FASHIONS MOMENT.

which best expresses the matinee. new silks dedicated to coronation year, writes our

brocades which we shall delight to narrow pyramids of flowers. honor, and which will, no doubt, with equal fervor, delight to honor us in the coming season, which has almost come. Simple designs in gold, somewhat oriental in effect, are interwoven upon foundations as soft and pliable as gauze, yet thick and solid enough for the making of frocks unlined. In contrast to this there is a very much entangled and very elaborate pattern with flowers entwined on waving lines of gold, and there are further conventional and floral devices in gold and silver on dark or light foundations. The special attraction of most of the chine is again an established favorite, either plain or printed, or interwoven gauze, and on grenadine, and on charmeuse. Altogether, when you come to investigate a selection of the silks of the hour you will cordially indorse my verdict that sumptuous is the one and only possible description.

What we shall do with these sliks remains to be seen, but, of course, they are primarily dedicated to the service of the court train or to the evening dress of our greatest demand, for we are to foot it merrily in 1911. On the whole it will be an economical purchase, the gown of good slik, since it may be relied upon to outwear the gown of muslin or chiffon by at least a dozen times. A tunic and bodice of one of the brocades opening at one side of the front to show an underskirt of lace, and made with a shortwaisted bodice with a little lace about the decolletage, with sleeves and bodice cut in kimono fashion-will represent the most patronized style, further elaborate possibilities being supplied by flat or round gold cords and tassels.

This reminds me of a strange fure which was my neighbor at the theater the other night. This was a flatly rolled turban of hair with a thick gold cord resting about an inch above the eyebrows and terminating in two tassels above the left ear. The effect was definitely curious and almost as definitely Turkish.

Fashion is hot with the Oriental spirit. All the best theater cloaks are of Oriental embroidery, bordered with fur for the present, and liable to be denuded of it at any moment while much favor is still shown to pine-patterned cotton as a foundation for day blouses velled with ninon. Far newer than this latter, however, are the patterened ninons which are inspired by the work of the Roumanians and the Russians; and for our hats and wraps we seem to have sought and found inspiration in the great little Corsican, for the upturned brim, the cockade, and the shrouding mantle with its military decorations all savor of Napo-

Very pretty these new coats are, too, and when diverging from the straight path they permit themselves gold, and black, and red braid, and gold buttons, and a lining of crimson.

There is a deal of crimson in the market, indeed red, white and blue are conspicuously loved, separately and together, and what could be better or more sultable for the moment? An excellent dark red dress that I bave seen designed for spring wear is fashioned with a short bolero and narrow skirt piped on to it well above the usual waist line, a round, turndown collar of Roumanian embroidery, very tight long sleeves cut in one with the bolero, which has a vest of touched up with turquoise jewels. white muslin with a soft plaited frill at one side and a collarband outlined with black satin buckled with gold in the center. A dark red Tegal hat trimmed with a black cockade with a of two patients of the Jewish Mater group of blue beads in the center finishes this most admirably, and to be long standing, who "happened to inworn with it has been purchased a long coat of black lined with red, with that building by a boy and a girl on in the sky." epaulettes of black braid and small the same day. They had often ex-

gold buttons. Talking of long coats remind me of a capital specimen in raven blue satin which I met yesterday. This was cut in one with its sleeves, the sleeves being rather wide at their base, while the trimming down the center of the front was formed by squares of Oriental embroidery in different shades of blue, and on every edge was a bind of braid, and turned down at the neck was a small collar of white Irish lace. and the lining was of bright blue, a color which was again repeated on the has no legal validity either in Jewish a day off to enjoy yourself." brim of the turban toque of black or American law. crinoline which crowned all these charms.

Turban toques bearing crinoline crowns and straw brims held with thing of value in the trunk of that felfeathers or flowers or beaded ornaments are to have much vogue, and pretty they are too, and comfortable of our linen and silverware.-Judge.

UMPTUOUS! sumptuous! 1 at that, while to the short woman they sumptuous! What I tell grant height, since they are very nar you three times must be row, and the tall on that account must true, and this is the word | not adopt them as millinery for th€

These last ! feel I could cheerfully dispense with, lined and fringed with a color, su good old-fashioned rawsberry jam." premely becoming and engendering as much warmth as desirable when the fur boa need no longer be a circumstance of our necessity. The satin supplied to match every satin or mus-Ifn frock. The tweed coats and skirts Gaby "1." are best without such addenda, but new silks is their double width, and plain-faced cloths may well be so for the contrivance of the straight, treated, but it would seem that silks narrow frock it beseems us to ac- are to have it all their own way, and knowledge this gratefully. Crepe de for everyday occasions the short dress made of soft satin will enjoy considerable patronage; and floral musilns, with gold, and gold plays its part on and crepe de chines, and foulards. will only stand in the background until May is an established fact.

After all there will be so many occasions to wear so many frocks that the thrifty will doubtless hide their heads in the country, sing hey for the simple life and enwrap themselves in printed cambric and take earnestly to sport, or gardening, or even needlework.

Apropos of needlework, the industrious may find much excuse for their labors in the popularity of bead trimmings which are to be bought ready-

made at prohibitive prices under the best circumstances, and may yet be accomplished in a manner that will lead to triumph, by the skilled amateur with a nice eye for co'or. There are several bead shops in town nowadays where every variety of bead and bugle definitely French and indefinitely Oriental may be discovered, and amongst my recent investigations has been a length of black and green brocade with the design carefully followed out in dull gold bugles and some red and blue Oriental beads, with a result that was surprisingly effective and bore no hint of home manufacture. Of course it is easy enough to contrive the many-beaded devices which decorate the latest millinery, and the beaded tassel may be calculated to bestow an air of elegance on quite inexpensive straws.

The illustrations shows a little evening frock in silver-gray voile on transparent silver turquoise embroidery,

Let Milk Stand Until a Good Head of Cream Rises, Cook to Boiling Point

A reader who was interested in a recipe for making Devonshire cream has kindly written as follows, regarding method of procedure: "I used to work in a dairy at home where Devonshire cream was one of our specialties. The way we made ours was to let the milk stand till a good head of cream rose on it. Then we lifted the tin containing it onto a copper boiler of water, hot, but not boiling, and let it simmer until done. In this way, the cream is made sweeter, though good results can be obtained either way. One advantage in water scalding is that you cannot burn the cream as you might with stove scalding. Care must be taken not to have the milk tin too full or it will sink. The water must be of sufficient quantity to float the milk tin. Our copper was generally built in a house, but in my opinion where a stove is used a large deep pan filled with water would answer the same purpose."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children luring the teething period.
