Wild Bees.

Wild bees gather the nectar most freely in the buckwheat. They also will attack blossoms that the tame bees ignore. The bee from the woods doesn't seem to care for propagated flowers, nor will it enter any bive that has been placed for it, no matter how enticing the food there. It is far more vicious than its cultivated brother.

Recalling Tennyson. Sububs-I sny, Nexdore, those hens of yours belong to the Mand breed, ton't they? Nexdore-Never heard of the Maud breed. What gives you that idea? Sububs-Because they are all the time coming into my garden .- Philadelphia Ledger.

temple built more than 2,000 years before him by King Naramsin he was, or thought he was, doing the work of an archaeological scholar. When the Roman priests, under the Antoine emperors, continued to use in their sacrifices only the primitive black earthen cups that had been in use for nearly a thousand years, since before the founding of Rome, they

were practical archaeologists. "When the Emperor Augustus insisted on having copies of the best works of Greek sculpture of different ages and styles made in the exact nanner of the originals, including archaic works, he was obliging his sculptors to be archaeologists. The Emperor Claudius, who wrote on antiquities and used archaicisms, was lampooned by scurrilous Romans as a pedantic archaeologist, and Hadrian. the Philhellene, among his many efforts at resurrecting ancient Hellas. can count the revival of the Pergamene and Alexandrian styles of sculpture."

Old Time Kissing Customs.

The English distaste for klasing is a thing of comparatively recent growth. In the seventeenth century our habits were the wonder of the foreigner. Nicolaus de Bethlen, a Hungarian, who visited these shores in 1633, relates that "my brother and I behaved very rudely on one occasion, being unaware that it was the custom in that country to kiss the corner of the mouth of ladies instead of shaking hands, as we do in Hungary. We were invited to dine at the house of a gentleman of high rank and found his wife and three daughters, one of them married, ready to receive us. We kissed the girls, but not the married ladies, and thereby greatly offended the latter. Duval apologized for our blunder and told us that when saluting we must always kiss the senior lady first and leave the girls to the last."-London Express.

Sneezing In Persia.

The well known superstition that to sneeze once is a bad omen seriously interferes with many of the duties and pleasures of the Persian. When he is so unfortunate as to sneeze once be quickly says, "Sabar amad" (a time for waiting has come), and for at least two hours thereafter he cannot be persuaded to take medicine, start on a fourney or begin any new or important work. A missionary surgeon who has more than once had to postpone an operation because he or the patient sneezed once says, "I have now become an adept at producing double rneezes."-Los Angeles Times.

The Sarcastic Druggist.

Druggist-Yes, madam? Woman-That last postage stamp you sold me dropped off the envelope and the letter went to the dead letter office, and I want to know what you are going to do about it. Druggist-Why, of course, madam, as I personally guarantee each of the stamps I sell I'll make it good.

ROBERT SOUTHEY."

A thousand machines of many types and sizes and designed for many purposes are used today in the manufacture of paper boxes. This assortment of machines is absolutely necessary, for the number of styles of cardboard boxes used for packing all sorts of articles is without limit.

According to the Edison Monthly, one industry alone, the making of pens, pencils and erasers, requires boxes of 4,000 different sizes and shapes.

Paper box making, one of the new but important industries of this country, has made its greatest progress during the last half century and particularly within the last twenty years, after modern machinery had been introduced. The business has assumed wonderful proportions in New York city, where the capital invested exceeds \$5,000,000.

One hundred years ago there was no such thing as a paper box. The container of those days consisted of nothing more than a heavy sheet of paper wrapped around the article to be carried. In time some progressive person conceived the idea of cutting part way through the paper in order to make it fold more readily. With this four sided wrapper it became the custom to tuck the loose ends in to prevent the contents slipping out.

From this was evolved the idea of scoring the paper so both the sides and ends folded up and then gluing the ends together. That was the way the first paper boxes were made, and it was years before any marked improvement was made. In those days a knife, a pair of shears, a kettle of paste and a straightedge, with a supply of box board were sufficient equipment to start a man in business.

Her Alibi. Much to the curious little girl's disgust, her elder sister and her girl friends had quickly closed the door of the back parlor before she could wedge her small self in among them. She waited uneasily for a little while; then she knocked. No response. She knocked again. Still uo attention. Her curiosity could be controlled no longer. "Dodo,"' she called in staccato tones as she knocked once again. ""Tain't me! It's mamma!"-Lippincott's.

A Desirable Limitation. "I envy the man who believes that superstition about Friday." said Mr. Growcher.

"I consider it depressing." "Not at all. A man ought to be mighty comfortable who can feel sure there's only one unlucky day in the week."-Washington Star.

Willie Remembered.

Mother (reprovingly)-Willie, som one else may like the tender bits of celery besides you. Why do you always pick them out when the dish is passed? Willie-You said, ma, that I must never take the biggest pieces when things are passed to me .- Boston Transcript.
