Cautions about the Use and Selection of Spectacles
Persons having normal vision will be able to read this printed as a distance of 14 inches from their eyes with ease and comfort. One will be able to read it with such ease, naturally, if unable to do so your eyes are defective and should have immediate attention. There are four causes which render reading spectacles necessary, or if the letters look blurred and you squint, it is a sure indication that action is needed. The lenses put in the glasses guide the eye of special ability and have temporarily formed weakness. Continued use of cheap lenses would result in permanent injury from the untimely strain upon the tissues of accommodation to supply the defects in the eye.
