There is another good garden in Athena this year, as samples brought to the Press office yesterday by Mrs. H. H. Hill clearly demonstrate. Curious Tombstone. On a gravestone in the parish churchyard of Great Yarmouth, England, there is sculptured the unusual representation of a clown seated in a tub, which is being drawn down a river by two swans. Beneath this stone lies one of the many victims who were drowned years ago by the collapse of an iron suspension bridge on which they had crowded to see a clown pass underneath in the manner described. The feat, which was a novel form of advertisement by a traveling circus, was actually performed, but the rush of people from one side of the bridge to the other after the man had passed under caused the tragic ending.
