**AMERICANISM**  
"Americanism is unflinching love of country; loyalty to its institutions and ideals; eagerness to defend it against all enemies; undivided allegiance to the flag; and a desire to secure the blessings of liberty to ourselves and our posterity."

## Who's Who in the Political Pot?

Washington is the political pot of the United States. The guess this week is that Hull leads the Democratic procession—if one is willing to believe that Roosevelt will not run. Dewey stands in the lead, according to gingerly admissions of Republican authorities. They tell you the fight is now between the New York attorney and Senator Taft.

But, maybe there are a lot of things that the "political pot" still has to brew from the homelands of the old U. S. A., where the power to pick the nominee exists—whenever it goes into action.

## Fighting Daughters

Daughters of the American Revolution, 4000 strong met in Washington, and let it be known that the "home front" must always be well-armed, and kept ready for a fight. These patriotic women favor neutrality, but preparedness must never be overlooked.

Until recent years they have been greeted and addressed by whoever happens to be president of the United States. Now the Daughters are on rather chilly terms with both Mr. and Mrs. Roosevelt.

This is the fiftieth anniversary of the Daughters of the Revolution, and like Time, members of the society go marching on.

## Foreclosures of Farms

A statement issued by Governor Black of the Farm Credit Administration reveals that 12,508 foreclosures were completed by the Federal Land Banks and the Land Bank Commissioner in 1939. Thirty percent lost their farms because the owners could not carry the debt, and 53 percent did "not do his honest best," according to Black.

Secretary of Agriculture Wallace recently criticized these foreclosures, and succeeded in getting control largely in his own hands. His belief expressed at the time was that there should be fewer crack-downs on farmer-debtors. He said they should be given liberal extensions in order to enable them to pay off their mortgages.

## Postponing the Evil Day

The debt limit of the nation has been set at 45 billion dollars, and some of the statisticians seem to be sure that it is now that much. Dexterous bookkeepers might subtract paper-profits on unused appropriations and get the administration over the hurdles till late in the present year—even without imposing new taxes. But the rate of spending so far this year, and approval to new fancies and facts make it definitely sure that the debt limit will be increased in 1941 and that taxes will be heavier.

## Communists

The revelations of the Dies committee investigating un-American activities furnish startling proof of the existence of tens of thousands of agitators, reds and Communists in nearly every part of the country. Of course they are a menace to orderly government and to the strength of democracy.

### PIE CRUST POINTERS

By BETTY BARCLAY

There are but two kinds of pie — good pie, and bad pie. Good pies have a crust as light as a powder puff, tender as a school-girl's heart, flaky as a first snowfall. Their reward is hearty praises from a family . . . just try the recipe and see what I mean!

#### Flaky Plain Pastry

1 1/2 cups flour, sifted with 1/2 teaspoon salt  
1/2 cup shortening  
4-5 tablespoons cold water

Now the secret in making good, flaky crust lies in three things: first, chill shortening thoroughly; second, no over-mixing; third, just enough cold water to combine ingredients.

Cut cold shortening into flour with a pastry blender — or two knives — until shortening is in pieces about the size of small peas.

Now for a little water — feed water, please — the same to be blended with the flour mixture until all of it just holds together. Water must be added slowly, practically a drop at a time, for a sticky dough means a tough crust. Your aim is a smooth mixture — both sticky

and crumbly proportions are to be avoided. Chill pastry before rolling.

When a girl marries, let her serve no pie other than a perfect pie. And let it often be apple. Such rules are good insurance for happy years ahead.

Mrs. Harry Davis, clever little bride of the CBS radio program, "When a Girl Marries," takes her role seriously and makes a perfect apple pie.

## Federal Aid Highways

The house committee on roads today reported out the 1940 Federal Aid Highway bill authorizing appropriation of \$238,000,000 for road construction for each of the fiscal years 1942 and 1943.

In reporting the bill the Committee incorporated in it an amendment offered by Congressman Jas. W. Mott (R. Ore.) authorizing the states to use federal aid highway funds for the purchase of strips of land bordering the highways for the purpose of preserving the natural scenic beauty of the lands through which the highways are constructed. The Mott amendment provides that any state may use up to 5 percent of its federal aid money for this purpose without the necessity of matching it with state funds.

The authorizations for each of the fiscal years covered in the new bill are as follows:

Regular federal aid	\$125,000,000
Secondary or feeder roadsetao	25,000,000
Secondary roads	25,000,000
Grade crossings	50,000,000
Forest highways	14,000,000
Public-lands hgwys	2,500,000
National park roads	7,500,000
National parks	10,000,000
Indian Res. roads	4,000,000
<b>Total</b>	<b>\$238,000,000</b>

Oregon's apportionment under the bill, according to Congressman Mott, a member of the committee, will be approximately \$6,000,000 for 1942 and the same amount for 1943.

## WORM HOLES PLUGGED WITH PLASTIC

OSC—Use of a new plastic material to plug up worm holes in lumber is expected to make possible the salvaging of large quantities of logs from the old Tillamook burn that would be unusable otherwise. Tests with the material have been conducted by the school of forestry here with satisfactory results, says Earl G. Mason, acting dean of forestry.

Wood-boring worms have invaded some of the logs so that when these are sawed into boards a few holes appear, cutting the grade. A machine has been de-

veloped to force the plastic into these holes rapidly where it solidifies, making the lumber paintable and thus increasing the lumber value three to four times its sale prices untreated. The process has been tried commercially at the Stimson mill near Forest Grove. The plastic is made in Washington by a secret formula.

## To An Absent Member

A pastor sent this word to one of the faithful who was not at church on a recent Sunday.

Said he to the member, "Dear to our heart is the little inside group who can be counted upon, whether or no. You being of that stern stuff that stays by in spite of Sunday guests, rain, snow or headaches, this note goes to say that you were missed.

"The latest check-up gives 8 percent as the number of Americans who attend church. The architects say that the new buildings should be planned to seat but 50 percent of the church membership. So we take note of you who stay by and face the old world "DUTY" and obey the Bible injunction, "NOT FORSAKING THE ASSEMBLY OF OURSELVES TOGETHER." These go to church whether it is CONVENIENT OR NOT. So I close by saying, Blessed are the God-conscious in a day of national indifference."

### The Return to Sanity

Over against this national drift from the old moorings, come such words as these, "Over 1000 communities in the U. S. conduct religious education for public school children."—Church Publication.

Next comes the New York State Chamber of Commerce. This body takes a leaf from the report of the Board of Regents of that state. It quotes, "We place FIRST (in what New York City schools need), A DEEP RELIGIOUS UNDERSTANDING AND VIEW POINT." Again the PITTSBURG PLAN that gives credit toward graduation or college entrance for church and Sunday School attendance, with one hour a week under Catholic priest, Jewish rabbi or Protestant teacher. In comment on this program we have from Rex Putnam, Superintendent of Public Instruction in Oregon as follows, "A splendid piece of work being done in Pittsburg. No one will question the need of a proper Biblical background in any well planned education."

"All Scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness."—BIBLE. Why spend the tax-payers' money and the teachers' time merely to put on a veneer? What shall it profit the oncoming generation, if it gets a new thrill every hour and loses its own soul?
