They find the raffa work a very fascinating pastime.

SCHOOL NOTES.

Mrs. E. R. Cox called on the teachers in the various grades Tuesday morning, in the interests of club work. She gave the ladies an invitation to attend the meeting of the Friday Afternoon club today.

The teachers are making an effort to obtain a gymnasium for the school, and solicit the co-operation of all patrons.

The pupils of the eighth grade were given a surprise Tuesday, by Principal Watts, in the way of a test in mental arithmetic.

The high school has a ladies' quartet, composed of Misses Wilkinson, Rider, McBride and Luna. Miss Rosenzweig, teacher in primary grade, is accompanist.

The teachers in the school received notices this week, concerning the institute to be held soon in Weston. In behalf of the good people of that city, President French extends the hospitality of the town.

The question often asked and seldom answered, is: "How old is Ann?" Here is the problem: Mary is 24 years old. Mary is twice as old as Ann was when Mary was as old as Ann is now. How old is Ann? Principal Watts gave this problem to the high school and several of them succeeded in solving the mystery. The two following solutions are given, the first by Arthur Stone, the second by Velma Wilkinson: First: "Let x equal difference of their ages. Then 24 minus x equals Ann's age. One-half of 24 or 12 equals Ann's age when Mary was 24 minus x years old. Then 12 plus x equals Ann's age, or Mary's age when Mary was as old as Ann is now. Therefore: 12 plus x equals 24 minus x, or 2x equals 12, x equals 6, difference in ages. Therefore: 24 minus x or 18 equals Ann's age." Second: "Mary is 24 years old. Mary is twice as old as Ann was when Mary was as old as Ann is now. How old is Ann? Solution: According to the problem, Ann was 12 years old when Mary's age was 24 minus the difference in their ages. Let x equal the difference. Then 24 minus x equals Ann's age at the present time. Then

when Ann was 12, Mary's age was 12 plus x or Ann's age now. Therefore: 24 years minus x equals 12 year plus x, or x equals 6 years. Then 24 years minus 6 years equals 18 years, Ann's age at the present time."

COR. MAIN AND THIRD, ATHENA, OR.

Athena's Big Department Store.

IF YOU TRADE here you won't want your money back. Brag is not good business, but a modest man may tell the truth. From the first day this store opened for business in Athena it has enjoyed a steady growth. Each month better than the previous. Each year a gain of from 50 to 60 per cent over the year preceding it. And now the beginning of our year's business in your midst we think we can say without fear of contradiction that we have the largest business with the smallest expense of any store in Umatilla County. Predictions that this store was short life amongst you were often heard. Some were kind enough to give us six months. Others not so long. Some said we were way out of town, and various other reasons why we were soon to go. The predictions were usually heard from competitors—not customers, and as you all can see have come to naught. We came here because we had faith in Athena. We came here with a determination to lower prices. We came here to convince you that the Cash Store can and does sell cheaper, and today you never hear our friends say the FAIR IS TOO FAR AWAY. No, no; they never think of that, as they have all learned that it's a profitable walk.

FOR ONE WEEK ONLY

Commencing Saturday, Oct. 24, and ending Saturday, Oct. 31. This will interest you—we will sell the very best grade of 10c Outing Flannels in all colors for 7c per yard. Also our great 20c Heavy Fleeced Ladies' Hose, 2 pair for 26c. Men's and Boys Clothing and Overcoats—for one week we will give a 10 per cent off on our Clothing.

DON'T MISS THIS WEEK—IT'S FULL OF GOOD THINGS FOR YOU
