whole system. It is "Better than Pills,"  
and can be had in liquid or powder.

**MONROE DOCTRINE SPAT UPON.**

Governor Budd, of California, is for  
Twisting the Lion's Tail.  
Governor James H. Budd, dem-  
ocrat, in referring to the Nicaragua  
an difficulty, says:  
"The United States should never  
have allowed the British marines  
to set foot on Nicaraguan shores.  
We should have demanded that Eng-  
land submit her claims to arbitra-  
tion and we should have forced her  
to do so. If diplomatic protests  
were not needed there should have  
been American marines in Corinto  
to prevent the invasion. The Mon-  
roe doctrine expresses the policy of  
the United States, as it does the  
sentiment of its people, and this is  
a violation of the spirit of the doc-  
trine. No European country can  
be permitted to get into a position  
to control the Nicaragua canal, and  
it would have saved trouble in the  
future if our government had drawn  
the line there."  
"Let a war with the United States  
be the consequence of aggression  
on this continent, and there will  
be no aggressions."

Persons who sympathize with the  
afflicted will rejoice with D. E.  
Carr of 1235 Harrison street, Kan-  
sas City. He is an old sufferer  
from inflammatory rheumatism,  
but not heretofore been troubled in  
this climate. Last winter he went  
up into Wisconsin, and in conse-  
quence has had another attack.  
"It came upon me again very acute  
and severe," he said. "My joints  
swelled and became inflamed; sore  
to touch or almost to look at. Up-  
on the urgent request of my moth-  
er-in-law I tried Chamberlain's  
Pain Balm to reduce the swelling  
and ease the pain, and to my ag-  
reeable surprise, it did both. I  
have used three fifty-cent bottles  
and believe it to be the finest thing  
for rheumatism, pains and swell-  
ings extant. For sale by Os-  
burn.

**Crop Prospects.**  
The rainfall was most opportune;  
vegetation was suffering from lack  
of rain and the copious showers oc-  
curring has been of the greatest  
benefit. More ruin would be of  
value in Morrow, Gilliam and Sher-  
man counties. The warm weather  
caused a rapid growth in all vege-  
tation and has also dried up the  
soil. The wheat growers are much  
encouraged over the change in the  
weather and the prospects are  
brighter for a crop for them. The  
farmers are now busy plowing for  
fall sowing. The fruit prospect  
continues excellent; with warm  
weather strawberries will be ripe  
at Hood River by May 20. Lamb-  
ing continues with a large percent-  
age saved. Shearing is progress-  
ing and a large clip is assured.  
Range grass is good and stock is in  
good condition.

**The Old Timers.**  
The annual meeting of Oregon  
pioneers will be held at Portland,  
June 14. William Galloway, of  
Yamhill county, will make the an-  
nual address, and T. T. Geer, of  
Marion county, the occasional ad-  
dress. Mrs. Robt. A. Miller, of Ore-  
gon City, a pioneer daughter, will  
prepare a paper for the evening  
meeting, treating particularly of  
women's experience in crossing the  
plains and in pioneering. William  
Lapus has been selected as grand  
marshal, and Rev. D. B. Gray,  
chaplain.

**Hoyt Gets 20 Years.**  
Fredrick Hoyt, the convict, who  
killed another in the Walla Walla  
penitentiary, Saturday received his  
sentence from the lips of Judge  
Sullivan. There was quite a num-

ber in the court room as the pris-  
oner and his guards filed in. Hoyt  
was told to stand up and Judge  
Sullivan asked him if he knew of  
any reason why sentence should  
not be passed upon him when the  
prisoner said, "I don't know what  
to say." The judge then sentenced  
him to 20 years in the penitentiary,  
the sentence to commence fifteen  
years hence at the expiration of  
the time he is now serving and to  
end in 1920.

**Opposed to Alien Husbands.**  
In the Illinois house of represen-  
tatives Mr. McCarthy introduced  
the following resolution, and it was  
referred to the committee on fed-  
eral relations:  
Resolved, That the members of  
the thirty-ninth general assembly  
of the state of Illinois do hereby  
request the daughters of Illinois  
not to accept the hand in marriage  
of any person who is not a citizen  
of the United States by right of  
birth or naturalization, as we are  
of the opinion that the daughters  
of Illinois should be patriotic in  
their views and should disregard  
the title of any foreigner and mar-  
ry none but a citizen of the United  
States.

**Your Physical Condition.**  
Needs attention at this time. If  
you are tired, weak and nervous,  
it is clear that your blood is im-  
pure, and without doubt there has  
been too much over-work or strain  
on brain or body. The course of  
treatment for such a condition is  
plain and simple. The blood must  
first be purified so that the nervous  
system, and in fact all the organs  
will be fed upon pure blood. In-  
telligent people without number  
have testified that the best blood  
purifier and nerve tonic is Hood's  
Sarsaparilla.

**To Bulldoze Japan.**  
The Guaiolo announces that Rus-  
sia has invited France and Germa-  
ny to sign a joint note stating their  
objections to the treaty of peace ar-  
rangements at Simonski between  
representatives of China and Japan  
and the latter country will be noti-  
fied that the fact of her ignoring  
this note will warrant armed in-  
tervention on the part of the three  
powers which sign it.

**DON'T STOP TOBACCO.**

**How to Cure Yourself While Using It.**  
The tobacco habit grows on a  
man until his nervous system is  
seriously affected, impairing health,  
comfort and happiness. To quit  
suddenly is too severe a shock to  
the system, as tobacco, to an in-  
veterate user becomes a stimulant  
that his system continually craves.  
Baco-Curo is a scientific cure for  
the tobacco habit, in all its forms,  
carefully compounded after the  
formula of an eminent Berlin phy-  
sician who has used it in his pri-  
vate practice since 1873, without a  
failure, purely vegetable and guar-  
anteed perfectly harmless. You  
can use all the tobacco you want,  
while taking Baco-Curo, it will not  
notify you when to stop. We give a  
written guarantee to permanently  
cure any case with three boxes, or re-  
fund the money with 10 per cent  
interest. Baco-Curo is not a sub-  
stitute, but a scientific cure, that  
cures without the aid of the will  
power and with no inconvenience.  
It leaves the system as pure, free  
from nicotine as the day you took  
your first chew or smoke. Sold by  
all druggists, with our ironclad guar-  
antee, at \$1.00 per box, three boxes,  
[thirty days treatment,] \$2.50, or  
sent direct upon receipt of price.  
Send six two-cent stamps for sam-  
ple box, booklet and proofs free.  
Eureka Chemical & Manufacturing  
Company, Manufacturing Chemists  
La Crosse, Wisconsin.

**An Editor Goes Wrong.**  
The editor of the Heppner Gaz-  
ette last week published the follow-  
ing item: "A Long creek girl re-  
cently sent her photograph to her  
best fellow and wrapped it in a  
newspaper in which was printed  
the advertisement of a stove firm.  
A portion of the print adhered to  
the photograph and the young man  
was very much surprised to see  
staring him in the face, in bold  
two-line pica type the following  
words: "See the name on the leg."  
The Heppner newspaper man can  
never more visit Long creek safely,  
if the girl has any big brothers.

**Boots From Human Skin.**  
In 1876 the firm of Hahreholtz  
Brothers, boot and shoe manufac-  
turers, New York City, made a pair  
of boots from human skin, which  
they sent to the centennial expo-  
sition, at Philadelphia. They were  
never put on exhibition, which  
shows that there was some human-  
ity left in the exposition officials  
if not in the maker of the ghastly  
footwear. They were afterwards  
sent to the Smithsonian institute,  
but were not allowed shelf room.

**SACALINE ON TRIAL.**  
An Agricultural Expert, Gives Adverse  
Opinion on its Merits.  
There is much good claimed for  
sacaline as a forage plant, and  
many Umatilla county farmers  
are experimenting with it this sea-  
son. While sacaline, it appears,  
has many friends who make favor-  
able statements in its behalf,  
there are many adverse reports  
made to its detriment as feed for  
cattle. Among such reports is the  
following, by F. W. Taylor, of the  
Nebraska experiment station:  
"This is exactly the year for  
farmers of the west especially, to  
be on the lookout for anything in  
the way of a forage plant that will  
withstand extreme drought; and  
just at this time so much is being  
said in favor of a plant growing  
under the name of sacaline that it  
seems to us if those who have seen it  
ought to say what their observa-  
tion has shown regarding it.  
"About a year ago I received  
from Dr. Bataline, director of the  
imperial botanic garden of Peters-  
burg, two of the roots. These were  
carefully planted and became es-  
tablished in pots, and were then  
set out in the ground. They grew  
perhaps three feet in the summer,  
making a coarse plant looking very  
much like its first cousin the com-  
mon smartweed or heart's-ease. In  
the autumn its stalks had become  
as hard and tough as sunflower  
stalks, and in fact worse, as they  
are not so full of pith. The whole  
appearance of the plant would in-  
dicate its relationship to the docks  
and smartweeds, and my observa-  
tion of it so far does not promise  
for it any greater value for forage  
than the other members of the  
family named possess.  
"But, for fear that what I have  
seen of it may not show it in fair  
light, I have taken pains to get to-  
gether many opinions upon it from  
various reliable sources, from which  
I quote. Dr. Bataline wrote at the  
time he sent the roots: "In my  
opinion Polygoum sacaline is unfit  
for fodder, because the stem runs  
rapidly to wood and the leaf be-  
comes leathery. I am persuaded  
that the enthusiasm for it in France  
is created by the impudent pre-  
tenses of trade." F. C. Bartus,  
assistant agriculturist in agricultural  
college of Kansas, says: "The  
plant made a very slow growth and  
about half of the plants survived  
the dry summer, and made a growth  
of a foot and a half." Professor  
Georgeson of the same institution  
says: "It seems entirely unsuited  
to the dry, hot climate of the West-  
ern states." This explained by the  
fact that the plant is a native of the  
island of Sagaline, off the north  
coast of Japan, where the rainfall  
is very great. Professor N. E.  
Hansen of the Iowa Agricultural  
College, where the plant has been  
growing for a good many years as  
an ornamental plant, says that they  
"do not wish to indorse it any  
way until better tested." Professor  
Pammel of the same school  
adds: "Several members of this  
family are pestiferous plants, and  
from what I have seen of sacaline I  
believe this will be as bad as any,  
and perhaps worse."

On the massive form of some of the  
prophetic revivalists seated trium-  
phantly on the Milky way and  
shall hear them say, "I told you  
so."

**Working This Way.**  
There seems to be no doubt that  
there is a gang of petty robbers or  
burglars on a small scale which is  
operating along the line of the O.  
R. & N. and from the newspaper  
accounts they are due here soon.  
Not too much care can be taken to  
spot them and prevent any depreda-  
tions in this city. Several small  
burglaries have been noticed in  
each town and now La Grande has  
been reached. The Chronicle says:  
"The epidemic of burglarizing  
which broke out in Baker City a  
few days ago has extended to La  
Grande, and the absence of any  
quarantine regulations in the way  
of a nightwatchman is not very  
well calculated to prevent a further  
spread of similar depredations. In  
each instance an entrance was  
effected through rear windows.  
There is so far no clue that will  
lead to the detection of the perpe-  
trators, and the amount of loss is  
so small that it is not likely any  
special effort will be made to ap-  
prehend the robbers."

If King Solomon was alive he  
would now say: "Go to the travel-  
ing man, learn his ways, and be  
wise." Mr. C. W. Battell, Cincin-  
nati traveling man representing the  
Queen City Printing Ink Co., after  
suffering intensely for two or three  
days with lameness of the shoulder,  
resulting from rheumatism, com-  
pletely cured it with two applica-  
tions of Chamberlain's Pain  
Balm. This remedy is gaining a  
wide reputation for its prompt  
cures of rheumatism, lame back,  
sprains, swellings, and lameness.  
50 cent bottles for sale by Os-  
burn.

**PROPOSES A PACKING HOUSE.**  
Horace Woods, of the Henry Krug  
Packing Company, Visits  
Pendleton.

Horace Woods, a representative  
of Henry Krug Packing Company,  
of St. Joseph, Missouri, visited  
Pendleton Thursday evening and  
talked on facts regarding pork  
packing.

A plant for pork packing could  
only be successful operated by mak-  
ing it complete enough to use every  
part of the carcass. This is done  
in all first-class packing houses  
and is now a necessary feature of  
the business. In the language of  
Mr. Woods "every part of the hog  
must be turned to some use, ex-  
cepting the squeal; that cannot be  
saved." About \$25,000 would con-  
struct the building and purchase  
the machinery complete for a plant  
consuming 100 hogs per day, or  
30,000 per year. Such a plant  
would employ from 30 to 50 men  
the year around. A plant with  
this capacity would be about as  
small as could be operated to ad-  
vantage.

To the mind of Mr. Woods, there  
exists no reason why a pork pack-  
ing plant could not be run in the  
Inland Empire as well as in places  
where they are now established.  
Mr. Woods has found in this sec-  
tion of the country a larger num-  
ber of hogs than he expected to  
find. His impressions of the coun-  
try are favorable, and if further in-  
vestigations confirms his first op-  
inions, he will be on the ground  
with definite propositions.

Mr. Wood asserts that any state-  
ments that there is a combination  
between packing house companies  
are ridiculous. He says they are  
continually fighting each other,  
instead of working as a trust.
