with the government in the
cause of America for the
period of the war ---

WAR GETTING CLOSER TO HOME

Day after day the war is being
brought home to us more closely.
This week it strikes the Western
World, taking a member of the firm,
Mr. James H. Howe, who left Thurs-
day for Ft. McDowell to answer the
call to arms in the Artillery corps.
His absence makes the work much
more strenuous for his partner, but
with the addition of inexperienced
help we expect to get along and as
nearly as possible keep up the stand-
ard of efficiency this paper has en-
deavored to maintain. However
from a standpoint of duty we do not
regret to see Mr. Howe leave, for, if
his services can fill a need in the
struggle to subdue the world menace
we will gladly work day and night to
keep business going as usual at home.

THE ECONOMY OF VICTORY

No matter what this war costs
the Government and people of the
United States in the way of money, it
is going to be cheaper to win this
war than to lose it.

The commercial and financial
losses that would follow a German
victory are not to be calculated.
All that we spent would be lost,
indemnities beyond calculation would
have to be paid, and along with these
losses would come a continuing loss
in foreign commerce that would spell
disaster.

With these material losses we
would lose our national liberty and
independence, our power to secure
our international rights, our right
to live in a world ruled by the
dictates of humanity and civilization.

WHEN PEACE COMES

Some day peace will come. Thou-
sands—millions of men—will sud-
denly be thrown back into civil
life. Consider the vastness of the
readjustment that will be necessary.
Look back to the period of recon-
struction after our own Civil war.
Prepare for this new period of re-
construction. The day of reckoning
is bound to come. Begin to save now.
Thrift is the need of the present,
the hope of the future.

Liberty Loan Bonds, War Sav-
ings, the safest securities in the
world, are a wise provision for the
day peace comes.

The high school students have
this year issued an annual number
of the Klakahma that is a decided
credit to them and to the progress-
iveness of the school. It contains
much interesting matter and its pub-
lication was made possible by the un-
tiring efforts of members of the Sen-
ior class and the merchants and pro-
fessional men of Bandon, the latter
having contributed advertising to de-
crease the greater portion of the ex-
pense.

Eliminating the day power by the
local electrical plant would be disas-
trous to the industrial interests of
Bandon. It would forestall any new
industries from coming here to lo-
cate for nearly every industry needs
some electricity in its operation.

With the numerous mineral and
oil investigators busy in this com-
munity someone ought to find some-
thing as an opener for this great
storehouse of subterranean wealth.

"Eat no meat till harvest time."
That is the new slogan adopted by
the County Food Administrators of
Oregon. It should be observed in ev-
ery home.

The wonderful success of the Red
Cross drive indicates that the spirit
of patriotism is not waning in the
Bandon district.

THE WAR, THE FARM AND THE FARMER

By Herbert Quick
Member Federal Farm Loan Board

The farms of this country could
carry the war to a victorious con-
clusion even if all the rest of the na-
tions should quit. The rest will not
quit; but we could win it without
them if we had to do it. The farmers
of the United States can whip Ger-
many. We can whip them with guns.
We can whip them with our products.
We can whip them with our money.

Every farmer in the United States
must remember that the war has a
first mortgage on every cent he has.
The last spare cent in the pockets of
every farmer in America should be
devoted to the war.

The Kaiser began foreclosing his
mortgage on our farms when he de-
clared ruthless submarine warfare.
The war is our answer to his bill of
foreclosure.

Our contribution is, first, our sons
and brothers for the trenches; sec-
ond, the last pound of food products
which we can grow by mobilizing our
scanty labor supply, utilizing the men,
women and children and the towns-
people about us; and third, money
for Liberty Bonds.

This is the crucial year of the war.
Our soldiers are at the front, hun-
dreds of thousands of them in the
trenches, and a million more ready to
go. The whole burden of carrying on
our own part in the war, and of aid-
ing our sister nations in arms, rests
on the United States Treasury.

If the treasury fails or falters or
finds itself unable to respond to every
call upon it, the war is lost. Do you
realize that?

Your son, and all the nation's sons
are relying on the United States
Treasury to furnish things with which
they may fight.

Their lives are lost if the treasury
fails. Our country is lost if the treas-
ury fails.

Germany wins if the treasury fails.
Therefore every cent you can rake
and scrape together belongs to the
treasury, that our soldiers may come
back to us alive and victorious. This
is literally true. We can whip the
Germans with our money; but not
with the money in our pockets or
bank accounts. It must go into the
United States Treasury in subscrip-
tions to Liberty Bonds.

(This is the last of a series of three articles by Mr. Quick.)

Mining Engineer in Curry

A. E. Smith, a mining engineer of
California was in Curry county last
week, according to the Gold Beach
Reporter, looking over the chrome
situation, and doing a great deal of
prospecting along the upper Rogue.
He was taken down to Pistol river by
J. R. Stannard to look over a deposit
of ore on the Otto Ismert place. Mr.
Smith pronounced the ore to be about
as good as any he had run across and
urged the locators to go ahead and
develop the proposition, stating that
they would be able to dispose of it

at a handsome price if there was any
quantity of ore available.

U. S. Now Has Monster Gun

Tests are now being made at an
Atlantic coast point by the U. S. gov-
ernment of a monster super-gun hav-
ing a range of 110 miles and over.
It is possible that a battery of these
guns will be sent to Europe to break
up the watch on the Rhine.

Does light hurt your eyes? See
Birch and get relief. At Sabro's Mon. 1tc
June 3rd.

Single Figure Method

Telephone scientists assert that speed and accuracy are
the greatest qualifications on the part of a telephone operator,
but no more necessary than accuracy on the part of the
telephone USER if efficient service results.

It saves time and is always accurate when you say,
"1-0-4" instead of "One hundred and four."

Aid us in accuracy and in speed by using "Single fig-
ure method" when giving telephone numbers to our op-
erators.

FORD

THE UNIVERSAL CAR

It's no longer necessary to go into the details describing
the practical merits of the FORD CAR—everybody knows
all about "The Universal Car." How it goes and comes
day after day and year after year at an operating expense
so small that it's wonderful. This advertisement is to urge
prospective buyers to place orders without delay as the war
has produced conditions which may interfere with normal
production. Buy a Ford car when you can get one. We'll
take good care of your order—get your Ford to you soon
as possible—and give the best in "after-service" when re-
quired.
