THE STANDARD ROTARY

The World's Best Sewing Machine

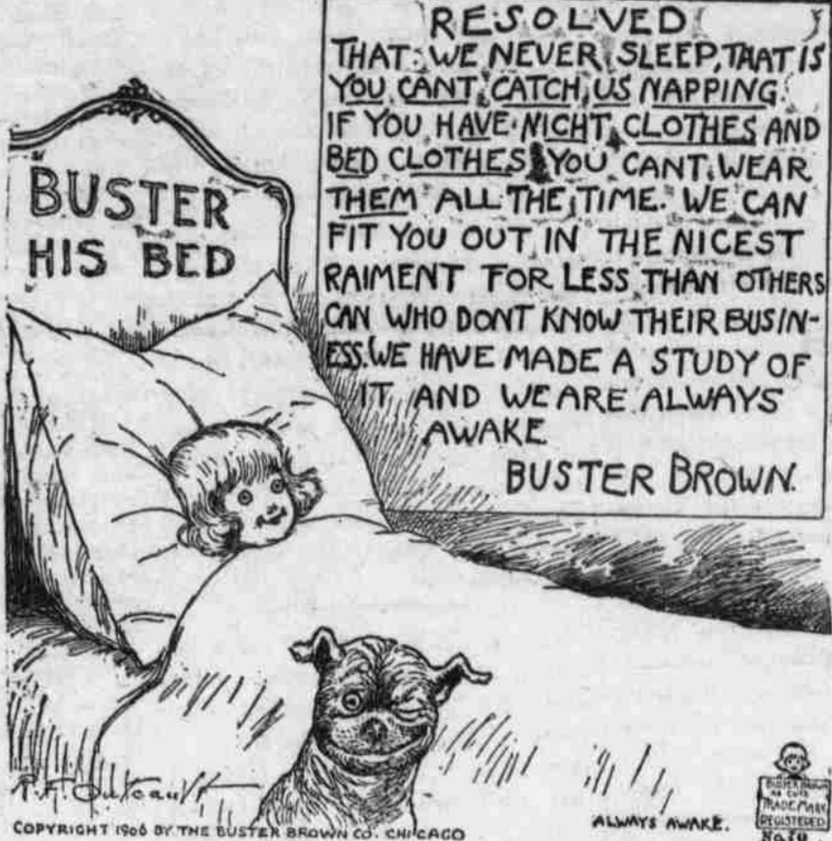

It is the Highest Grade because the Standard Rotary principle is absolutely perfect, the material the very best and it is constructed by skilled mechanics only. It is the Fastest because the Standard Rotary Shuttle travels less than half as far vibrating and oscillating shuttles in making each stitch. It makes 350 stitches while others make 200.

It is the Easiest Running because full ball bearing, and it requires but the slightest touch to start the shuttle revolving, and very little effort is necessary to keep it going round and round, whereas on vibrating and oscillating shuttle machines 50 per cent more movements of the treadle are necessary in sewing the same length seam to furnish enough power to carry the shuttle more than double the distance and to overcome the resistance resulting from the two stops and two starts in making each stitch.

Is there a Dressmaker, or a home sewer, who can afford to absolutely throw away three hours of every seven spent in sewing on vibrating or oscillating shuttle machines? Four hours of superior work on the Standard Rotary and three hours of pleasure afford greater satisfaction.
