S. D. Barrows received on the Elizabeth a machine for gumming cross cut and circular saws that will meet a long felt local want. So far there has been no means, locally, of renewing saws and the new appliance will be promptly made use of. It will increase the rapidity of saw action and restore worn out saws to a renewed period of usefulness. Constant filing reduces the depth of the knotholes between the teeth and the saw chokes with saw dust. The gummer will restore the knotholes to their original depth.
