

Delicacies for Labor Day

By BETTY BARCLAY

Labor Day may mean your last picnic of the season. It may be a "parade" day in your home. It may be "company" day. No matter how you celebrate it, you will be interested in the following recipes for unusual dishes that may be quickly prepared—some of them in the cool of the morning before the excitement of the day begins:

Club Fruit Plate (Serves 1)

In large section of a grill plate, place a banana, split lengthwise and dipped in orange juice to prevent discoloration. Top banana with 4 orange slices.

In smaller sections of plate, place 2 large cooked prunes, stuffed with cottage cheese, moistened with orange juice, several walnut halves and 3 or 4 dates.

Golden Pineapple Dressing

1/2 cup sugar
1 tablespoon cornstarch
2 egg yolks
1/2 cup canned unsweetened Hawaiian pineapple juice
2 tablespoons lemon juice
1/4 cup butter
1/2 teaspoon salt
1/2 cup whipping cream

Combine sugar and cornstarch, add slightly beaten egg yolks. Stir in fruit juices and butter. Cook until thick and smooth over boiling water, stirring constantly. Remove at once, add salt and cool. When thoroughly chilled, fold into stiffly beaten cream. This dressing is delicious served with fruit salad combinations.

Yield: Approximately 1 1/2 pints dressing.

Fluffy Chocolate Pudding

2 squares unsweetened chocolate
1 1/2 cups (1 can) sweetened condensed milk
1/2 cup water
2 egg whites

Melt chocolate in top of double boiler. Add sweetened condensed milk and stir over boiling water 5 minutes until mixture thickens. Remove from fire and add water. Let cool about 5 minutes. Fold in stiffly

beaten egg whites. Pile in sherbet glasses. Chill. Serves 6.

Pear Tapioca

4 tablespoons quick-cooking tapioca
1/2 cup sugar
1/4 teaspoon salt
1/2 teaspoon ginger
2 cups canned pear juice and water
6 halves canned pears, cut in halves
4 maraschino cherries, cut in eighths
1/2 cup maraschino cherry juice
2 tablespoons lemon juice

Combine quick-cooking tapioca, sugar, salt, ginger, and pear juice and water in saucepan and mix well. Bring mixture quickly to a full boil over direct heat, stirring constantly. Remove from fire. Mixture will be thin. Do not overcook. Add pears, cherries, cherry juice, and lemon juice. Cool, stirring occasionally—mixture thickens at it cools. Chill. Serve with cream, if desired. Serves 8.

Here's an ideal thirst quencher for the Labor Day party. Everyone can enjoy extra cups without long sleep later because the decaffeinated coffee has ninety-seven percent of the caffeine removed.

Iced Coffee (Percolator Method)

Use 1 1/2 heaping tablespoons ground decaffeinated coffee for each cup (1/2 pint) of water. Pour cold water into pot of percolator. Set percolator basket in pot and add coffee in it. Cover. Let percolate slowly and gently 10 to 15 minutes. (To obtain full strength of decaffeinated coffee, percolate 15 to 20 minutes.) Pour coffee over cracked ice.

Iced coffee may be made by any other method, i.e., steeped, drip, or boiled, using the same proportions of coffee and water. Extra-strength coffee is necessary on account of the melting ice. Always use freshly made coffee. Iced coffee made from left-over cold coffee is most unsatisfactory.

were dinner guests of their son and daughter-in-law, Mr. and Mrs. Willard Livermore at Willbridge Sunday.

Mrs. J. Gasner and sons Lawrence and Joe spent the weekend visiting at Seaside. They were accompanied by Ila Mae Pizer who returned to her home after a weeks visit with her grandmother, Mrs. Ves Baby.

Bob Duhurst has been quite ill at the home of Beacher Doughty.

Mr. and Mrs. Woodrow Weaver have moved to the home of his parents Mr. and Mrs. Charles Weaver.

A. Reusser Sr. and daughter, Edna, visited last week at Cloverdale with Mr. Reusser's son and daughter-in-law, Mr. and Mrs. Fred Reusser.

Kether Livermore who accompanied her grandparents, Mr. and Mrs. E. W. Livermore recently on a trip to Minnesota, has returned to her home at Willbridge.

Crops Produce Heavy After Slow Start

Good crop yields after what at first appeared would be a disastrous season was probably the outstanding local agricultural development of 1939, in the opinion of W. F. Cyrus, county agent. In replying to an inquiry, Mr. Cyrus said, "Early and continued dry weather from mid-March to early May made the crop look somewhat dubious. As is usually the case in the Willamette valley later weather conditions corrected the impending loss so that some crops produced abundantly and most of them reasonably satisfactorily."

"Washington county farming is perhaps as well balanced on the whole as could be expected," continued the county agent. "Approximately 40 per cent of the field crop acreage is annually in perennial or annual legumes. As long as dairying continues to be the principal income source the production of feed for the livestock population is of first importance. Except as prices of crops vary or dairying becomes less general there probably will be approximately the present relation of the acreage of the so-called soil depleting crops to the acreage of those other crops that are considered to be conserving."

Probably been the most profitable of these two classes of crops is desirable to maintaining an effective rotation system. Wheat yields of substantially more than average were common and the total production of wheat probably larger than it has been

for the past few years, Mr. Cyrus pointed out. "Encouraged by the provisions of the AAA program the local wheat acreage was probably as large, if not larger, than it has been the past few years. However, the acreage was below the ten year average. Oats and hay produced at least normal crops and the supply of feed crops should be adequate."

Returns from Austrian peas were not as satisfactory this year as in most previous years because of the lowest average yield since they have been grown locally. Because of comparatively larger cash returns per acre from this seed crop the acreage has been increasing rapidly. In 1939 the acreage was approximately 30 per cent larger than in 1938 with the 1938 acreage practically 100 per cent larger than in 1937. That rapid increase probably will not continue unless stimulated by programs of federal agencies.

Other annual legume seed crops have been fairly satisfactory. Acreages of hairy and common vetch for seed are on the increase. Special strains of common vetch, winter and disease resistant from the southern growers requirement, have been developed and have been increased to the point where they will soon be available in commercial quantities.

While yields have for the most part been satisfactory, prices have been relatively low so that the total cash returns will not exceed, perhaps not equal other years.

Grain, berry and prune prices are generally low as compared to what growers consider necessary prices. Strawberries have probably been the most profitable of the small fruit crops as the yield was fair and the price comparatively better than for the other small fruit.

Must Increase Farm Income, Says Ford

WITH Edsel Ford in the driver's seat to turn the first furrow, the new and vastly-discussed Ford-Ferguson tractor made its world's first public appearance at the New York World's Fair in late July. Shown above are Henry Ford and Harry Ferguson, Irish inventor who developed the principles embodied in the new tractor and its unit implements, with a small model of the tractor between them.

Said Henry Ford: "I look for this tractor to accomplish two things—turn the farm deficit into a profit and reduce the expense of going on the land!" Enthusiastically seconding his father, Edsel Ford added: "The farm is one of the most vital problems now before the country. No political solution yet offered has been able to solve it. To increase farm income by increasing the cost of food in the cities is a policy no one, not even the farmer, approves. And yet every one agrees the farmer's income must be increased."

"My father and I believe that if the farmer can do what industry has done—make his profit out of economy of production and distribution—he will increase his real income without curtailing his market. We built this tractor primarily to cut the farmer's first cost and his operating cost."

"This tractor is the only one we ever made that completely takes the place of horses and mules, thus eliminating draught animals which constitute one of the farmer's heaviest costs. Four cows or six young cattle, which mean income, can be raised on the same land required to feed two farm horses that only mean expense."

Harry Ferguson said that among outstanding new features of the Ford tractor are light weight, simplicity of operation, maneuverability, fuel and oil economy, absolute safety on hillsides or difficult ground, and ability to strike any sort of obstruction without damage to implements. The new machine will do the work of eight horses and four men, he said.

The Ford-Ferguson tractor is now in production, and will be available to the public through Ford and other dealers about September 1. It is being demonstrated daily at the Ford Exposition, New York World's Fair.

court as administratrix of the estate of said deceased, and has duly qualified as such.

Now, Therefore, all persons having claims against said estate are hereby notified and required to present the same, together with proper vouchers therefor, to the undersigned at the law offices of Harry Daniel, 511 Lumberman's Building, Portland, Oregon, within six months from the date hereof.

Dated this 4th day of August, 1939.

Jennie Rath, Administratrix of the Estate of said deceased.

Harry Daniel, Attorney for Administratrix.

SUMMONS IN THE CIRCUIT COURT OF THE STATE OF OREGON FOR WASHINGTON COUNTY

Dorothy Patterson Plaintiff, vs. Harry Delbert Patterson, Defendant.

To Harry Delbert Patterson, the above defendant.

In the name of the State of Oregon, You are hereby required to appear and answer the complaint filed against you in the above entitled cause on or before September 5, 1939, which date is four weeks from the date of the first publication of this summons thereof being August 4, 1939, and the date of the last publication thereof being September 1, 1939, and if you fail so to appear and answer, for want thereof the plaintiff will apply to the Court for the relief prayed for in her complaint filed herein, to-wit: for a decree forever dissolving the marriage now existing between you and the plaintiff upon the grounds of cruel and inhuman treatment.

This summons is served upon you by publication thereof in the Beaverton Review, pursuant to order of the Honorable R. Frank Peters, Judge of the above entitled Court, made, rendered and dated August 3, 1939, which said order prescribed that said summons be published in said newspaper for four successive and consecutive weeks.

WM. G. HARE, Attorney for Plaintiff, Resident Attorney State of Oregon, Post-office address: First National Bank Building, Hillsboro, Oregon. 36-40
