ATHENA, APRIL 15, 1898.

Senator Wilson should receive every encouragement from the people in the effort he is making to procure the abrogation of the immense forestry reserves created locomotives, bridges and all the by ex-President Cleveland. The Pacific coast is the principal sufferer from this iniquitous measure, because more of its territory is embraced within the areas of the reserves than that of any other commonwealth. A glance at the outline map prepared and published by the Tacoma Ledger gives a more definite idea of the evil than can be gathered from mere statements of the extent of these reserves, showing as it does the skeletons of large counties left open to settlement and development, after the government has removed from the open public domain the

lands with which it proposes to

experimentally hold in their

primeval condition.

The special edition of the Pendleton Tribune is before us. As to matter and substance, it fully covers Umatilla county and Eastern Oregon. The articles descriptive of the wonderful resources of Umatilla county and the Inland Empire are complete, and accurate in a statistical sense. While the typographical appearance of the edition would have been better had it been published from the home office instead of in Portland, the reading matter it contains, and the valuable information it gives, more than makes up for the typographical faults, and no one can afford to be without a copy. Athena is given a conspicuous place in the pages of the edition, and the article from the versatile pen of Attorney J. B. Huntington, reflects credit on the gentleman as a question now is, will be carry the writer.

> The passing away of Sir Henry Bessemer has recalled the history of his great invention and its effect upon industries of the world. The production of steel in Great Britain increased many fold and I there was a great reduction in the cost of manufacture. In cheapening steel the Bessemer invention has cheapened steel rails, engines, factors of transportation. It has also created a new influence in civilization, and inaugurated changes of importance that have added greatly to the comforts and luxuries of life.
