His Watch was Slow.

The following is an account given us of a Pendleton young man's experience near Milton last Sun-

The genial deputy Sheriff J. E. Beam and Miss Wilson a well known young lady of Pendleton were visiting last Sunday at the fruit farm of D. M. McDanald on Mud Creek. Another lady for whom the young official entertains the kindest regards, was also visiting at the same place for a few days. Having the duties of a county official on hand, made it very necessary to catch the even-ing train at Milton. The blissful moments grew precions as the time of departure approached. With his heart in one hand and his time piece in the other, the young man counted the fleeting seconds. 40-35-30, 30 minutes he said tis plenty. Another "good bye" an affectionate farewell which act alone marks the blessed boundary line between the leaves of hope and fear then for the first time he remembered the watch was ten minutes slow, allowing only six short minutes to make the thain Por but the train must be made. The young lady took a firm hold of the buggy seat. Mr. B. with the determination of a desperate resolve urged the horses to their utmost speed, and a poor frightened pasdence of many years in this country. At Athena Monday, a steady rain fell from 5 until 10 o'oclock in in the monitoring a residence of many years in this country. At Athena Monday, a steady while mud and gravel flew like winter's without like winter's winter's without like winter's winter's without like winter's without like winter's winter winter's withered leaves. Well, to make a short story, we arrived at the station to find that the train, in order to accommodate us, was just ten minutes late. Then, besides their other clothing, all hands wore a happy smile.
