at the E. H. Hays home.

Mr. Fred Handy was overcome with heat Monday while at work in their berry field here.

Miss Dorothea Struthers was a guest during the Festival week at the A. C. Robinson home in Portland.

Invitations have been received here, for the Faix-Dallmann wedding which will be held at the Kinton Grange hall Sunday, June 18.

The funeral of Mr. Fritz who has been ill in the hospital for some time was held Monday. His son, Mr. Bert Fritz, is employed at Harry Eliander's store at Progress.

ON OREGON FARMS

ST. HELENS—More interest this year than last is being shown in the farm garden projects in Columbia county, reports County Agent Nelson. Total enrollment reached 305 well in advance of a year ago, as more farmers are interested in raising a good supply of vegetables at home.

FARMING FOR PROFIT

Of what value is the earthworm (angleworm) to the fertilization of the soil?

The Testimony of the Earthworm (Cut taken from The New Standard Dictionary.)

earth 'worm', 1 6rth'wŭrm; 2 6rth'wŭrm, n. 1. A burrowing terrestrial megadrile worm; commonly but

a few inches long, tho a few are from 3 to 6 feet long. Lumbricus terrestris is the best-known earthworm of Europe. Darwin has shown that our earthworms take from the depth and bring to the surface of the soil a very large amount of material. N. S. HALLER Aspects of Earth, Soils p. 329. [a.]

During the summer months the earthworm voids from one to two ounces of excrement—according to the size of the worm. Each ounce of its excrement contains 500 million atoms. An atom, one million times smaller than the breadth of the hair of your head. Atoms are plant food. Cultivate the earthworm, the hatchery is very simply made and they multiply by the million. There are certain foods they are very fond of—a pear leaf, milk seasoned with salt, and proper time of feeding. Plant them in the barnyard, then in the field. They soon fill the soil with ovum (eggs), and their labor begins,—their holes drain heavy showers of rain downward, especially in clover fields.

There are 43560 sq. ft. per acre. One worm per cubic foot will produce one and three-fourths tons atoms per acre; ten worms, over seventeen tons atoms. This fact has been overlooked. There are thousands of pounds of inert nitrogen, potassium, magnesium, calcium, phosphorus, iron and sulphur in every acre of soil, unavailable for plant food until digested by the earthworm. See chapter, The Earthworm.

Atoms of plant food must have the chemical action of humic acids to enter plant life. Decayed vegetation produces humus, a black or brown substance formed by the decay of vegetable matter; vegetable mold contains acids.

"Apocrenic acid from humus performs an important function in the growth of plants, forming one of the stages through which atomic matter passes into living vegetable tissues." International Cyclopaedia, Vol. I, p. 554.

The Testimony of a Farmer

"The story, Farming for Profit, gives practical truths. (The probably ancient method of decomposing straw and barn manure has been lost. Luke 4:34, 35.) The value of the earthworm as a soil disintegrator has been overlooked. After treating my straw and barnyard manure it became full of earthworms, thousands of them. I applied the manure as instructed and my crop more than doubled following the first application. I advise all tillers of the soil to begin at once to develop manures from lawn grass, leaves, all kinds of garden refuse; and the farmer to decompose straw, vines, cornstalks with barn manures and start a soil-worm fertilization. It is wonderful, the labors of the earthworm. Every acre should be made to yield a profit in fertility and fruitage."

U. C. Holman, Eugene, Ore., M. R. A.

Testimony of An Editor

"A basket of apples of large size and superior quality, with photographs of wheat, vetch and oats grown here on the Pacific coast, was placed on our desk. We are deeply impressed that the vitalization of both soil and trees will be carefully considered by every home maker. Every addition to true knowledge is an addition to human power. Diffused knowledge increases prosperity. Prosperity lives from the soil. The sources of riches is husbandry. Trade sends money out of the country—farm machinery, auto, merchandise, etc. 'The farmer feeds them all.' Business is successful in proportion as agriculture is successful. Banking and agriculture are alike; both are permanent; both deal in real values.

"Yours, hoping to see greater improvement.

Paul R. Kelly, Editor and Publisher, Eugene Guard, Eugene, Ore."

Testimony of The First National Bank of Eugene

"To the Farmers of Lane County, Greeting: We are sadly in need of greater farm prosperity, the true basis of original wealth. The increase of a greater number of farms in prosperity is a necessary element in the security, and even to the existence of our whole financial condition as a state and nation. Prosperity demands more knowledge—and synthetic fertilization will come to our aid. (Synthetic, putting several things together.)

"The small unkept orchard is a disgrace; and, in showing our favored climate to the people from the East and North, we are too often made to blush with shame—the shame of ignorance. This condition ought not to be—need not be—vitalize the trees; the cost is nominal per tree; the secret lies in knowing how.

"An education—all that enlightens our understanding—the unfolding of what is going on beneath the soil, eight inches deep, is of paramount value—to the urban gardener and to the rural farmer.

"When the tiller of the soil is better informed about the value of the earthworm, and the ease of its rapid multiplication, its value to vegetation, he will give his land rest from the cultivator, grow more hay and grain, double and treble per acre, raise more stock; pay his bills with his check, his own paper money of credit, keeping an account of his expenditures. The use of money is immensely economized by the check and bank clearing system. Your banker is your bookkeeper. A check is a witness, if statement is recorded on the check for what purpose given—it is an everlasting memory. 'Be it remembered' after your demise; file them away.

"I beg to announce one gift of practical information so all may profit thereby; namely, the saving of the new seeding of clover by cutting wheat or oats stubble as high as the binding of the grain will permit. Mow the stubble and the math will hold soil moisture; this will save the young clover. See the story, How to grow clover on very poor soil. Clover is one of the best plants for increasing soil fertility quickly, gathering air-nitrogen, making humus, developing soil acids. Unless we use the experience of others we lose valuable time and money. Upon the ability to see quickly what is needed in the soil, to understand the reason for it, and to know how to deal with it, not only the progress of the individual, but also the nation depends. Right knowledge is the only sure foundation for right actions. Farmers' bank deposits are becoming less and less frequent, and something ought to be done to quickly improve the fertility of the soil, bettering the crops, for good crops call back money, the life blood of the business world.

"I prize truth; it is an inspiration. Leave a legacy to child or friend. A. A. Rogers, Cashier, First National Bank, Eugene, Ore."
