Lime is needed on is apparently true of pines and has eventual completion of a good road have the motor car make a special the fields in the county, it is said, manufacturers are organized.

Fir Men Unorganized

The Oregon fir market, although strengthened sufficiently to warrant the reopening of several mills along the coast, is still the tail ender in the march of progress, and will probably be the last to realize the full measure of returning prosperity. Limited markets, and lumber freight rates, owing to the necessity of car- er to get results, the new movement rying smaller cargoes out of the may fall flat before an election is STILL HOPEFUL FOR minor ports, are the disadvantages called. met by the smaller producers. For this reason the larger mills in the larger ports will have the first opportunity when the demand quickens. But the greater disadvantage to the fir producers is said to be the keen competition between the individual mill owners and their lack of organization in opening new markets and maintaining prices.

Railroad Earnings Gaining

18402.00 already been placed.

788.47 Indications Are Encouraging \$25502.00 other year passes.

## **COOUILLE VALLEY** HAS MANY SILOS

INCREASE FROM NONE TO AL-MOST 200 SHOWS GROWTH OF INDUSTRY.

Value of Raising Corn for Ensilage Being Realized and Larger Crops of This Fodder Are Being Raised Each Year Says County Agriculturist-Also Vetch and Oats.

Dairying in the Coquille valley has is in the past two years than at any previous time, according to J. L. Smith, county agriculturist. This fact is made evident by the increase

Two years ago there were scarcely any silos in use here, while today

"Every dairy farmer in the counthe mines and the company is said to ty is taking interest in the move of spring feed for the cows," says Mr. Smith, "the result of which is ap-BUSINESS GRADUALLY GAINING preciated in dollars and cents via the nilk pail."

That silos are proving themselves prime requisites in scientific dairying is evident from the fact that a Wisconsin silo is offered as a grand prize in the corn show. Corn makes excellent silage, and this crop is being boosted to a great extent this year. Mr. Smith believes that with the farmers once started and the fact demonstrated to them that corn can be successfully grown in Coos county, large crops will be raised annu-
