

NATIONAL TASTES IN EGGS.

The Spaniard Sails His Minute and Then Drinks Them Down.

How do you eat an egg? To a stranger the manner in which you eat this part of your breakfast may indicate your nationality.

Americans are said to prefer poached eggs. The foreigner when traveling who sees a man order a couple of eggs poached on toast almost immediately jumps to the conclusion that only an American could have given the order.

Hard boiled eggs are eaten in Germany too, but they are usually prepared in a glass, chopped with butter, salt and pepper. The German likes his soft boiled eggs very soft, indeed, and besides the contents into a china cup, eating them from the cup.

The average Englishman likes his egg boiled for three and a half minutes, no more and no less. He is particular about the time. He prefers a small egg cup that holds one egg, the shell of which is not removed. The Englishman then removes the top of the shell. Bread and butter, instead of the toast of the American, is eaten with the Englishman's eggs.

The Frenchman removes the top of his egg, too, but then he stirs the contents vigorously and adds bits of bread and butter to the egg. Sometimes squares of bread are dipped into the egg.

No Spaniard would dream of letting an egg boil three minutes—that is, if he prefers his eggs prepared strictly in the native fashion. The egg is allowed to boil only one minute and is then broken open and the contents poured into a glass, the real Spanish epicure drinking it off as if it were water.

In Italy eggs, to be perfectly prepared are started on their boiling by being put into cold water. When the water comes to a boil the egg is done. It is eaten on a large plate with bread.

Not His Fault.

There was a certain sporting English nobleman who was exceedingly lucky at cards, but very unfortunate on the turf. His wife wondered and complained.

"Why isn't you always win at cards," she asked, "and always lose when you back horses?"

"Well, my dear," came the gentle reply, "I don't shuffle the horses."

STUTTERING.

Treatment by Which the Affliction May Be Overcome.

There is no cure for stuttering. This does not mean that no stammerer can be cured—far from it—but that there is no treatment which is sure to cure. If a stammerer be taken in childhood, when the affliction is first noticed, and carefully treated he can sometimes be cured and generally much improved.

Dr. Frank A. Bryant of New York, writing in the Medical Record, says the first thing to do is to make sure that there are no obstructions in the throat or nose, such as enlarged tonsils or adenoids. The child must be taught to breathe through his nose, deeply and slowly, as a habit. He must not be allowed to speak when excited nor when laughing or crying or in the paroxysms of whooping cough. He must never be tickled. All causes of excitement must be removed. Fresh air, scrupulous cleanliness, plain, nourishing food, moderate exercise and plenty of sleep in a dark room are essential.

Mental treatment is of great importance. Any measures that will increase mental poise are of incomparable value. The stammerer must be impressed with a desire to overcome what is only a bad habit. He must be persuaded to study the great art of speaking correctly. Thus, by careful, patient work on the part of his parents, teachers and physicians, will be gradually cure himself, or at least so improve as to make the affliction cease to be serious.

JUST A BOY'S IDEA.

It Made the Invention of the Reaping Machine a Success.

In 1830 Obed Hussey of Ohio was inventing a reaping machine, the first ever designed in this country. His chief difficulty was the cutting device, which was three large sickles set in a frame and revolved so as to cut into the grain. It would not work satisfactorily.

A young son, watching the expert men, asked his father why he did not use a lot of big scissors, with one handle fastened to one bar and the other handle to a sliding bar, thus opening and closing them.

Hussey instantly adopted the idea, substituting for scissors the two saw toothed blades which are in common use today on harvesters, the cutting action being quite similar to that of scissors.

From the boy's suggestion he perfected in one week a machine on which he had in vain exercised all his ingenuity for the preceding two years. The principle of that cutting device is the principle of all of the great harvesting machines, and its benefit to the farming industry of the entire world has been unsurpassed by any other invention for use on the farm.—George F. Stratton, in St. Nicholas.

- 2 Haul up Saws.
1 Twin Band
1 6 in. Band Saw Guide.
1 8 in. Roll.
1 Knife Grinder.
6 Resaws.
15 Round Saws
1 10 H. P. Motor.
1 35 H. P. Motor.
2 25 H. P. Motors.
1 Portable Forge.
Line Shafting and Pulleys.
1 Diamond match cut-off saw arbor table and belts, shafts complete.
1 American 6x15 Masher including belts, shafts, etc.
1 Mershon 54 in. Twin Band Resaw with ball bearing crowding wheels complete as regularly furnished but without saws.

1 American No. 132 15x6 planer and Masher complete with joiner heads and countershaft—rebuilt.
1 General Electric Fort Wayne Induction Motor, 10 H. P., 60 Cycles, 220 volts, 1800 R. P. M., complete as regularly furnished.
1 General Electric Fort Wayne Induction Motor, 35 H. P., 60 Cycles, 220 volts, 1200 R. P. M., complete as regularly furnished.
1 General Electric Fort Wayne Induction Motor, 25 H. P. Motor, 60 Cycles, 220 volts, 1200 R. P. M., complete as regularly furnished.
1 General Electric Fort Wayne Induction Motor, 25 H. P., 60 cycles, 220 volts, 1200 R. P. M., complete as regularly furnished, all described as located in the building or factory of said Defendants on the Coquille River in Coos county, Oregon, and opposite the Bullards Post Office; that the said chattels and all of them, also miscellaneous lot of tools, implements, odd lumber and small chattels, also all book accounts, notes, credits and monies due, or to become due to the plaintiff corporation, also all of the right title, interest and estate of the plaintiff corporation in, and to the building and land occupied and use by said plaintiff corporation for such factory at Bullards Ferry in Coos County, Oregon.

Dated at Bandon, Coos County, Oregon, this 24th day of November, 1914 E. E. OAKES, Receiver.

Bandon Dry Goods Co.

Coos County never saw anything like it before. It only started Thursday, Dec. 3rd but its looking like wild fire.
