The Ford automobile engine, illustrated here, like all internal combustion engines, requires an oil that holds its full lubricating qualities at cylinder heat, burns clean in the combustion chambers and goes out with exhaust. ZEROLENE LIGHT fills these requirements perfectly, because it is correctly refined from selected California asphalt-base crude.

**"Zerolene is the Best"**

—Say leading motor car distributors, because the records of their service departments show that ZEROLENE, correctly refined from selected California asphalt-base crude, gives perfect lubrication with less wear and less carbon deposit.

Most cars are now lubricated with ZEROLENE because their owners have learned through experience that there is no better oil. ZEROLENE is the correct oil for all types of automobile engines. It is the correct oil for your automobile. Get our lubrication chart showing the correct consistency for your car. At dealers everywhere and Standard Oil Service Stations.
