"Bandon's high taxes." s sare man or woman will adboy are all out of reason) over, "Economy" is to Dufort Barn,

be the watchword in the coming city and school district elections, a sentiment among the citizens that is to be commended. It indicates that they

ere awakening to a realization of their responsibilities, that they realize the need of closer co-operation between the voters and the officials to whom they intrust the transaction of the purlie business. However, there is a danger that it the flurry, which accompanies every

reform movement, we may act without sufficient deliberation. In pruning our financial expenditures we must the care not to impair the efficiency those institutions wherein we seek o economize.

This danger applies especially to our school system. In our zeal to save let us forget that we cannot "get omething for aothing,"

During the past ten years we have built up a school system that is not passed in efficiency by any "ity in SW. Ore, and which compares favorably with any school in the state, Our High School is accredited by all of the leading colleges and universilies of the West. The growth has been steady and costant additions to the tenching force, course of study and equipment have been made gradually, along with the demands of a growing city. The cost of our system, a now stands, has run into the ten of thousands, and undoubtably all of he money has not been spent wisely, ut in electing school officers, at the lection June 19th, we must look to ie future rather than the past.

The education of our children should at be confused with politics, but since it must be to a certain extent, it is 'up to us" to see that common sense hould be used in the selection of the officials who are in charge of our chools. It is no more than good buess that we should desire to get the full value of the money we spend in the way of educational facilities, but let us not go too far, or too fast.

The efficiency of our schools today is money and happiness in the hands of our children temerrow.

AND NOW --

With the road bonds sold and their Herald comes forward with the foi- effective.

"It is pleasing to see that the leadg spirits in the Good Roads associdies and "The Misorere" from "He ation seem to realize that their work Trovatore," Mrs. Gill's rendition of not done with the passing of the "The Rosary" is a distinct accomplish-Lording measure. Why We Are Opposing A Government Armor Plant

To the People:

Some people say that the very fact that the Bethlehem Steel Company is so aggressively fighting the proposal to build a Government armor plant is conclusive proof that the Company is seeking to assure for itself the "vast profits" derived from private manufacture.

The fact is that armor making is the least profitable feature of steel manufacture.

The reason we oppose a Government plant is very simple. It is this:

Even though there is but little profit in the making of armor, we have invested over \$7,000,000 in our armor plant;

That plant is useless for any other purpose; if a Government plant is built the usefulness of our plant is destroyed.

It would be good business for us to make armor for the Government at any price over and above the actual shop cost, RATHER THAN SACRIFICE OUR ENTIRE INVESTMENT.

We do not seek to save big profits; our purpose is very frankly to save our armor plant-itself built solely for the use of the Government-from going to the scrap heap.

To do that, we are prepared to agree for any period to any terms of manufacture which the Federal Trade Commission shall say absolutely protects the Government of the United States.
