

What will we have today

A large part of this thinking is along the line of, "How long since we had this?", or "I wonder if so and so would taste good today?"—rather than to a thoughtful consideration of how to obtain the greatest amount of food value for the LEAST MONEY.

It is a monotonous and thankless task to plan meals day after day; but in these times when the wise use of food is a national necessity, the woman who buys with thought performs a PATRIOTIC SERVICE.

And What It Means to You

YOU CAN AVOID COSTLY BUYING MISTAKES

Instead of Buying Blindly from Pictures in a Catalog You Can See the Real Implement Before You Buy.

This is the best year you ever saw to buy good implements, and the worst year you ever saw to buy poor ones.

Crop prices are sure to be high. All that you will have to do to make big money will be to raise big crops. And getting big crops will depend largely upon the kind of implements you use.

You can't afford to risk any implement uncertainty. Inferior implements will mean the loss of the extra bushels and extra tons that the use of good implements gives. Remember, the extra bushels and extra tons will mean a lot this year—much more than enough to pay for good implements.

See before you buy. Be sure that an implement is what you want before you let it work for you. Avoid the expensive delays of sending an unsatisfactory implement back to some distant concern and getting in exchange another of unknown quality.

Our service prevents costly buying mistakes on your part. You can come to our store—take full advantage of our stock, study the implements, get fully acquainted with their every feature, and buy judiciously.

That way of buying will help you get the most from the big year that is coming. Drop in the next time you are in town and see our stock.
