

Fitted and Lifted Waistline Is Smart

IF YOU want to have the very smart, tiny-waisted look, and to look slimmer than you are, by all means wear these two frocks, each with the high-at-the-middle line that emphasizes the slender, flattering silhouette. And if you want to wear really individual clothes, up-to-the-minute in fashion, of superior fabrics and becoming colors of your own selection, then make your own, with these very easy-to-follow designs, each of which is accompanied by a detailed sew chart.

tion, then make your own, with these very easy-to-follow designs, each of which is accompanied by a detailed sew chart.

Afternoon Dress.

Here's a lovely fashion that simply melts into your figure at the waistline, because the lifted midriff section is cut in one with the skirt panel in front. The bodice fits beautifully, thanks to scarcely perceptible gathers above the waistline, and darts on the shoulders. The sleeves fit the arm snugly, and are smartly high and Victorian at the shoulders. In velvet, satin, thin wool or silk crepe, this will be one of the most slenderizing, flattering frocks you ever put on!

Workaday Dress.

An unusually smart casual fashion is this one with the princess skirt cut up to a high waistline and topped by gathers that give fullness over the bosom, accentuating the slimmest of the skirt. Swirls of braid on the pretty sleeves, and a row of braid edging the round collar trim it up just enough. Make this of gingham, calico or percale for home work, and in wool crepe, flannel or flat crepe for runabout.

The Patterns.

No. 1585 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. With long sleeves, size 38 requires 5 yards of 39-inch material. With short sleeves, 4 1/4 yards; 1 1/4 yards trimming.

No. 1629 is designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 4 1/2 yards of 35-inch material; 1 1/2 yards braid.

Fall and Winter Fashion Book. The new 32-page Fall and Winter Pattern Book which shows photographs of the dresses being worn is now out. (One pattern and the Fall and Winter Pattern Book—25 cents.) You can order the book separately for 15 cents.

Send your order to The Sewing Circle Pattern Dept., 149 New Montgomery Ave., San Francisco, Calif. Patterns 15 cents (in coins) each.

Sentinels of Health

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out.

Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance. The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use Doan's Pills. They have had more than forty years of public approval. Are endorsed the country over. Insist on Doan's. Sold at all drug stores.

TURKEYS MUST BE FREE OF DISEASE

Growers Warned on Control of Blackhead.

Supplied by the Laboratory of Animal Pathology and Hygiene, University of Illinois.—WNU Service.

Whether or not turkey growers make a profit when they sell their Thanksgiving turkeys this fall may depend on the measures that have been taken to control the disease known as blackhead.

This disease bearing the technical name of infectious enterohepatitis or histomoniasis is a cause of great loss in the turkey raising industry. Until recent researches demonstrated the complete course of the disease and successful means of combating it, the malady had forced the abandonment of turkey raising in many parts of the country.

A satisfactory treatment has not yet been found for blackhead, but prevention has been successful where all possible sources of infection are kept away from the flock.

Successful turkey growers are those who keep their turkeys on clean, uncontaminated ground on which chickens have never run. Some growers recommend transferring incubator-hatched poults immediately to a clean brooder house for about six weeks. The brooder house is connected with four separate yards in such a manner that grazing on the yards can be rotated. The yards are about 8 feet by 20 feet and poults are left in one yard about 10 days before being moved to the next.

After about six weeks, they are transferred to a rearing ground arranged in a similar fashion, but with the four lots covering about one or two acres.

Another good method of preventing blackhead is to rear incubator-hatched birds in brooder houses with hardware cloth floors until the poults are about half grown when they can be turned onto rearing grounds. Some growers prefer to keep the turkeys in confinement on hardware cloth until they are ready for market.

It pays to feed in such a way as to eliminate fecal contamination as much as possible. Feeding and watering equipment for this purpose may be purchased or made at home.

An adequate ration and plenty of fresh, clean water is needed at all times. It is best to quarantine new birds for three weeks before they are added to the flock.

Such measures will not only hold blackhead infection to a minimum, but in addition will largely eliminate trouble from other internal as well as external parasites.

Orchard Cover Crop Is Such as Winter Vetch

An orchard cover crop is one such as winter vetch or rye which lives over winter and starts growth very early in the spring. Cover crops make some growth in the fall and even in the winter, and may be of great value in sections where low temperatures occur and the ground is free from snow for much of the winter.

The seeding of cover crops is usually done in the summer or early fall to secure a fairly good growth before winter, according to T. J. Talbert, Missouri College of Agriculture. The crop is then turned under early in the spring and the land given clean cultivation. Then an interval of about four to six weeks occurs in most sections, during which the soil is bare or free of a cover crop, after which the soil is usually seeded to another crop.

It is true that the growing cover crops may compete with the fruit trees for soil moisture and nutrients during the late summer and early fall. But this effect is usually desired because it tends to slow up or check the growth of the fruit plants and cause them to harden their tissues for winter conditions. Annual cover crops are not as a rule deep-rooted and so may not influence deep-rooted tree fruits.

Time to Plant Trees

Planting trees in the fall is seldom a success unless there is an early snowfall, advises P. A. Anderson, extension forester, University Farm, St. Paul. The best time for tree planting is in the spring as soon as the frost is out of the ground. Fall-planted trees usually do not get started sufficiently and often cannot survive the winter. Fruit trees must be protected from mice and rabbits, also. If planting is delayed until spring, the problem of winter protection is eliminated, and in most cases the trees make equally good growth.

Poultry Paralysis

Every poultryman whose birds are afflicted with paralysis wants to know what to do about it, for he does want to do something. The truth is no one can tell him exactly because no one knows the exact cause of the disease. All authorities advise, however, and it is common sense advice, to keep the birds in a sanitary environment. They advise isolating the affected birds from the well ones. A further precaution is to give them a worm treatment.—Missouri Farmer.

THAT'S BETTER

"My bill for improving your hearing comes to \$25," said the ear specialist.

"Did you speak?" asked the patient, cupping his hand to his ear.

"Perhaps I'd better make it \$10."

"That's better, doctor," said the patient quickly.

So Simple as That?

Farmer—Well, we're all set now. We have two milking machines. City Nephew—Do they give as good milk as cows?

Sun Spots

Teacher—Mary, can you tell me what we get from the sun and not the moon?

Mary—Yes, ma'am. Freckles.

HIS GUIDE

"My wife told me to take the old cat off somewhere and lose it. So I put him in a basket and tramped out into the country about eight miles."

"Well, did you lose the cat?"

"Lose it? If I hadn't followed it I'd never got back home."

IRIUM SHOTS PEPSODENT POWDER SALES TO 27 MILLION MARK!

Pepsodent ALONE of all tooth powders contains marvelous Irium*

Unmask your smile! Banish those dull surface-stains that may have hidden the true natural sparkle of your teeth! How can you remove these unsightly stains? Like 27 million other purchasers did...use Pepsodent...the one and ONLY

tooth powder containing Irium! SEE how rapidly Pepsodent brushes away cloudy surface-stains... how it polishes YOUR teeth to a dazzling natural brilliance! Contains NO GRIT, NO BLEACH. Try Pepsodent Powder!

*Pepsodent's trade mark for its brand of Purified Alkali Sulfate
