To Prohibit Forest Fires.

One of the most important provisions of the law is that of making a closed season for burning from June 1st to October 1st, during which period outdoor fires of all kinds are prohibited except under most stringent regulations and the probability of heavy penalties.

In this connection the State Forester urges upon every one the necessity of doing all possible burning. Forest fires, one of the greatest sources of destruction to the most valuable resources of the state, will soon be restricted and their terrors largely reduced if the people will co-operate with the State Forester in the administration of the new forestry law enacted by the last Legislature, which will be ready for distribution in pamphlet form in the near future.

before the closed season begins, and thus save the trouble and risk of doing it by permission during that season of greatest danger when fire spreads so easily and rapidly.

The State Forester desires the assistance and co-operation of every one in the protection of property from forest, grass or brush fires, and to this end invites suggestions and information calculated to assist in any manner in the performance of his most important duties. Copies of the law will be promptly furnished to all who desire them. Requests and communications addressed to F. A. Elliott, State Forester, Capitol Building, Salem, will receive prompt and appreciative attention.

For Better Roads.

One of the vital questions that is now before the people of Coos county is the public highway proposition. There seems to be an unanimity of opinion that the roads should be improved, but this same unanimous spirit does not seem to exist when it comes to providing ways and means for such roads.

Everybody knows that roads can not be built out of hot air. What we must have before we can get roads is money. The county is now spending \$120,000 a year for roads, and each year finds the roads in about the same condition that they were before, consequently it is evident that something must be done to increase the amount of money before much of an improvement can be made.

Some have suggested the idea of bonding the county to get ready cash, others have suggested cruising the timber so that the heavy timber holders would be made to pay their share of the taxes. The latter proposition will surely be done in the near future, because people are clamoring for it, and are tired of carrying the timber owners on their backs any longer.

This paper is unreservedly in favor of cruising the timber, and would not be adverse to the bonds, if the timber were cruised, because we could then issue bonds and get the ready cash for road building, and be sure of paying off these bonds in a reasonable length of time, and at the same time have the use of the

good roads, while the big timber owner, who would be benefited by the transaction, would be made to pay his share of the expenses. But whether we issue the bonds or not, let us have the timber cruised and with the extra amount of tax we can help out a whole lot in the building of better roads.

THE SOUND SLEEP OF GOOD HEALTH

Cannot be over estimated and any ailment that prevents it is a menace to health. J. L. Souther, Eau Claire, Wis., says: "I have been unable to sleep nights, because of pains across my back and soreness of my kidneys, and my general condition was much run down. I have been taking Foley's Kidney Pills but a short time and now sleep as sound as a rock. I know that Foley's Kidney Pills have cured me." Bandon Drug Co.

The Tramp Professor

Breakfast over the boys settled down to their work, some had to round up the cattle, two went out to hunt, thus it left me and our visitor to take care of the camp.

It did not take long to get the professor to talk again. My inquiries led the discussion into geology, a science in which I had taken much interest from my early childhood and had received much encouragement by information from well posted mining engineers in the ore mountains of Saxony.

He described the conditions of the cooling of this earth, the Silurian Age, the developing of fundamental germs of plant life, the sedimentary stage, the earth was in a soft condition, and broken up time and again by the great heat which existed internally, clouds surrounding the body so dense that light was still excluded, heavy rains falling upon the surface to evaporate again and bring more rain. At last the soft muddy condition of this earth as a result of centrifugal force in revolving, began to concentrate at the equator and changing the condition at the poles. Then when gravitation was overbalanced by abrasion, the unavoidable happened, a part of this soft matter matter separated and went off into space, even beyond the power of attraction of gravitation, by its own rotation it formed a second globe by itself and was held in the universe by the repulsive power of other planets of this solar system, then as the smaller body it began to revolve around its origin and became a trabant, a moon to this earth.

It appears impossible to most people living how it is possible for some men to decipher apparently unsolvable questions with such accuracy that to the initiated there is no doubt of its correctness. So in this case.

Scientific arithmeticians have calculated the weight of this and other globes, have measured the size of the moon and made comparisons on this globe, the result is, that could the moon be replaced upon this earth it would fill all the cavities and give this planet a perfect globular shape which would then be as originally covered by water.

The professor further gave illustrations on why all our five conti-

nents now—in former years there were seven. America, Europe, Africa, Asia, Australia, Atlantis and Lucidia—are pointed at the lower ends and widened and broad at the other, he proved those facts by very clear and natural laws, which at this writing would take me too far away from the object I wish to reach, should I explain above mentioned facts.

Thus the waters formerly covering the earth had receded, formed the oceans and allowed the terra firma to appear; with it the foundations of plant and animal life followed, as such arrived we have entered the "Devonian age."

Tens of thousands of years again had passed, the cooling off process had strengthened the crust of the earth, interior forces however increased their activity by upheavals, raising mountains, overturning others before forced upward, but more and more such formation became as solid as rocks, so that many withstood entire destruction.

Then began the "Carboniferous age," full of plant and animal life, which by high temperature, and ample moisture grew faster than at the present time in the tropical regions. Fish, amphibies, occasionally were covered by falling mountains, forming petrifications or plants; thus covered became our coal beds and deposits.

So great was the heat that at both of the poles all tropical vegetation grew and animals, such as the mastodon, roamed over the now frozen parts of the earth.

Here was the end of the so-called "Paleozoic age." Sorry to say, a few days later we resumed our trip and Professor Owens parted from us. We never met again.

A RELIABLE MEDICINE--NOT A NARCOTIC

Mrs. F. Marti, St. Joe, Mich., says: "Our little boy contracted a severe bronchial trouble. I gave him Foley's Honey and Tar Compound, and it cured the cough as well as the choking and gagging spells, and he got well in a short time." Bandon Drug Co.

LOST OR STOLEN—March 30th or 31st, from steamer Elizabeth, two Building and Loan certificates of Masonic Temple Association of San Pedro, drawn in favor of J. A. Brose. Certificates numbered 107 and 108. Reward for recovery. 26-12 x

A good treatment for a cold settled in the lungs is a Herrick's Red Pepper Porous Plaster applied to the chest to draw out inflammation and Ballard's Horehound Syrup to relax tightness. You get the two remedies for the price of one by buying the dollar size Horehound Syrup; there is a porous plaster free with each bottle. Sold by C. Y. Lowe.

Don't forget that T. W. Robison is handling all kinds of hay, grain, feed, etc., at the very lowest prices. 40-11

A sore throat can be treated best from the outside. The throat should be rubbed gently with Ballard's Snow Liniment. Apply at night and cover with a cotton cloth bandage; by morning the soreness will disappear. Price 25c, 50c and \$1.00 per bottle. Sold by C. Y. Lowe.

Some Choice Buys in Bandon REAL ESTATE

Lots in Smith's Addition from \$25 up. Close in and level land. Lots in the Woolen Mill Addition from \$65 up. You can work in the Mills and go home for dinner from these lots. About 40 to pick from.
A few lots left in Azalea Park for \$75.
A Three Acre piece of land close to new school house \$3500. This is a snap.
House and large lot in West Bandon—close in, \$1700.
House and 14 in Woodland Addition. Good location for \$1200.
176 Acres Coal Land, if taken quick will be sold cheap—on Coquille river.
40 Acres Good Bench Land close to river, 5 miles from Bandon, \$1000.
40 Acres Good Hill Land, 3 miles from Bandon, \$40 per acre.
A nice little ranch of 162 acres with good house and barn and other improvements. This can be handled for \$1000 down and the balance 5 years at 8 per cent and is a fine chance for a good ranch. These are all bargains and if interested you had better get busy. Write, call or phone
