Teach the children to be thrifty;

urge them to SAVE and INVEST in

Thrift Stamps and War Savings Stamps,

thus LOANING their money to the government to HELP WIN the WAR.

We will extend every courtesy to the children who desire to purchase Thrift Stamps and will explain to them in detail just how to proceed to become money-lenders to the United States. Nearly every child has a little bank at home which contains sums ranging from a few cents to many dollars. Such savings should be invested in Thrift stamps and thereby setting these funds at work earning for the children a good rate of interest. The lesson to be gained will be far more valuable to the children who will become so imbued with the importance of saving that it will have a most desirable economic effect on their lives in future years.

This is an investment as safe as the Liberty Bonds or any other class of securities which the government has to offer. The advantage is great as compared with the investments heretofore offered, for anyone having 25c can become an investor. The plan offers a liberal rate of interest, 85 worth of stamps now selling at \$4.13. The government will redeem the stamps January 1, 1923, at face

Bear in mind that you are not asked to donate money to the government in buying these stamps; to the contrary you are urged to save and earn more for yourself, at the same time helping Uncle Sam.
