OREGON 4-H CLUBS SET NEW RECORDS

Four-H club boys and girls of Oregon rolled up a new record in number of projects carried during the past year, with a total of 22,313 members enrolled in 2303 standard clubs, according to the annual report recently filed by State Club Leader H. C. Seymour. This was an increase of 1676 members and 216 clubs over the previous year. Club work was conducted in every county in the state.

The value of club work in dollars and cents was also considerably increased. Mr. Seymour's figures show. Completed projects for 1935 had a gross value of \$228,221.43, a cost of \$143,661.43 and a net profit of \$84,559.96, as compared to a gross value of \$193,997.29, a cost of \$119,912.63 and a net profit of \$74,084.66 in 1934.

Thirty-seven different kinds of projects were carried by Oregon clubbers last year, although not all of these are recommended as standard or state-wide projects. The clothing project proved the most popular, with 5,226 members enrolled in 629 clubs. Crochery was next with 4,999 members in 540 clubs, followed by health and growth with 3,651 members in 249 clubs; dairy calf with 1,101 members in 136 clubs; gardening with 872 members in 96 clubs; marketing with 859 members in 63 clubs; handicraft with 788 members in 90 clubs and forestry with 755 members in 81 clubs.

Other projects in which Oregon 4-H club members were engaged last year were swine, sheep, beef calf, dairy record keeping, goat, poultry, corn, potatoes, wheat, canning, home-making, room improvement, home beautification, rabbit, bee, farm accounting, forage, rose and flower, pigeon, colt, art, household engineering, building, rodent control, agricultural engineering, seed production, gas engine, range management, and quilting.

Lane county had the highest club enrollment, with 3,556 boys and girls enrolled in 262 clubs. The City of Portland was next with 2,131 members and 256 clubs followed by Douglas with 1,762 members and 142 clubs; Clackamas with 1,709 members and 157 clubs; Linn with 1,202 members and 138 clubs and Marion with 1,108 members and 123 clubs.

Douglas county had the highest percentage of members completing their projects, and Clackamas clubbers showed the greatest monetary value for their work. Mr. Seymour pointed out that "local leaders form the real backbone of club work throughout the state" and deserve a great deal of credit for their unselfish service to the boys and all girls of Oregon.

Mr. and Mrs. N. A. Ryfield and Mr. and Mrs. Chas. Ross of Portland drove to Seattle Saturday afternoon and spent Sunday there visiting friends and relatives.

ORDER IN KITCHEN IS VITAL FACTOR

By Joan Patterson
Extension Specialist in Home Furnishings, OSC

The maintenance of order and cleanliness in the kitchen is not only essential to the self-respect of the homemaker and the well-being of her family, but is an economy measure in that it helps to keep equipment in good condition. While there are many good cleaners on the market, there are few kitchen cleaning jobs that will not respond to some of the materials ordinarily on hand in most homes. Here are a few suggestions:

Wood surfaces, including unvarnished floors, woodwork, stoves, tables and other furniture require frequent cleaning, but their care is made easier if they are well finished with enamel, oil stain, spar varnish, or linseed oil.

Painted and enameled woods may be cleaned with mild soap and water to which is added a small amount of turpentine or household ammonia.

Varnished or oiled surfaces may be cleaned with a cloth wrung out of 1 quart boiling water, 3 tablespoons linseed oil, 1 tablespoon turpentine. Water should be used sparingly on such finishes, and only mild soap.

Enameled stoves should never be washed while warm as this may crack the enamel. A daily wiping with a cloth wrung from soapy water will keep the enamel in good condition. A little baking soda or kerosene oil applied with a cloth will remove discolorations which do not respond to soap. Never use gritty cleaners on enameled finishes.

Wood or coal stoves should be wiped frequently with cloth or soft paper. Rub occasionally with a cloth moistened with a few drops of kerosene or light lubricating oil. If blacking is used, it is best applied sparingly to a cleaned, slightly warm stove and then rubbed briskly and thoroughly with a dry brush.

When soap and water fail to keep the sink clean, use a little kerosene or baking soda. The drain may be kept clear with thorough daily freshening with hot water or a commercial drain cleaning preparation may be used if it becomes stopped or clogged.

Ice refrigerators need cleaning once a month or oftener. Racks, shelves and interior may be washed with warm water to which either baking or washing soda has been added. Soiled removable parts. Dry all thoroughly. The drain pipe can be cleaned with a long, special brush, then flushed out with boiling water and soda.

It is best to defrost mechanical refrigerators according to the manufacturer's instructions. Following the defrosting the entire interior should be washed with cold water containing baking soda, then dried with a clean cloth.

Ever hear of praise for sale? Well, you can buy it. Not only that, but a shrewd group of promoters have been doing a lucrative business selling it to glib Oregonians, during the past few months, the Portland Better Business Bureau states.

The medium these promoters use is a publication called a "puff" or "glory" sheet, because of the uniformly sugar-coated and flowery write-ups which are their stock in trade. They capitalize on pride and vanity and sell puffs at a profit.

Aske from their names, which almost invariably resemble some nationally known magazine or trade journal, these "puff sheets" have nothing in common with a bona fide publication. They derive next to nothing from advertising space, for advertisers will not patronize them. Their columns are devoted to over-suffed stories about Tom, Dick and Harry. They enjoy no regularity of issue but are gotten out only when enough orders have been received to justify printing and their uncertain circulation, of course, is made up almost entirely of copies sold to "puffees".

The Better Business Bureau reports many Oregon citizens have thoughtlessly "approved" publication of flattering articles about themselves and have placed orders for quantities of the so-called magazines only to find they have been duped into purchasing worthless publicity.
