URA LYRE'S OWN COLUMN

It has been charged for some time that this country is being run for the benefit of the rich. We have heard of no one, big or small making it rich these days except the rich man, the son of a rich man, now occupying the White House (and perhaps a few of his specials). Yes, we agree; he lives on the fat of the land. Yep! Run for the benefit of the rich one.

Norris, the runt from Nebraska, stuck his sharp nose into democratic politics in Oregon, as did some one or two others of the administration proper in trying to down a governor who had stamina enough not to be a complete rubber stamp and who refused to follow all the vagaries of the Raw Deal. Well Martin was turned down, and the outfit that did it should be rebuked by a hundred thousand majority at the general election. With one breath the gang that backs unfaithfully kept promises say there will be no reprisals upon those of the party who have had manhood enough to stand upon their own hind legs; in the next some close-ups slip over a dirty upper cut below the belt. Will these take it lying down?

In passing through south central Kansas, Ura Lyre was astonished at the tremendous number of oil well derricks. Within a mile of the town of Russell, more than 50 were counted; and that was but a small fraction of those in that region, where there have been so many poor crops. Some of those people who have been so fortunate have used their new found wealth to good advantage. Many a person, man and woman have been ruined body and soul; yes, even financially in the end. Another thing noted in that part were stone posts. Timber is indeed scarce. Many trees that had been nurtured along to a fair size, had recently died. At the best there were none for posts. There are many rock outcroppings however, of a kind easily split with man and wedge; and made about 7 feet long. They have not rotted in hundreds of years; and, stuck into the ground, and strung with barbed wire make a substantial fence.

The Conquering Jackass Behold the conquering Jackass comes; Sound the bugle and beat the drums. He's running this country to beat the band; He's buried our gold beneath the sand.

RadiOddities . . . by Squier

Illustration of a woman with a radio and various humorous text bubbles. Includes the name 'MARY MARGARET McBRIDE' and 'POPULAR AIR COLUMNIST'.

He promised a deal to soak the rich (We have all gone with them in to the ditch). He's borrowed and squandered both left and right. 'Till now we are in a sorry plight. He has built big structures at a terrible cost; For political pelf, the poor man's lost. He feeds choice grass to each pet ass; (A part of us are not that class) We are taxed on every thing under the sun: Bread, meat and water, light, heat and fun. He's destroyed our cotton, small grain and corn. Killed our little pigs e'er they were born. He has done all this to increase our wealth; (The less we eat, the better our health). Just tighten your belt a notch or two more; (To have good air just close the door). 'Mortgage your future, my small ass friend. For living fat, just spend and spend. The common ass—feed him sawdust mash; For the human kind, give 'em 'new deal' trash." "Words for all but me and my son Jim: A good full feed for me and him: This Raw Deal doctrine has come to pass; I'd vote for it if I were an ass. URA LYRE'S P.S. The above is not copyrighted.

On Oregon Farms

Five Dry Land Lawns Started THE DALLEES—Five dry land lawns were established for five farm homes in Wasco county this spring as a part of the home beautification project under the joint direction of Mrs. Louise Harwood, home demonstration agent, and Grant Perry, assistant county agent. The mixture used consisted of fairway crested wheat grass, chewing fescue and winter blue grass. Cooperators on whose farms the plantings were made are D. E. Miller and Raymond Crabtree, Jasper Flat; Roy Bates, Three Mile; Earl Benson, Five Mile; and Eugene Hammel, Columbia.

New Barley Variety Looks Good

ALBANY—A planting of San-tiam barley, a new variety released from the Oregon experiment station last fall for experimental trials under farm conditions, was showing up well at the Grimes farm near Harrisburg late in May, according to County Agent F. C. Mallen, and gave promise of being a high-yielding variety. It showed tall, stiff straw with three to five stalks

to a plant and was commencing to put out large heads. Other Linn County farmers who made trial plantings of the new barley this year are Leslie Cade and Mr. Blaine of near Albany.

Hybrid Corn Tried in Douglas

ROSEBURG—Eleven Douglas county farmers are cooperating with County Agent J. R. Parker in trial plots of hybrid corn varieties such as Hybrid 525 and Wisconsin 90 day, Wisconsin 95 day and Wisconsin 105 day hybrids were planted in 3 and 4 row plots across the regular corn fields to be checked against the operator's usual variety and a variety of yellow dent corn grown by Ralph Weaver, a local farmer.

Tillamook Sells Dairy Calves

TILLAMOOK—Fifty-nine heifer calves from Cow Testing association dams of 300 pounds of but-terfat or more were sold by Tillamook county dairymen during April, according to County Agent C. H. Bergstrom. Of these 22 went to Montana and the others to Idaho, Wyoming and Oregon.

Warning—Fire Season is Coming

Fire is always dangerous. It's doubly dangerous in summer. We are close to the menacing "fire season" now. Vacant lots and fields, if left uncut, are ready to burst into flame at the touch of a match. Woodlands are drying out—and when this dehydrating process reaches a certain stage, trees will literally explode when attacked by fire, and start conflagrations that may extend over tens of thousands of acres. Crown fires running with hurricane speed along the tops of great trees, will extinguish all life human or animal in the area they cover. These holocausts can be prevented—and easily prevented if only we'll all help. Keep fire in mind and act accordingly.

THINGS THAT NEVER HAPPEN

Cartoon illustration of a doctor examining a patient. The patient says 'BELIEVE ME DOCTOR I NEVER FELT IT!' and the doctor replies 'TEETH EXTRACTED WITHOUT PAIN!'

Raising the Family - Ma is a little sensitive about some things!

If you own property see to it that it is kept clean and unlit-tered, and free from dry grass. When traveling about, never throw matches outdoors, never build fires near trees or other inflammables—and never leave a fire until it has been thoroughly extinguished preferably with both water and dirt. Obey the fire laws—they were made for your protection, not to annoy you.

As a matter of fact the great-est tragedy of fire is that it is almost always unnecessary. Every year we burn up resources and property valued at hundreds of millions of dollars. We destroy thousands of lives. The direct fire loss runs into the billions and is reflected in unemployment, less business, reduced spending power. This toll is the result of carelessness, ignorance or just plain laziness. It may be that the unpreventable fire exists—but it is a very rare exception indeed. It is an igni-ferous underling at least nine fires out of ten.

A little care and thought on your part may save your home or someone else's from destruction. It may save a life. Don't forget that.

The Letter Box

I BURIED OUR PAL

Early on the morning of May 27th I arose and I: the task I dreaded it, but I knew it must be done. So I did it. I dug a grave and buried our faithful dog Lassie. I confess it hurt to think we had to part forever with the faithful pal that she was. And how she loved the children. Always waiting and watching patiently for them to come from school. How she would run to meet them. That is as far as she ever went from the house. When I returned home on the evening of May 26 I saw the children sobbing as though their hearts would break. They tried to tell me between sobs, but one glance at the front porch was enough to explain all.

There lay our faithful old pal, faithful all of these years. Dead. A victim of the poison bait set-ter. I tried to stifle my feelings as best I could for the children's sake but found it pretty hard to do. I knew nothing could be done. It was all too late. So that was my task and do you wonder, you who have done you care for just as much as

we did Lassie why it hurt so. I believe I have had my share of heart aches in this world and when I had laid that noble and loving creature away I confess it is just another hurt.

Now Mr. Poison Bait Setter I put you in a class called murderers. That is my honest estimation of you, whoever you are. You have brought to my children another sorrow that they will never forget, nor will I. You have broken their hearts and when I think or hear of you I am almost ashamed to think I belong to the same race as you. Some where in the area of my home and the road leading to Fanno Creek bridge you have carried out your murderous depredations. It would probably have been just the same to you had it been a little child. All that you were protecting with your poison bait, Mr. Christian Citizen would not and could not have brought back our dog.

It is a known fact that a rattle snake will at least send out a warning but not you. You are going to exterminate at any price, so my opinion of you is, you are lower than a rattle snake and to give you poison is more dangerous than giving an insane man a loaded gun and still you probably labor under the impression that you are fully qualified when you leave this world that you will enter another one. Well for your sake Mr. Poison Bait Setter I hope there are no dogs there, they may make you feel ashamed of yourself. As for myself I wouldn't poison a snake. As for you I sincerely hope the next poison you buy you make a mistake and take it yourself and die in the same agony the poor dogs did you have poisoned.

(Signed) Carl Christensen Beaverton, Oregon, Box 362.

Notice Of Annual School Meeting

NOTICE IS HEREBY GIVEN to the legal voters of School district No. 48 of Washington County, State of Oregon, that the annual school meeting of said District will be held at the Beaverton High School; to begin at the hour of eight o'clock p.m. on the third Monday of June, being the 20th day of June, A. D. 1938. This meeting is called for the purpose of electing one director and clerk and the transaction of business usual at such meeting. Dated this 1st day of June 1938. Attest: Althea Haulenbeck, District Clerk. Dr. C. E. Mason, Chairman Board of Directors. adv. 6-27-38.

The SNAPSHOT GUILD SUMMER CLOUDS AND SKIES

Clouds help your outdoor pictures. Use a color filter to record them more effectively.

SUMMER is the outdoor season, and one of the season's chief picture charms is its wonderfully rich blue skies against which cloud masses stand out in magnificent fullness and contrast. Given two pictures of identical subjects in which the sky appears, it's a safe wager that your attention will be held by the one effectively showing the clouds against a gray sky and not the one with the unnatural and unattractive flat, white firmament. Here is the way to picture clouds and skies as your eyes see them: load your camera with chrome type or panchromatic film, and slip a yellow color-filter on your lens. The diagram below shows how a yellow filter works—it preserves the sky tone, recording blue in the cor-
