

PEOPLE INDIFFERENT TO FOOD SAVING PLEDGES

Food Regulations Are Being Defied by Some Citizens of Oregon, Say Officials.

Portland, Jan. 22—The greatest stumbling block now in the way of the food administration is the selfishness and unpatriotic indifference of the average Oregon family, according to Federal food administration officials for this state.

Many families are splendidly patriotic and are loyally observing the conservation requirements in every detail, but many others are either selfish or thoughtlessly ignoring the regulations, and in addition are making life miserable for the grocers who must restrict the sales of flour and sugar.

It is hard to understand, after all the publicity given to the conservation plans and principles for so many months, how any American family can still be in ignorance of the need of its individual cooperation or of the fact that its cooperation is a patriotic duty.

HUNGRY HILL

By WALTER JOSEPH DELANEY.

They called the elevated stretch just north of Elsdon "Hungry Hill," and it was not a misnomer. Certainly there were hungry people there, men, women and children to the number of over a hundred, housed in ramshackly structures that had not seen roofs for a full decade, with leaky roofs and loose windows and doors and fast going to decay and disintegration.

Elsdon was not a manufacturing town, but ten years back a rascally promoter had raided the place, plausibly affecting to turn the busy wheels of industry and bring trade and profit to the wealthy citizens who were induced to invest in the stock of the exploitation.

The old investors refused to put in another dollar. The plant was locked up and the workmen were left stranded. Some of them sought work elsewhere. The majority, however, remained. Some of the old workmen found desultory work at road making throughout the district.

Hungry as were the denizens of Hungry Hill, they were not too famished to ignore an unfortunate human derelict who drifted their way one cold wintry evening, a man poorly clad and with a face expressive of pain and deprivation.

Mrs. Martha Boyd was a buxom, heartsome creature whose husband had died, leaving her with no means. The neighbors had clubbed together and had gathered up enough to start her in a very limited grocery business.

Matt Waldron, rover, half-tramp, was cared for pitifully. He told Mrs. Boyd he was homeless and had seen better days.

Matt took a vast interest in all the poor souls about town. He tidied himself up at his best. There was a meeting of the selectmen at Elsdon and before them he appeared. He told them of the indigent and ill at Hungry Hill. He showed them how it would not take much to fix up the old plant.

There was no objection to this. The original investors were glad to get rid of an elephant on their hands. They doubted his ability to produce results, but agreed to help him out.

"Mr. Waldron, you're a regular magician," declared the widow, as Matt showed her over the plant, alive with the buzz and bustle of practical industry.

"And what is that?" she inquired, as with shining eyes Matt took up a black clumsy lump from his office desk. "New luck, grand luck, Mrs. Boyd," proclaimed Matt, with an exultant ring in his tones.

The grayfish is now on sale in 20 states and the District of Columbia.
