From House to House the Good News Spreads

Many housewives have found a happy solution of the breakfast problem in New Post Toasties.

These new corn flakes are distinctive in that they bear a self-developed flavour all their own—the delicate, fascinating flavour of choice, white Indian corn. Unlike other flakes, they do not depend on cream and sugar to make them palatable.

Try a handful without cream and sugar—note the fine flavour and new form; also the tiny "bubbles" on each flake. These bubbles are a distinguishing characteristic and are produced by the quick, intense heat of the new process of making, which also brings out the wonderful flavor.

Although the New Post Toasties are a great improvement in flavor and form, they cost no more than ordinary flakes. Have a package delivered for tomorrow's breakfast.
