It is desired to get the fullest information and the ideas of all on this subject and learn how to launch the extension plan in the best possible way.

Real development work is being accomplished by a Bend bank, which is importing blooded livestock and distributing it to farmers, taking their notes in payment. Following the successful introduction of thoroughbred hogs, which has greatly stimulated the hog industry, the bank will bring in a number of carloads of fine dairy cows.

Portland is planning three apple days the last of this week, when growers and consumers are expected to establish closer relations than ever before. This is the first step in a determined movement to reduce the living cost and grocers of the city have promised their assistance in distributing the fruit to consumers with a minimum of cost to the latter.

Senator Vest's Pledge.

Just before his first election to the United States senate the late Senator Vest went to a caucus of Missourians who were members of the general assembly. Following a competitor who had talked three mortal hours, Vest spoke for three minutes, concluding with these words: "As for myself, I have to say, with the full knowledge that the pledge I now make will influence your votes tomorrow, that if I am elected to the United States senate during my entire term I shall draw my pay regularly like a gentleman and spend it like a thoroughbred." He was elected and served the state for twenty-four years.--Kansas City Star.

An Insulting Offer.

A well known but broken down Detroit newspaper man who had been a power in his day approached an old friend the other day in the Pontchartrain hotel and said:

"What do you think? I have just received the prize insult of my life. A paper down in Muncie, Ind., offered me a job."

"Do you call that an insult?"
"Not the job, but the salary. They offered me \$12 a week."

"Well," said the friend, "twelve a week is better than nothing."
"Twelve a week--thunder!" exclaimed the old scribe. "I can borrow more than that right here in Detroit."--Detroit Free Press.

Swallows' Nests.

Swallows and house martins build by sticking together pellets of prepared mud. Most of the material is obtained from the drying puddles on the high roads. If not mixed with anything else the tendency of these pellets would be to crumble when dry. But the swallow tribe is supplied with a mucous secretion which enables it to gum the particles together.
