Bowers-She was safe in challenging that fellow to guess her age. Powers -Who is he? Bowers-The weather man.

Mrs. Bills-Did you have any trouble in firing the servant girl that you had the scrap with? Mrs. Wills-No. my husband used his pull to have the cop on the corner transferred to another beat.

Boyce-I never heard of a man like Jones; he goes home every night and tells his wife about the bargains he has seen advertised for the next day. Joyce-Yes; he is trying to keep her from cleaning house.

Wow to Save Quall in Winter. General Speaks, our efficient state game warden, is receiving hundreds of letters asking for advice as to how to save the quail from starvation in the old-fashioned winter. The quail is about the most helpless bird we have in Ohio. Although it winters in this latitude, it hasn't the slightest idea how to take care of itself when the deep snows come. When the ground is covered and the ready food supply is shut off, these beautiful and useful birds huddle together and wait in miserable motionless flocks for death by freezing or starvation. The only way to save them is to scatter on the snow near their haunts liberal allowances of grain or other suitable food. A few of the bolder or tamer birds will find it and go and tell the others. It is gratifying to learn from the volume of the game warden's mail on this subject that farmers in all parts of the state are keenly interested in the conservation of the quail, whose value to

BIRDS AND FRUIT INDUSTRY.

Alfalfa Julce a Curative.

Alfalfa, hitherto holder of a plebefar

place in the food scheme, is destined Feathered Denizens Destroy Great to become a comprehensive medicative Numbers of Harmful Insects and and remedial agent that will put all Noxious Seeds. others in the shade, according to Dr.

Marian N. Clark, who announces the The United States Department of discovery of remarkable curative pow-Agriculture, having concluded its iners in the plant and blossoms. Her vestigations as to the harmful or beneidea, already carried out on a small ficial effect of California birds upon scale and suggested by the methol inthe fruit industry of that state, has dustry, is to electrolyze the alfalfa issued the second and final part of and condense its healing elements to its report in Bulletin No. 34 of the vest pocket size—a haystack of medi-Biological Survey. Seventy species eine in a tiny tablet. Dr. Clark reof the feathered denizens, among counts many instances of curing with them some of the most important the condensed alfalfa juice many nervbirds of the state from the farmers' ous ailments, from D. T.'s to that tired and fruit growers' standpoint, were feeling. One of these was the aggrasystematically investigated. It is vated case of a Reno sport who bet true that many of them have not been on Jeffries and drowned his sorrow in charged with the destruction or inso many tall ones that the cobras jury of fruit or any other farm prodcame to get him. The condensed hay uct, but as almost all destroy great expert beat 'em to it, and cured the numbers of harmful insects, or devour victim so effectively that now he shudseeds of noxious weeds, they are imders at sight of even a dog, if the dog portant as a factor in farm economics, is a growler. Tobacco chewing, and the aim has been to collect all gloomy thoughts of suicide, insomnia, data possible on the food of the sevand a host of other undesirable things eral species, so that a just verdict fade away like the mists of the mornmight be rendered as to the birds' ing under the soothing influence of a economic relations. few forkfuls of alfalfa bunched up into

Few birds are always and everywhere so destructive that their extermination can be urged on sound economic principles; some, like the swallows, swifts, wrens, and chickadees, are so strictly insectivorous that they are exceedingly beneficial, while others may injure crops at certain times of the year, but the loss is exceedingly small, and if by its insectivorous habits the bird prevents much greater destruction than it inflicts, the farmer should be willing to bear the lesser

A reasonable way of viewing the relation of birds to the farmer is to consider them as servants, employed to destroy weeds and insects, for whom sufficient food and needed protection is generously provided. In the long run, no part of the capital in Itinerant Opticians Work Rural Disvested in the farm or orchard is more certain to pay big interest than the small sum collected as toll by the vineyards on the Pacific coast, show species, whose stomach contents were These are the linnet, California jay,

These are the linnet, California jay, stellar jay, and red-breasted sapsucker. Therefore, when all the known methods of protecting fruit have been exhausted, or can not be profitably employed, a reasonable reduction of the numbers of these offending birds aminers of Optometry, Salem, Ore. is permissible; but the more the food habits of birds are studied, the more evident is the fact that with a normal

CARING FOR MILK PROPERLY

Crusade Against House Fly One Best Moves in Recent Years in Sanitary Matters.

While the diamond is the hardest P. M. Harwood, of the dairy bureau. substance known it is also brittle and United States department of agriculmay be fractured by a blow. But if it ture, pointed out that the producer is placed between two hard steel faces and dealer are well informed about in a hydraulic press and a slowly acthe rules of cleanliness and are comcelerating pressure applied the hard pelled by law to conform to them in the handling of milk, but the consumer has much to learn in this respect He said that the crusade against the house fly is one of the best moves of recent years in sanitary matters because the fly is dirty and contaminates the milk unless there is proper pepsia and sour stomach for the last two years. I have been taking medicine and other drugs, but could find no relief only for a short time. I will recommend care, and as a general rule the housekeeper is not aware of the danger from flies. Nine rules for the care of milk were suggested, as follows:

1. Take in milk and cream as soon as possible after being left at your door and place in the refrigerator. 2. Keep milk and cream cold until rendy for use. The bottom of the re-

frigerator is colder than the ice container. 3. If ice cannot be had, wrap the bottle in a wet cloth and stand it in gle with the waves?" asked the man a dish of water by an open window, out of the sun; evaporation of the

water will cool the milk. 4. Keep milk or cream covered un-"Yes," laughed the pompous man in til wanted, and in the bottle in which the green shirt. "I once sat for two long hours while a professional hair it is delivered; in open bowls or pitchers they will absorb odors from food

and collect files and dust. 5. Pour from the bottle only what milk or cream is needed for immedi-

6. Milk () cream that has become

warm should never be poured back into the bottle of cold milk. 7. Utensils used for milk should be cleansed with cold water and then

with boiling water, thoroughly drained and allowed to become cold before being filled with milk, 8. Wash and return all milk or cream bottles daily.

9. Have a separate quart of milk for the baby; what he does not use others may have.

The Hardy Goat. The goat, because of its hardy nature, is less liable to tubergulosis than the cow. It utilizes food better, and gives more milk, considering its bodily weight. Goats prefer hilly ground, and do not do well on low, swampy ground. They need protection against cold rains and should be well housed.

Winter Cuttings. It is too early to make cuttings of flowers for winter blooming in the window garder
