SENATORS BY DIRECT VOTE

Washington, D. C., April 10.—The new amendment to the constitution, for the popular election of United States Senators, is the twentieth to be adopted. It reads:

The Senate of the United States shall be composed of two Senators from each state, elected by the people thereof, for six years; and each senator shall have one vote. The electors in each state shall have one vote. The electors in each state shall have the qualifications requisite for electors of the most numerous branch of the State Legislatures.

"When vacancies happen in the representation of any state in the Senate, the executive authority of such state shall issue writs of election to fill such vacancies, provided that the legislature of any state may empower the executive thereof until the people fill the vacancies by election as the legislature may direct.

The amendment primarily transfers the power of electing Senators from the state legislatures to the people at the polls. To effect this change it was necessary to alter the machinery for the filling of vacancies in the Senate.

COMMERCIAL CLUB TAKES UP IMPORTANT MEASURES

Discuss Several Measures to be Voted on at Special Election in June, In-Bonding and Cow Questions.

The general meeting of the Commercial Club held last night at the Commercial Club Hall was well attended.

Several issues of the day were discussed. The cow question came in for attention. The speakers on this subject expressed themselves in strong terms. Mr. Mast drew attention to the menace to public health arising from the town cow. Mr. Topping said, "The great menace is the danger of tubercular contagion from cows running at large without inspection. The tubercular germ from the cow that is affected will stay in the system and is more dangerous than other germs."

Mr. Mast enumerated the various bond issues to be submitted before the electorate next June, and explained the nature of the issues. Mr. Mast clearly showed the advisability and the justice of a bond issue. Placing as it does the burden of some of the expense of present permanent improvement upon the posterity that will benefit by the improvements now being made. The park, the widening of streets, regrading, opening up of streets and other improvements costing money; part or all of which comes out of the public treasury, are improvements that those who come after us will enjoy and benefit by and it is only fair and proper that they should share some of the expense.

Mr. Topping speaking on the question of bond issues said in part, "What you do in the present rounds to the future. Practice throughout the world, when in a growing community where the expense is greater than can be taken care of, bonds are issued. Let us take up bonds for these warrants drawing 6 per cent. Bonds could

be floated for 4-1-2 or possibly 4 per cent.

E. E. Oakes questioned the advisability of bond issue on the grounds that he was of the opinion that a bond issue to pay off the indebtedness of a town council in the ordinary management of the city would tend to make the council extravagant.

Mr. Mast from memory recalled permanent improvements made during the administration of the present council which more than accounted for the majority part of the amount owed by the city.

Herbert Brown said "Three years ago, the town owed \$18,000 dollars. It is now about \$12,000 when money due on Atwater street is paid in. In other words it has been reduced \$6,000, with a five mill levy in spite of many permanent improvements. Bandon has reached that stage when it must be improved. We found great difficulty to float park warrants. In fact, if the owners had kept us to the time limit of our option we would have lost the park. It looks to me that if the bond issue does not carry it is going to put the city in a very bad condition. We cannot float any more warrants, the local market will not take them up, we must go elsewhere for money. We cannot do this with warrants, we must use bonds to get outside money."

Mr. Topping proposed the name of R. Smith Bassett for membership in the club. Mr. Topping informed the meeting that Mr. Bassett was a good booster. The gentleman was unanimously elected.

E. E. Oakes read a letter from James N. McCue secretary of the Underwriters Equitable Rating Bureau. The letter contained much expert opinion of great value in determining the best system of fire fighting for Bandon.
