Bandon, Oregon

Local Lore

Fred Mehl is about to complete an addition to the west side of the Acme Plaining mill which will give him more room for his fast increasing business.

Mrs. W. S. Guerin and daughter Miss Julia of Langlois have been spending a few days in Bandon.

Wilson & Howard have secured a five year lease on the lot at the corner of Atwater street and Columbia Ave., of J. H. Jones, and are building a blacksmith shop on the same.

R. C. Tapley of Coquille was down to Bandon last night attending the Moose Lodge.

FOR SALE—Cheap, early new, 3 1/2 inch wagon. Apply at Catterlin & Le Gore's store. 102tf

The Geo. W. Moore Lumber Co's office rooms have been beautified by the installation of two very beautiful desks, made out of native fir, and are as nice pieces of furniture as one would care to see.

One of the greatest opportunities to save money is offered by the Bandon Drug Co. See their advertisement. 1-2

Before buying an automobile call on, or write L. Strong & Son Myrtle Point, Ore. for information and price of the celebrated Mitchell 1913 car. Nothing like it, the best on wheels, in fact a road locomotive in place of a horseless carriage.

Miss Ivy Langlois, of Langlois has been visiting Bandon relatives and friends for several days.

The Unique is now open as a first class restaurant, bakery and delicatessen store. All kinds of home cooking at reasonable prices. Opposite Rosa's store.—F. D. Meyer, Proprietor. 91tf

Mr. C. H. Hurley left Wednesday morning for a two weeks trip to Grays Harbor, Portland and other lumbering ports. Mr. Hurley is tallyman for the Geo. W. Moore Lumber Co.

For Carpet and Rug weaving, address Mrs. J. L. Foster, Bandon. 3-1f

Capt. O. Wren, Co operative observer reports the rainfall for the month of December, 1912, as 6.60 inches, days clear 11, days cloudy and rainy 20. The rainfall for the corresponding month of 1911 was 6.42 inches, a difference of .18 inches more this year.

FOR RENT—2 rooms, partly furnished. Address box 545. 5813

Mrs. S. R. Steele is enjoying a few days visit from her brother, Mr. Burns of Coquille.

WANTED—1000 empty sacks at Central Warehouse. 2-1

Misses Rogers, Fahey and Ritchie were at home to friends in their apartments in the Timmons building from 3:00 to 5:00 New Years day.

Mr. G. C. Goodrich, of the Geo. W. Moore Lumber Co. spent New Years at Coos Bay, with his friend, Prof. Richards.

The Geo. W. Moore Lumber Co. is putting in a piling dam to prevent leakage around their tank for their water supply.

The Knights of Pythias and Pythian Sisters will hold a joint installation, Wednesday evening, Jan. 8, in the K. of P. Hall. All Knights and their families are invited, also the Pythian Sisters and their families are invited.

The New Years ball given by the Women of Woolcraft was largely attended and was declared to be one of the best dances of the season.

The Socialist dance in the Bandon Opera House New Years eve was well attended and greatly enjoyed by all present.

R. E. Gardner is again in the Bandon fire saving crew.

The gasoline tug Simpson belonging to the Geo. W. Moore Lumber Co. has recently undergone a thorough repairing and is in excellent condition now.

Decline of the Bath.
One strange feature in the advance of civilization has been the decline of the bath. Washing in the golden age of Greece and Rome was a fine art, and baths were built with as much care as temples. There has been a revival in this century of public baths, but from an aesthetic point of view they cannot compare with those of a barbarous age.

THE BEAUTIFUL.
Keep your faith in all beautiful things—in the sun when it is hidden, in the spring when it is gone—and then you will find that duty and service and sacrifice, all the old odes and bugbears of life, have joys unimagined in their deepest dungeons.

A SAILOR ON NAVIGATION LAWS.

Just give freedom to your own men and to the men who come here. Apply the constitution of the United States to me as well as to somebody else, that I, a seaman, shall have the same rights as any other man and that a citizen who signs a shipping article does not thereby surrender his rights as a citizen and accept the status of a serf. That is the consideration. Then regulate the hours of labor in such a way as shall be best for safety. If you regulate them for the safety of the passengers you will at the same time regulate them in such way that they are useful and beneficial to the men. You cannot help doing this because these two purposes fit in with each other. Then see to it that foreign vessels ship their men under the same conditions and under the same laws at the ports of the United States as the American vessels do, and the United States will become holy ground to the seamen of the world. But what is the use of getting anybody trained if that man, when he is trained, must compete with the Chinaman, the Basuto and the Croonian, who have no experience at all, when it comes to signing and setting wages, and then when they get to sea he has got to do the work for them?—Andrew Furuseth.

FLOWERS OF THE NIGHT.

They Are Usually Pure White With a Peculiar Glow.

As we all know, there are both day blooming and night blooming flowers. The former are generally decked in red, blue, yellow or purple and have lines, spots or markings on their petals which often act as guides to the nocturnal insects which visit the flowers and butterflies.

The night blooming flowers, on the other hand, invite the visits of moths or other night flying insects and therefore have recourse to something like the tasks of the fireflies and the glow-worms. They are usually pure white and have such a peculiar texture that they seem to glow with internal light in the dim shades of evening.

At times you might almost fancy that they were stained by nature with some forerunner of luminous paint, so clearly do they reflect every visible ray of the faint twilight. They thus succeed in catching the eyes of the moths, which, of course, are modified especially for perceiving and receiving the slight stimulus of the dusk and gloaming.

But the nocturnal flowers have no lines or spots, because these last could never be perceived in the dim gloom of the evening. They make up for it, however, by being very heavily scented. Indeed, almost all the strong white flowers, which are such favorites with florists, such as jasmine, tuberose, gardenia, stephanotis, serena and syringa, which belong to the night blooming plants, are especially adapted to attract the senses of winged nocturnal insects.—St. Louis Globe-Democrat.

HELP THAT HELPS.

Lincoln's Response to His Brother's Request for a Loan.

Abraham Lincoln's good sense is witnessed by almost every act of his life. His sound views on indiscriminate charity and the best means of encouraging thrift and industry are shown by the following letter to one of his brothers:

"Dear Johnson—Your request for \$80 I do not think it best to comply with now. At the various times when I have helped you a little you have said to me, 'We can get along very well now,' but in a very short time I find you in the same difficulty again. Now, this can only happen by some defect in your conduct—what that defect is I think I know; you are not lazy, and still you are an idler. * * * "You are now in need of some ready money, and what I propose is that you should go to work, tooth and nail, for somebody who will give you money for it * * * and then to secure you a fair reward for your labor I now promise you that for every dollar you will between this and the first of next May get for your labor I will then give you one other dollar. * * * You have always been kind to me and I do not mean to be unkind to you. On the contrary, if you will follow my advice you will find it worth more than eight times \$80 to you. Affectionately your brother, "A. LINCOLN."

—Youth's Companion.

Animal Thermometers.
Crickets have a tendency to chirp synchronously or in time with one another. It is claimed that they chirp more rapidly in warm than in cold weather. The increase has even been rated at four chirps a minute for each degree the temperature increases. Certain animals appear to act as barometers. It is said that while frogs remain yellow nothing but fine weather or may be expected, but that should their coats begin to assume a brown hue bad weather is approaching.

A spider spinning its web in the morning heralds a fine day. If seen in the evening then at least the whole of the night and the following morning will be fine. If it is raining and the owl screeches better weather will ensue.—Hesperus.

A Slight Mistake.
She was a little woman, and she had entered a department store in a suburban town. She walked up to a big, important looking man near the door and said:

"I want to see some of your hangings."

"Sorry, ma'am," said the big fellow, with a smile, "but we are not going to have any today."

"None today? Why, what do you mean? Aren't you the floorwalker?"

"No, ma'am; I'm the sheriff, and I'm glad to say there's nobody to be hanged today."—Yonkers Statesman.

Tennyson Embarrassed.
Great crises affect people differently. With some the hair turns white, with others emotion expresses itself in incoherent speech. Tennyson when he first met Frederick Robertson, whom he much admired and who he knew admired his poems, was so nervous that he could talk to the "much beloved priest" of nothing but beet.

Maternal Pride.
First Young Wife: The photographer said my baby was the prettiest baby he'd ever seen. Second Young Wife: That's strange! He said the same thing about mine. First Young Wife: Well, I suppose he saw your baby before he saw mine.

The Way to Win.
About the only way to get things coming your way is a long battle against their going the other way.—Atchison Globe.

To live long it is necessary to live slowly.—Cicero.

From Wolves to Automobiles.

Just why a big crop should be called a "bumper" crop nobody seems to know, but anyway we have it. All the newspapers say so. The department of agriculture estimates that the grain yield this year is the largest in the nation's history. Although we have not adopted scientific farming to the extent we should, we are making progress. The crop reporting board has this to say of the outlook:

The showing made by the corn crop is particularly favorable. Its condition on Sept. 1 was 82.1 as compared with 80.0 on Aug. 1 and 79.3 on Sept. 1 of last year. The indicated yield of corn is 25,000,000 bushels larger than that shown in the figures of a year ago and 68,000,000 bushels above the record crop of 1906.

The indicated yield of both spring and winter wheat is 62,000,000 bushels larger than the actual harvest of last season.

The indicated yield of oats—viz., 1,200,000,000 bushels—is 57,000,000 bushels larger than the 1911 crop. This year is also expected to produce bumper crops of white potatoes, barley, rye and buckwheat. The potato yield, estimated at 208,000,000 bushels, exceeds the bumper crop of 1909 by 9,000,000 bushels and last year's short crop by 15,000,000 bushels. The yield of rye promises to be about 2,000 bushels larger than the record crop of 1910, that of buckwheat about 600,000 bushels greater than the 1909 record and of flax almost up to the record made in 1902.

Surely we are on the up grade. The prosperity of the farmer means good times all along the line. The Chicago Tribune recently called attention to two pictures illustrating a gratifying change in conditions. Eighteen years ago that paper sent into western Nebraska a special writer to report the famine. He found everything deserted. "Barns and lofts were empty," the Tribune's editorial says, "and the remains of farm machinery stood forlorn in the wind swept fields. In one farmyard a lone, disconsolate gray wolf slunk shivering away."

That certainly is a picture of desolation. Just why a wolf so perfectly symbolizes starvation, famine, want, woe and other disagreeable things we do not know, but so it is, and the mention of the wolf completes the picture.

Now for the other side of the shield. Today there are 30,000 automobiles owned in Nebraska, one to each forty-eight inhabitants. "In some districts," says the editorial, "every farm is equipped with one."

As the wolf is the symbol of destitution, so the automobile is the sign of plenty. These two make the contrast complete.

The police of Paris report that 31,000 umbrellas have been lost in that city this year. It must have been a rainy season in Paris when umbrellas were in such demand.

More Synthetic Rubber.

A few weeks ago one of our consultants stationed in England reported that a method of making synthetic rubber had been discovered and that the article could be turned out at much less cost than real rubber. More recently a German chemist lectured before the College of the City of New York, and he, too, claimed to have made synthetic rubber, samples of which he had with him, but did not assert that it was commercially profitable. On the contrary, he said that many more steps were necessary to complete the process before this artificial rubber could be placed on the market.

To prove that he had made rubber, however, he exhibited two automobile tires that he said had covered 4,000 miles and scarcely showed wear. If he can make automobile tires like that they should be commercially profitable at almost any price.

The speaker was Dr. Carl Duisenberg, an eminent chemist and president of a large color works at Elberfeld, Germany. Of the future of synthetic rubber he said:

"You may have received the impression that the problem of preparing this rubber—understand that it is real rubber and not a substitute for rubber—had been solved. Yet if you ask me to answer you honestly and truly when synthetic rubber will bring the millions which prophets see in its exploitation I must reply that I do not know."

"The stone is rolling, and we will see to it that it reaches its destination. The end in view is this, that artificial rubber may soon play as important a role in the markets of the world as does natural rubber. Synthetic rubber, let me say, will surely not appear on the market in the immediate future. Wait! for one hope to live long enough to see art triumph also over nature in this industry."

Even so conservative a statement as this holds out hope. Taken in connection with the report from England, it would indicate that the chemists of the world are busy on this proposition and that the public may soon have the benefit of their labors.

The distance from the earth to the moon has been computed as 240,000 miles. Sounds like a schoolboy's idea of the distance away of the next vacation.

The New York police are waking up. The other day one of them actually made an arrest in a shooting case. He pinched the man who was shot at.

Repair Shop.

Repair work, tinning and plumbing done with dispatch and satisfaction guaranteed. Anyone having work in these lines, leave orders at Sam Barrows' bicycles shop. 100-12

A Hero in a Lighthouse.

For years J. S. Donahue, So. Haven, Mich., a civil war captain, as a lighthouse keeper, averted awful wrecks, but a queer fact is he might have been a wreck, himself, if Electric Bitters had not prevented. "They cured me of kidney trouble and chills," he writes, "after I had taken other so called cures for years, without benefit and they also improved my sight. Now, at seventy, I am feeling fine." For dyspepsia, indigestion, all stomach liver and kidney troubles, they're without equal. Try them. Only 50cts at all druggists.

Persons troubled with partial paralysis are often very much benefited by massaging the affected parts thoroughly when applying Chamberlain's Liniment. This liniment also relieves rheumatic pains. For sale by C. Y. Lowe.

\$100 Per Plate.

was paid at a banquet to Henry Clay, in New Orleans in 1842. Mighty costly for those with stomach trouble or indigestion. To day people everywhere use Dr. King's New Life Pills for these troubles as well as liver, kidney and bowel disorders. Easy, safe, sure. Only 25 cts at all druggists.

Where You Get the Hardware

If you are looking for anything in light and heavy hardware, this is the place to get it. We also do plumbing and guarantee satisfaction. Our chief aim is to please.

A. McNAIR, The Hardware Man
